# **2024** Edelman Trust Barometer

Thailand Report

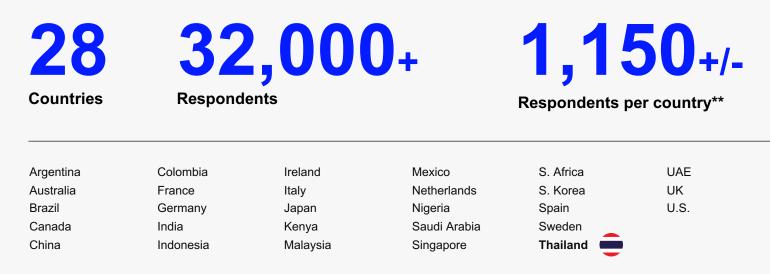

#### **2024 Edelman Trust Barometer**

Methodology

#### Annual online survey in its 24th year

Fieldwork conducted: Nov 3 – Nov 22, 2023

Data collected is representative of the general population across age, gender, region and ethnicity/nationality (where applicable) within each country.

#### Global averages

Unless otherwise indicated, global averages are composed of all 28 countries surveyed.

#### **Statistical significance**

(+)

**O** Significant change

Indicates a statistically meaningful difference or change in the data that is unlikely to be due to chance or a random fluctuation.

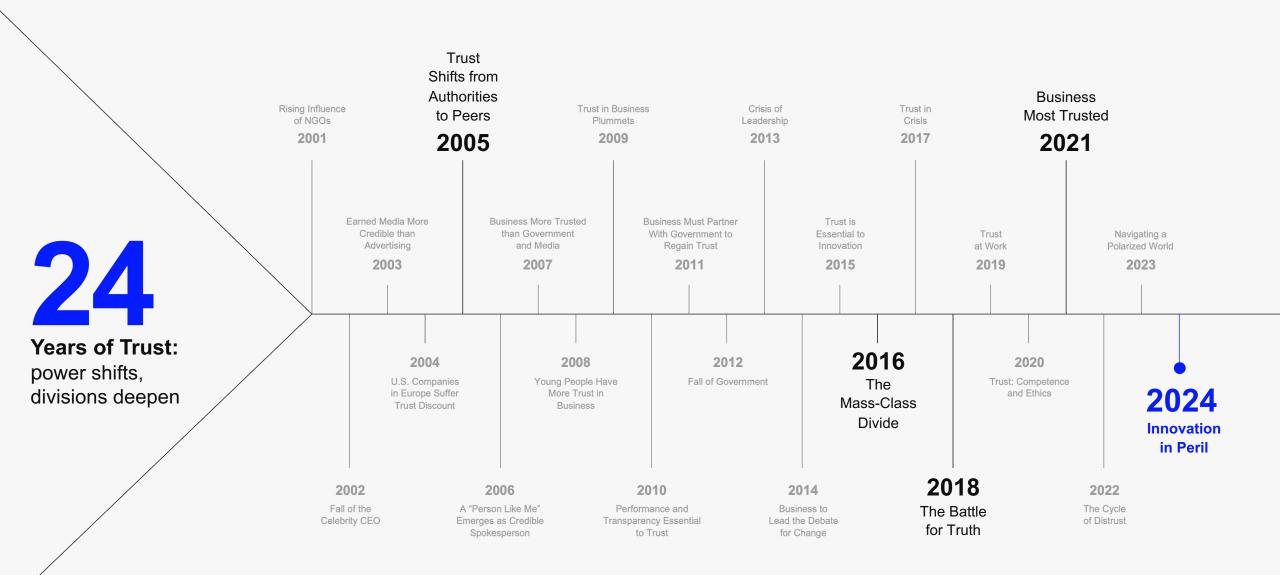

All indicated year-over-year significant changes were determined using a t-test set at a 99%+ confidence level.

#### Shortened question text

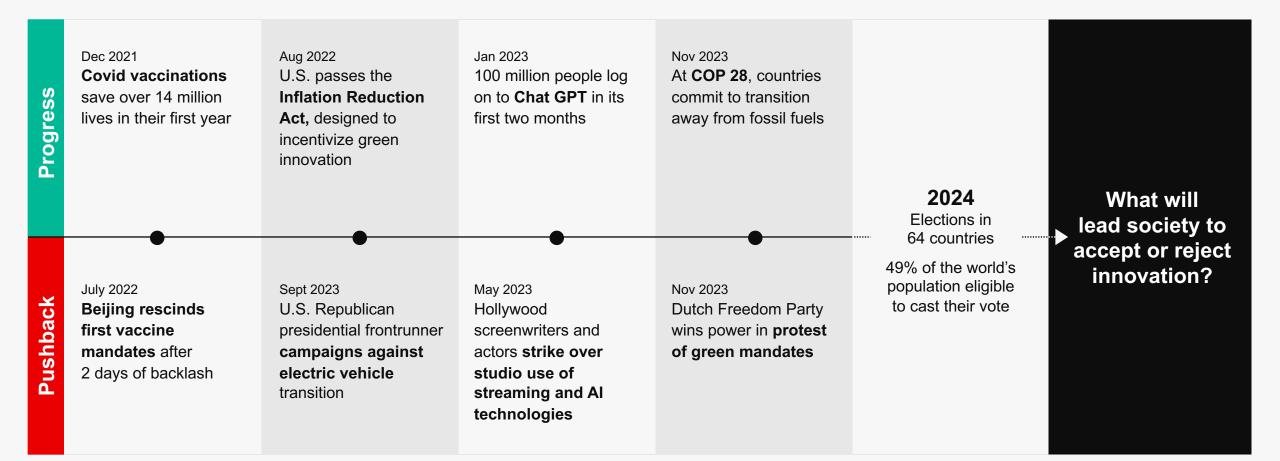

Throughout the report, question text has been edited for readability.

For more details on global averages, country-specific sample information, or to see the full text for any shortened statements, please see the Technical Appendix

\*\*The sample size varies by country from 1,109 to 1,500.
28-market global data margin of error: General population +/- 0.7 percentage points (n=32,492)
Country-specific data margin of error: General population +/- 3.3 to 3.9 percentage points (varies by country based on sample size, n=1,109 to n=1,500)
Margin of error is calculated at the 99% confidence level

#### In Thailand, Business Seen as More Competent than NGOs

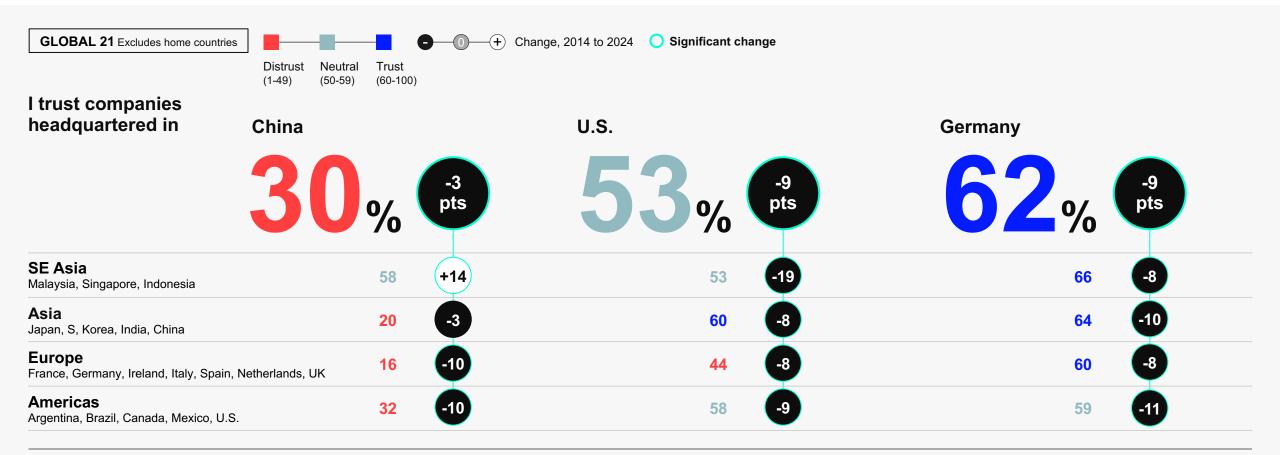

(Competence score, net ethical score)

2024 Edelman Trust Barometer. The ethical scores are averages of nets based on [INS]\_PER\_DIM/1-4. Business and NGOs were only asked of half the sample. The competence score is a net based on TRU\_3D\_[INS]/1. Business and NGOs were only asked of half the sample. General population, Thailand. For full details regarding how this data was calculated and plotted, please see the Technical Appendix.

#### **10-Year Shift: Less Trust for Companies Headquartered in Global Powers**

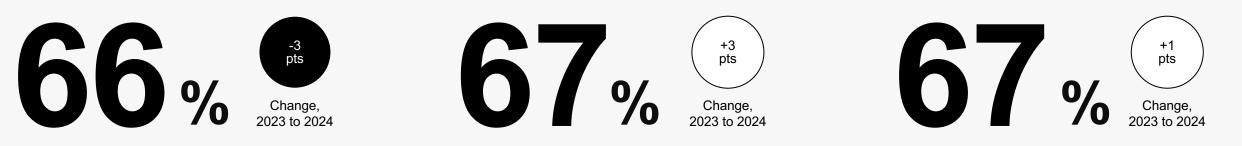

Percent trust in companies headquartered in each country, among respondents from outside each country being rated

**2024 Edelman Trust Barometer.** TRU\_NAT. Now we would like to focus on global companies headquartered in specific markets. Please indicate how much you trust global companies headquartered in the following markets to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 21-mkt avg., and by region. Data excludes respondents from the country being rated. Ten-year changes were tested for significance using a t-test set at the 99%+ confidence level.

#### **Establishment Leaders Not Trusted to Tell Us the Truth**

Percent who worry, in Thailand

**Government leaders** 

**Business leaders** 

Journalists and reporters

# are **purposely trying to mislead people** by saying things they know are false or gross exaggerations

**2024 Edelman Trust Barometer.** POP\_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. General population, Thailand. Attributes asked of half the sample. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Distrust

(1-49)

#### **Dispersion of Authority: Peers on Par With Experts and CEOs**

Percent trust in, Thailand

Neutral Trust (60-100) (50-59) I trust each to tell me the truth about 78 new innovations and technologies 75 72 71 68 66 63 Scientists **CEOs** NGO Company Someone Journalists Government technical expert like me representatives leaders

2024 Edelman Trust Barometer. TRU\_PEP\_TCNG. Below is a list of categories of people. For each one, please indicate how much you trust that person or group of people to tell you the truth about new innovations and technologies. 9point scale; top 4 box, trust. Question asked of half the sample. General population, Thailand.

#### **Economic Fears Persist as Societal Concerns Rise**

In Thailand, percent who worry about...

Significant change ()Personal **Existential** economic fears societal fears 92 85 78 75 72 67 Change, +8 -3 +6 -2 Most significant increase: 2023 to 2024 fear of hackers Inflation Hackers Information Job loss Climate Nuclear (net) change war war

2024 Edelman Trust Barometer. POP\_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Some attributes asked of half the sample. General population, Thailand. Job loss asked of those who are an employee of an organization (Q43/1). Job loss is a net of attributes 1-3, 5, and 22-24. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

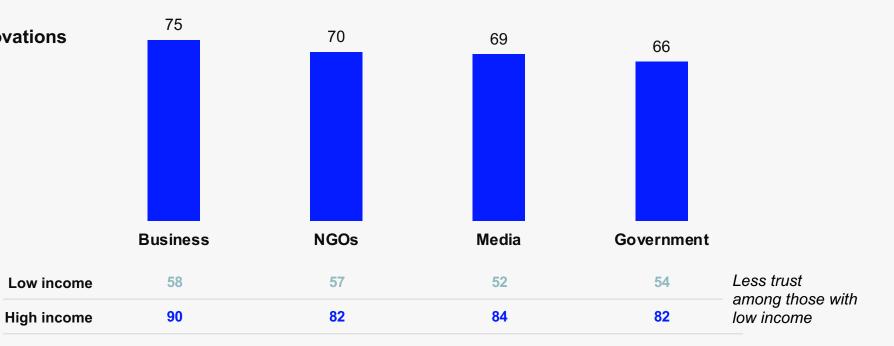

#### All Institutions Trusted to Integrate Innovation into Society

Percent trust, in Thailand

Distrust Neutral Trust (1-49) (50-59) (60-100)

# I trust each with the introduction of innovations into society, ensuring they are

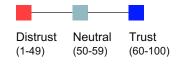

- Safe
- Understood by the public
- Beneficial
- Accessible

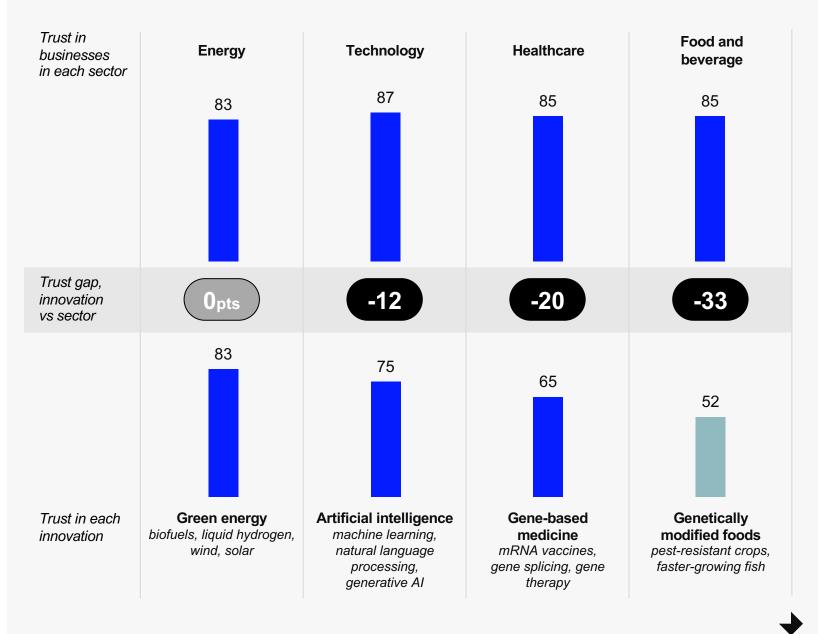

**2024 Edelman Trust Barometer.** TRU\_INS\_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them). 9-point scale; top 4 box, trust. Question asked of half the sample. General population, Thailand, and by income.

# Trust in Industry Sectors Does Not Guarantee Trust in Industry Innovations

Percent trust, in Thailand

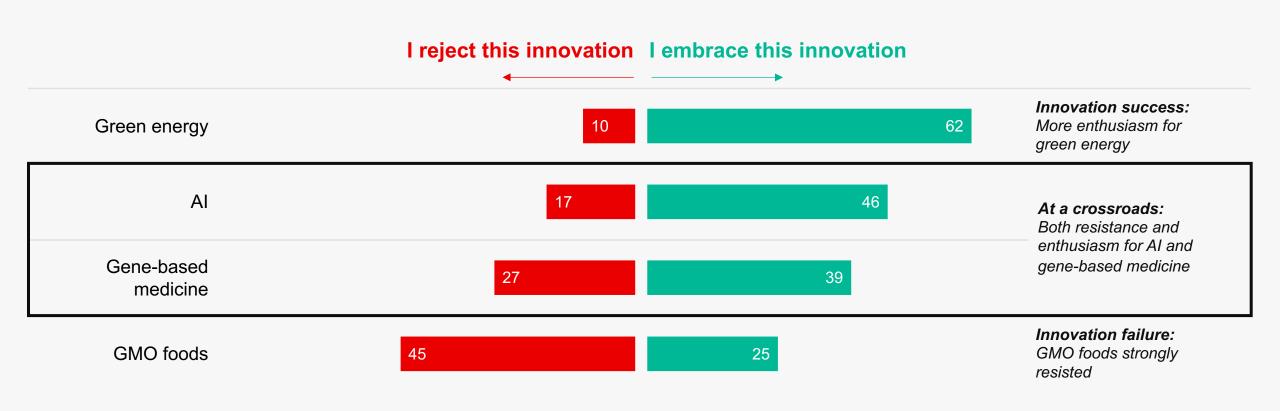

**2024 Edelman Trust Barometer.** TRU\_IND. Please indicate how much you trust businesses in each of the following industries to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. TEC\_TRU. How much do you trust each of these technologies? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, Thailand.

#### Acceptance of Innovation at Stake

Percent who say, in Thailand

2024 Edelman Trust Barometer. CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; bottom 2 box, resistant or hesitant = reject; top 2 box, enthusiastic or passionate = embrace. General population, Thailand.

# **Innovation is on the Ballot**

WORDT HONGER GEBOREN

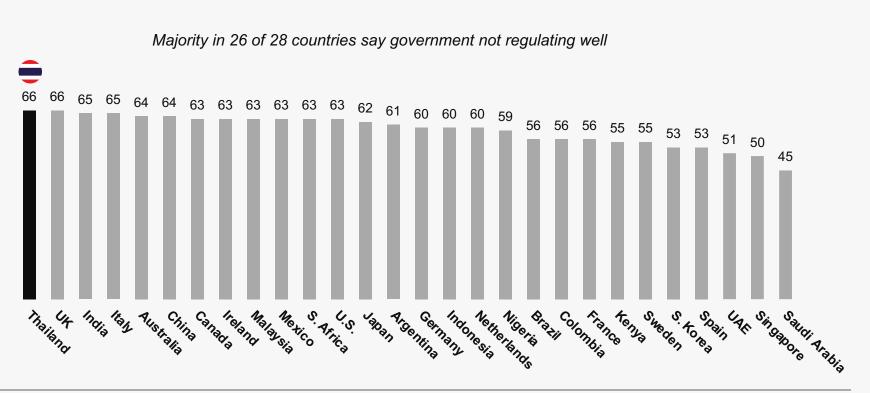

#### **Government Lacks Competence to Regulate Emerging Innovations**

Percent who say this is true

GLOBAL 28

Government regulators lack adequate understanding of emerging technologies to regulate them effectively

59%

2024 Edelman Trust Barometer. POP\_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. General population, 28-mkt avg.

#### **Concerned Government Has Too Much Influence on Science**

Percent who agree, in Thailand

Science has become politicized in this country

Government and organizations that fund research have **too much influence** on how science is done

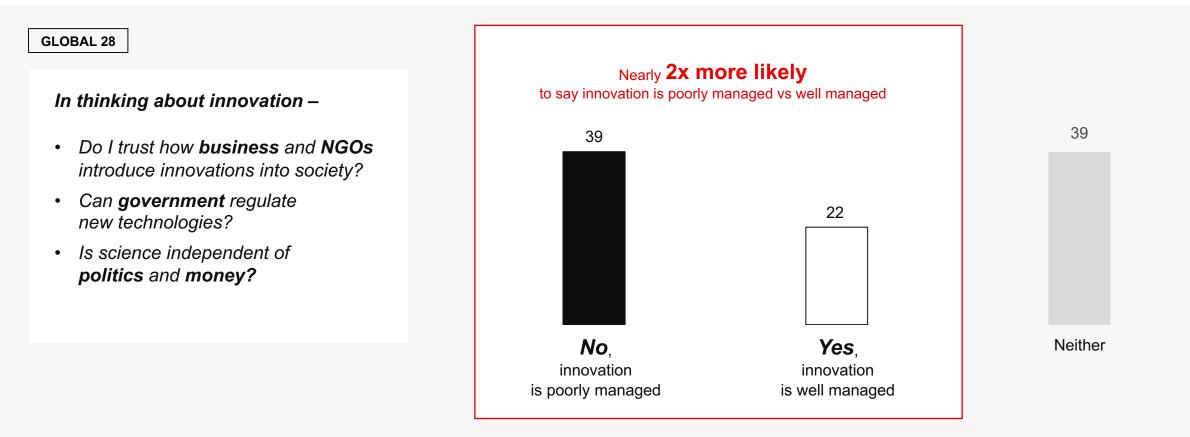

2024 Edelman Trust Barometer. CHG\_AGR. Please indicate how much you agree or disagree with the following statements. 9-point scale; top 4 box, agree. Question asked of half the sample. General population, Thailand.

# Globally, Nearly 2x More Likely to Fear Innovation Poorly Managed

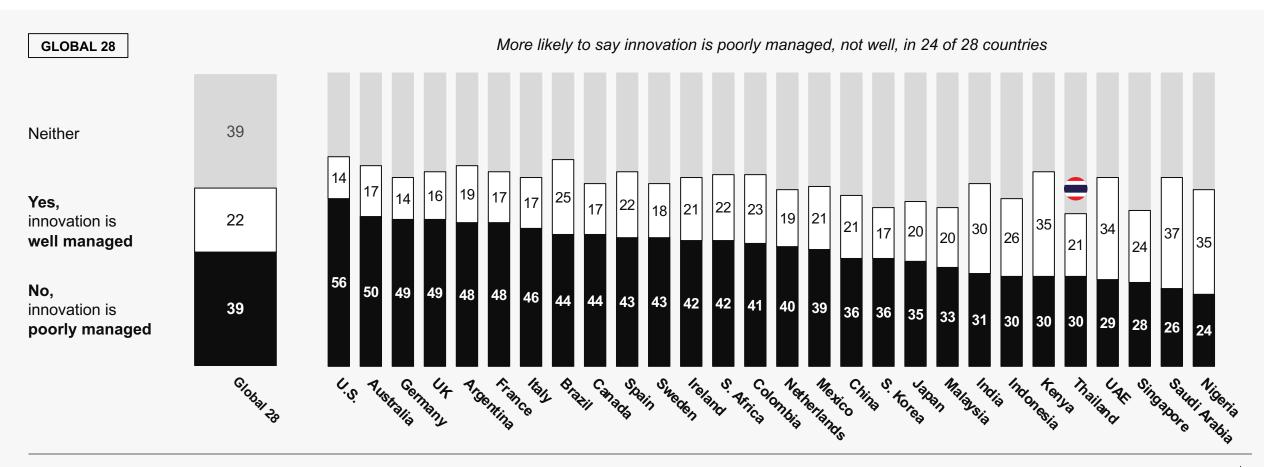

On average, percent who say

2024 Edelman Trust Barometer. Innovation Management Scale. General population, 28-mkt avg. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

## Nearly All Countries More Likely to Believe Innovation is Mismanaged Rather Than Well Managed

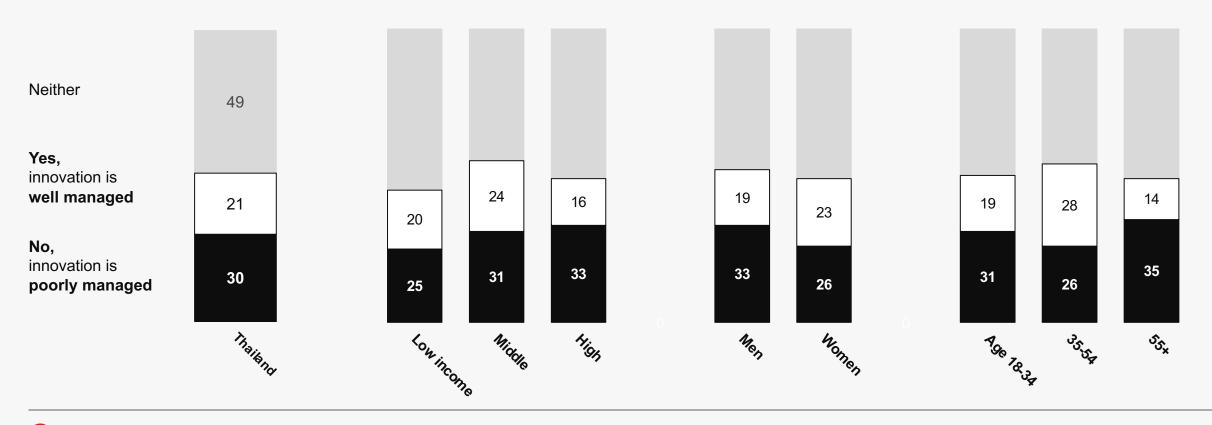

On average, percent who say

2024 Edelman Trust Barometer. Innovation Management Scale. General population, 28-mkt avg. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

# In Thailand, Concern Innovation is Mismanaged Shared Across Income, Gender, and Age

On average, percent who say, in Thailand

2024 Edelman Trust Barometer. Innovation Management Scale. General population, Thailand, and by demographics. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

### When Institutions Mismanage Innovation: More Rejection, Less Enthusiasm for Emerging Technologies

Percent who say

GLOBAL 28

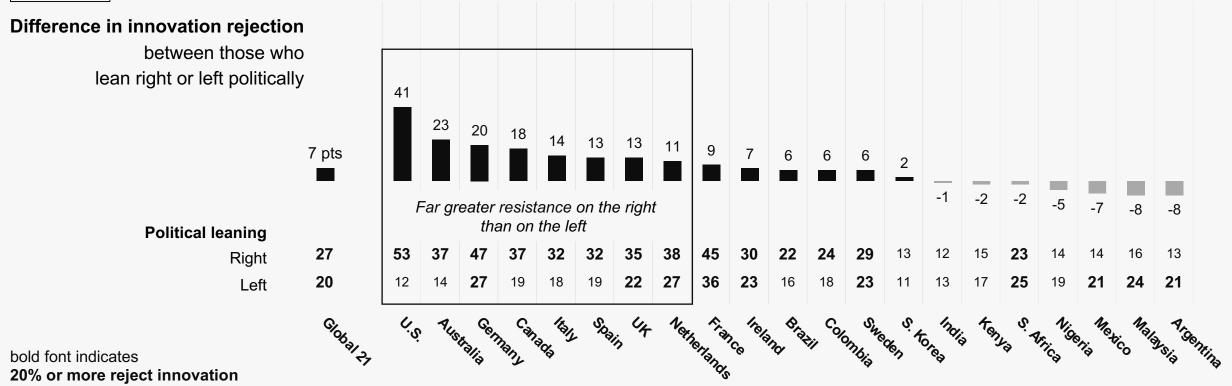

**2024 Edelman Trust Barometer.** CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; bottom 2 box, resistant or hesitant = reject; top 2 box, enthusiastic or passionate = embrace. General population, 28-mkt avg., by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

#### I reject this innovation I embrace this innovation Innovation is managed ... 61 well Green energy 51 15 poorly 38 26 well AI 43 26 poorly well 33 27 Gene-based medicine 25 41 poorly 55 15 well GMO foods 63 13 poorly

#### In Western Democracies, Resistance to Innovation Is Political

Percent of respondents who reject innovation, based on their individual average acceptance rating across green energy, AI, gene-based medicine, and GMO foods

GLOBAL 21

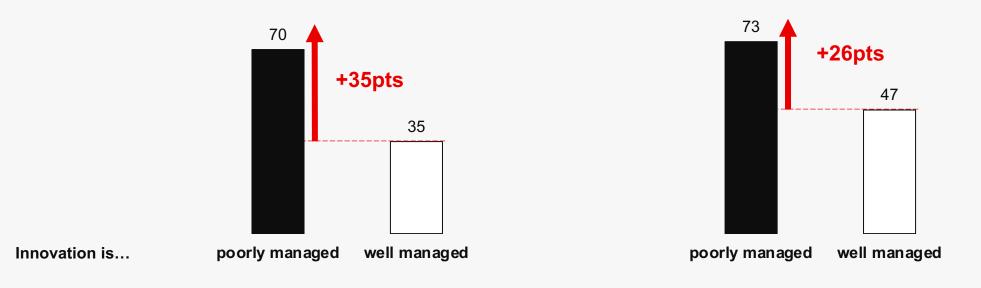

**2024 Edelman Trust Barometer.** CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; Data is showing the percent of respondents who, on average, rejected innovation when looking at the mean scores "acceptance ratings" for each of the four innovations, and the differences between those who lean left or right politically. Those that rejected innovation averaged a score between 1 and 2.49 on the 5-point scale. General population, 21-mkt avg., by political leaning. Political leaning is not asked in China, Saudi Arabia, Thailand or the UAE. Indonesia, Japan, and Singapore are excluded from the analysis due to having sample sizes too low to report (less than n100).

# When Institutions Mismanage Innovation, We Feel Both Technology and Society Are Leaving Us Behind

Percent who say, in Thailand

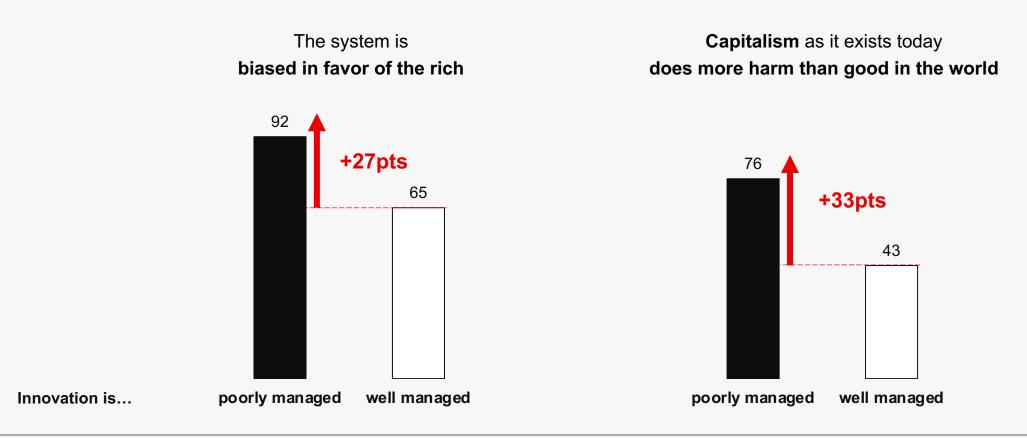

**Technology is changing too quickly,** in ways that are not good for people like me Our society is changing too quickly and not in ways that benefit people like me

2024 Edelman Trust Barometer. POP\_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. General population, Thailand, by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

# When Institutions Mismanage Innovation, Fairness and Capitalism in Question

Percent who say, in Thailand

**2024 Edelman Trust Barometer.** POP\_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. TMA\_SIE\_SHV. Please indicate how much you agree or disagree with the following statements. 9-point scale; top 4 box, agree. Attribute asked of half the sample. General population, Thailand, by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

# A Reset for Science in Society

World Healt

18 Organizati

11.11

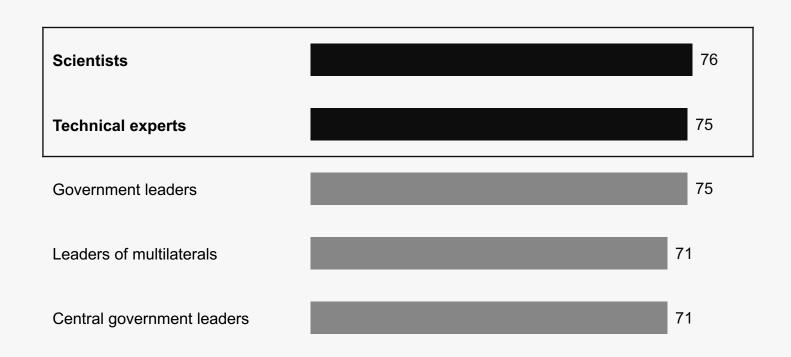

1831

# Scientists and Experts Expected to Lead on Implementation of Innovation

Percent who say, in Thailand

I believe each **should have a big role** in managing the introduction of innovation

Showing top 5 of 11 items

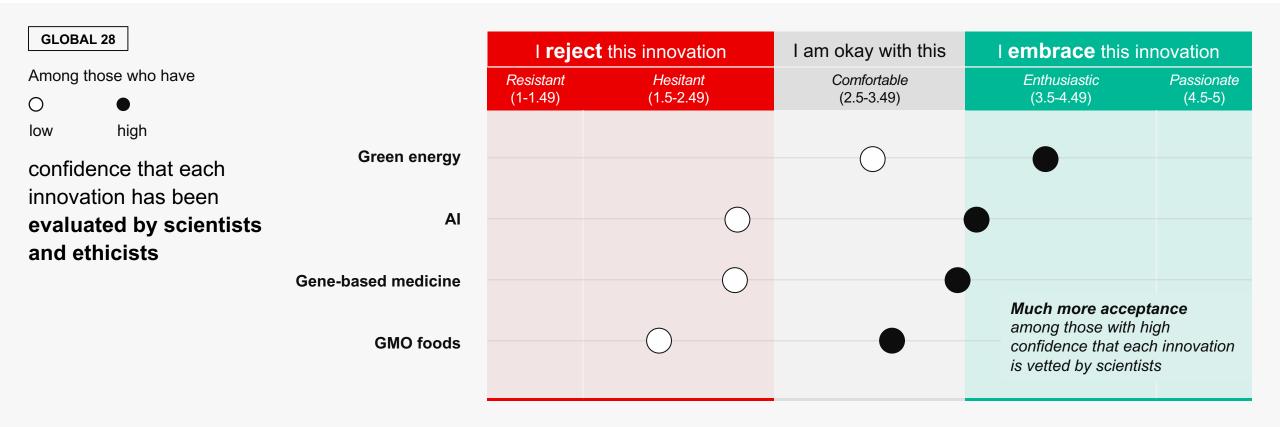

2024 Edelman Trust Barometer. RSP\_TEC\_CHG. How big a role do you feel each of the following should have in ensuring that the introduction of new technologies and innovations is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them)? 5-point scale; top 2 box, a big or huge role. Question asked of half the sample. General population, Thailand. Data is showing the top 5 roles, with ties broken by decimal.

# To Earn My Acceptance, Show Me the Innovation Is Vetted by Scientists and Ethicists

#### Average acceptance rating

for each innovation

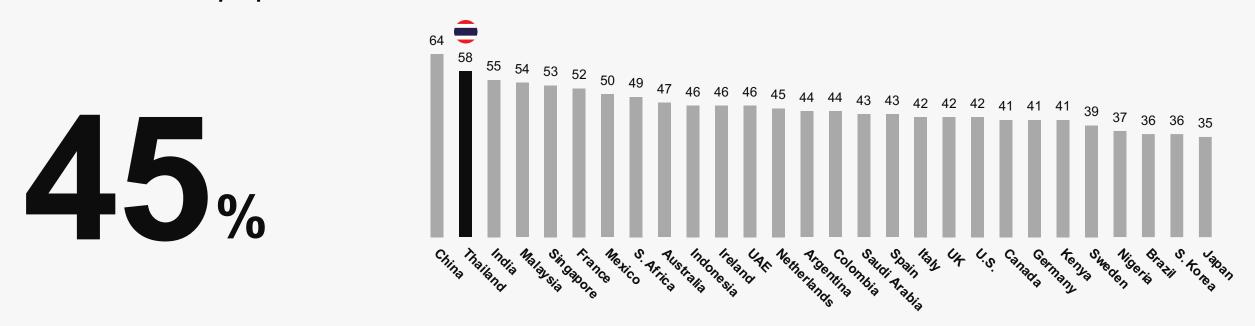

**2024 Edelman Trust Barometer.** TEC\_TST. How confident are you that these technologies have been adequately tested, evaluated, and assessed by scientists, ethicists, and other experts? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

#### Make the Science Transparent and Accessible to the Public

Percent who agree

GLOBAL 28

Scientists do not know how to communicate with people like me

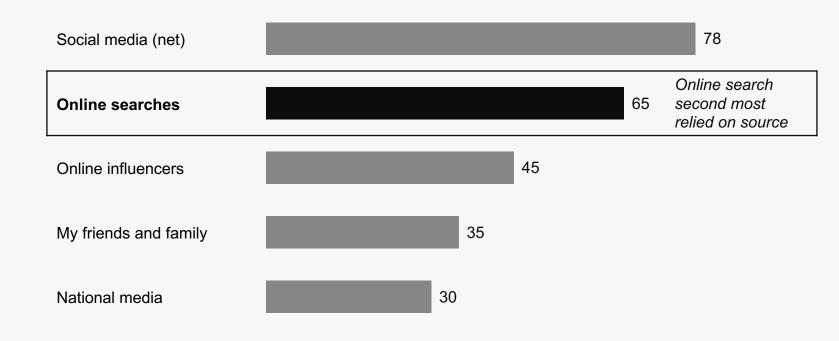

2024 Edelman Trust Barometer. CHG\_AGR. Please indicate how much you agree or disagree with the following statements. 9-point scale; top 4 box, agree. Question asked of half the sample. General population, 28-mkt avg.

# I'm Doing My Own Research: Help Me Find Information I Can Trust

Percent who say, in Thailand

This is where I get most of my information about new technologies and innovations

Showing top 5 of 9 items

2024 Edelman Trust Barometer. INO\_INF\_SRC. Where do you get most of your information and knowledge about new technologies and innovations from? Pick all that apply. Question asked of half the sample. General population, Thailand. "Social media" is a net of "My social media news feed" and "On social media posted by, or forwarded from, someone in my social network". Data is showing the top 5 sources, with ties broken by decimal.

#### To Be Trusted With Innovation, Give Me a Voice

Percent who say this is important to earning or keeping their trust in each institution to be good managers of change, in Thailand, showing the top 3 actions

#### Across institutions, listening is a top 3 trust-building action

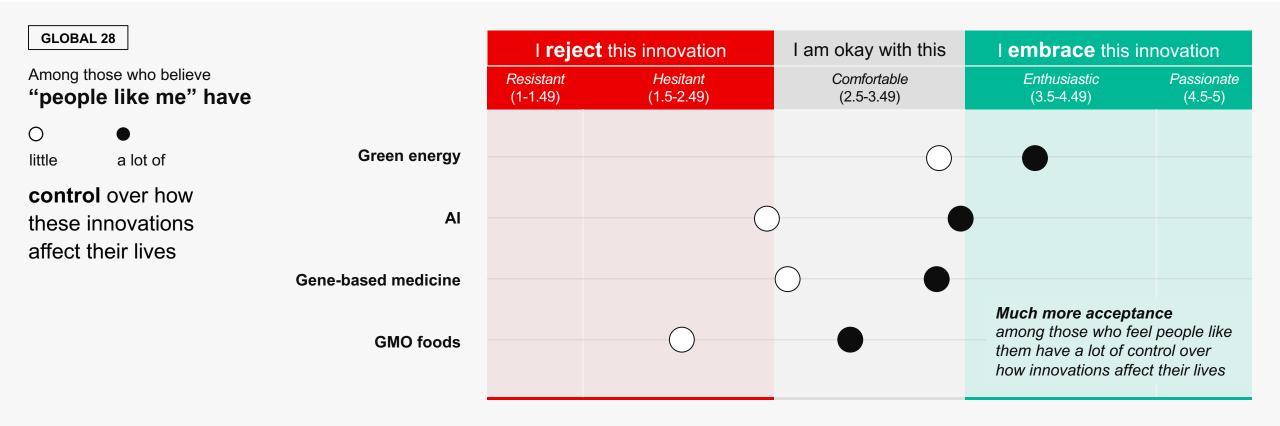

Business	%	NGOs	%	Government	%	Media	%
Hear our concerns, let us ask questions	84	Hear our concerns, let us ask questions	83	Hear our concerns, let us ask questions	83	Hear our concerns, let us ask questions	84
Ensure our future prosperity	84	Aid the vulnerable	81	Institute safeguards	82	Communicate pluses and minuses	84
Work with government to develop regulations	82	Communicate pluses and minuses	80	Ensure our future prosperity	82	Investigate innovations	83

2024 Edelman Trust Barometer. INS\_CHG\_PER. If [Institution] wants to earn or keep your trust in their being good stewards or managers of change, how important is it that they do each of the following in response to the technological and social changes taking place in your country today? 6-point scale; top 3 box, moderately or more important. Media and NGOs were only asked of half the sample. General population, Thailand. Data showing the top 3 trust-building actions, with ties broken by decimal.

# To Earn My Acceptance, Give Us Control Over the Impact of Innovations

#### Average acceptance rating

for each innovation

**2024 Edelman Trust Barometer.** TEC\_INF. How much influence or control do you feel people like you have over how these technologies are used in ways that might affect their lives? 5-point scale; top 2 box, a lot of control; bottom 2 box, a little control. Question asked of half the sample. CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of control. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

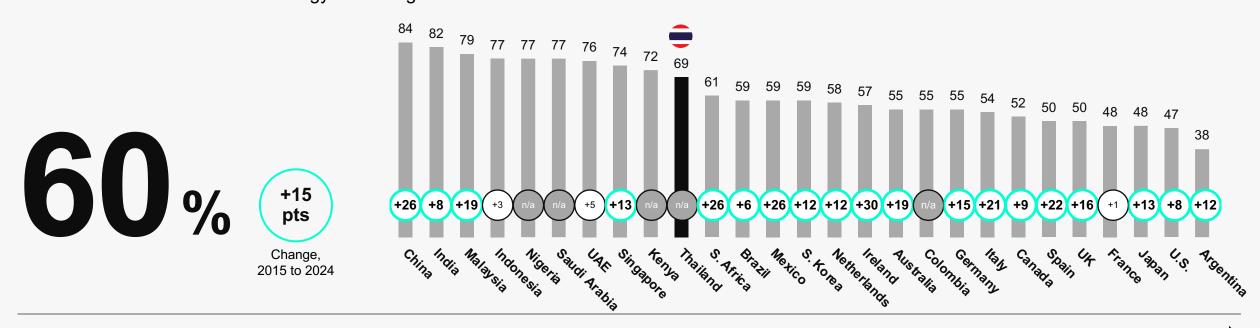

# **Restoring Trust in the Promise of Innovation**

### Over Past Decade, Demand for Business-Government Partnership on Innovation Surges

Percent who say

#### If business partners with government, I would trust it more with technology-led changes

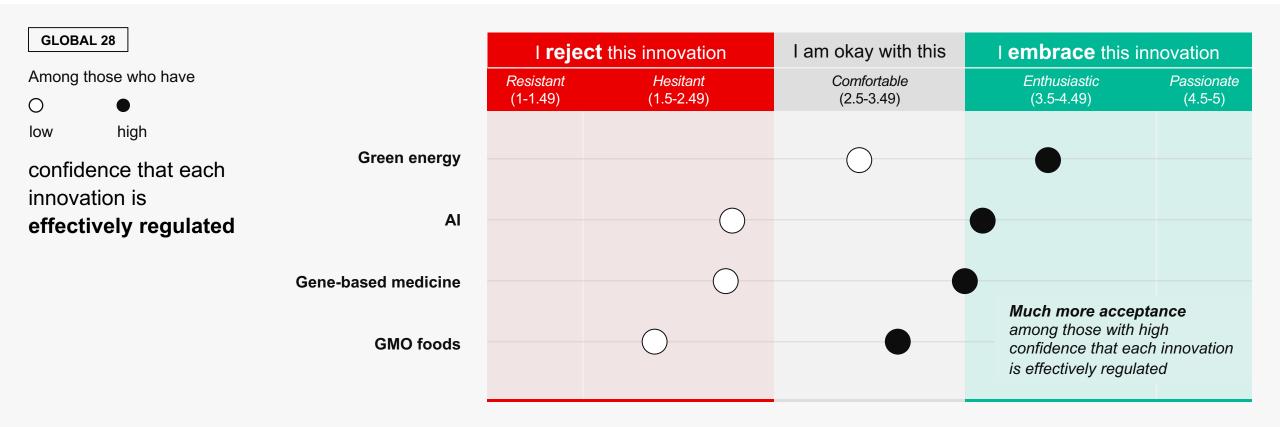

**2024 Edelman Trust Barometer.** INS\_PTN. Below are a number of actions that could impact your trust in business and industry to develop and implement technology-led changes. What impact would each of these actions have on your trust? 9-point scale, top 4 box, trust business and industry more. General population, 22-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# **Confidence in Effective Regulation Drives Adoption**

#### Average acceptance rating

for each innovation

**2024 Edelman Trust Barometer.** TEC\_SAF. How confident are you that each of the following is being effectively regulated? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

### **CEOs: Address Impacts of Innovation in Society**

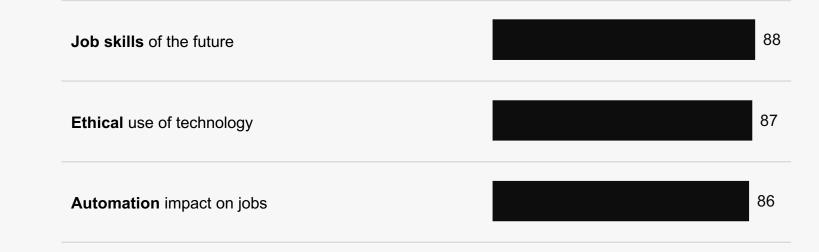

Percent who say, Thailand

65%

I expect CEOs to **manage changes occurring in society**, not just those occurring in their business

Among employees,

It is important to me that **my CEO speaks publicly** about issues such as:

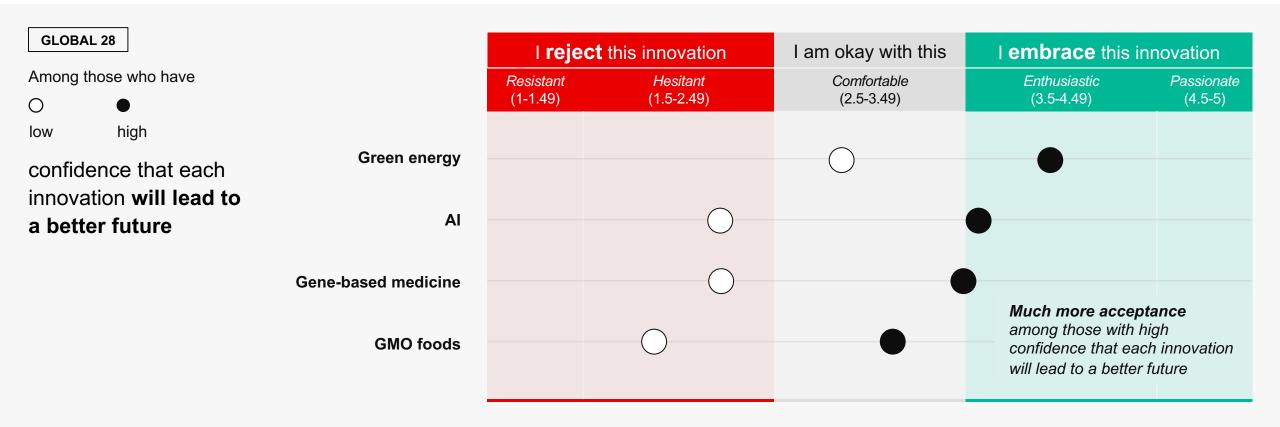

**2024 EdeIman Trust Barometer.** CRSP\_CHOICE. You are about to see two choices. We want you to choose the one that best describes your beliefs. Question asked of half the sample. CEO\_ISS. How important is it to you that the CEO or head of the organization you work for speaks out publicly about each of the following issues? 9-point scale; top 4 box, important. Question asked of those who are an employee of an organization (Q43/1). General population, Thailand.

# Show Me How Innovation Will Bring Us a Better Future

#### Average acceptance rating

for each innovation

**2024 Edelman Trust Barometer.** TEC\_FUT. How confident are you that these technologies will lead us to a better future? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG\_TEC\_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

# **Restoring Trust in the Promise of Innovation**

# Implementation as important as invention

Mismanaged innovations are as likely to ignite backlash as advance society. With breakthroughs like AI, vaccines, and green energy on the line, explaining the science and managing impacts is essential.

# Business must partner for change

Business is most trusted to introduce innovation into society, with an emphasis on partnering with government. CEOs need to safeguard jobs and take a stand on emerging ethical concerns.

# Science must integrate with society

Scientists are still trusted but increasingly subject to public scrutiny. To build trust in expert recommendations, explain the research, engage in dialogue, and harness peer voices as advocates.

# 4

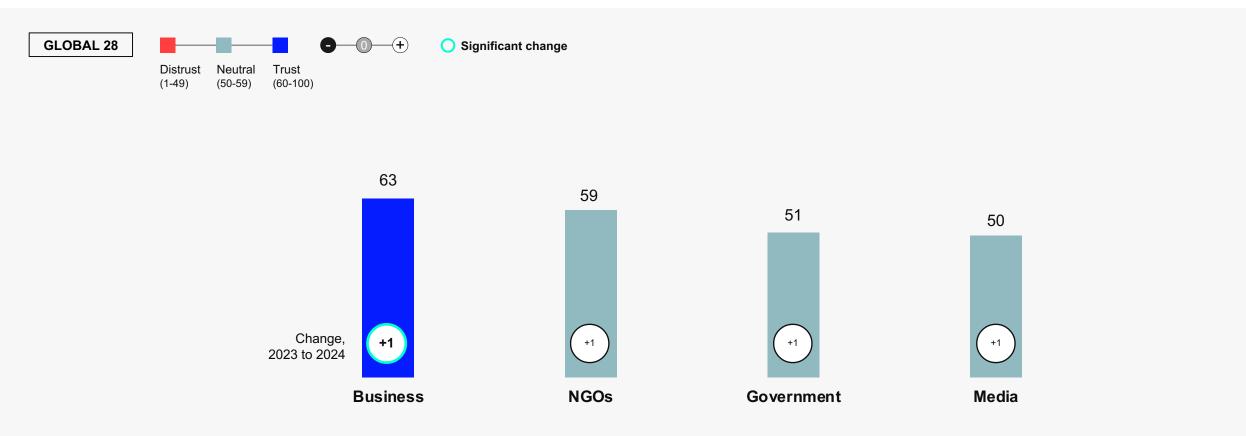

### Give me control over my future

When people feel in control over how innovations affect their lives, they are more likely to embrace them, not resist them. Listen for concerns, be open to questions.

# Supplemental Data

# **Business Remains Only Trusted Institution**

### Percent trust

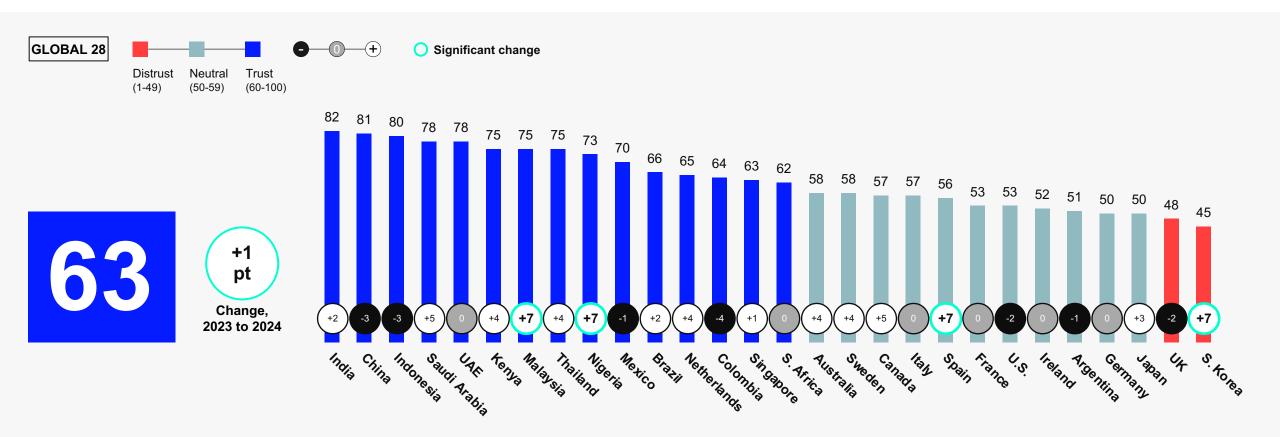

**2024 Edelman Trust Barometer.** TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 Trust Index has been imputed using a model. For more details, please see the Technical Appendix.

# **Business Trusted in 15 of 28 Countries**

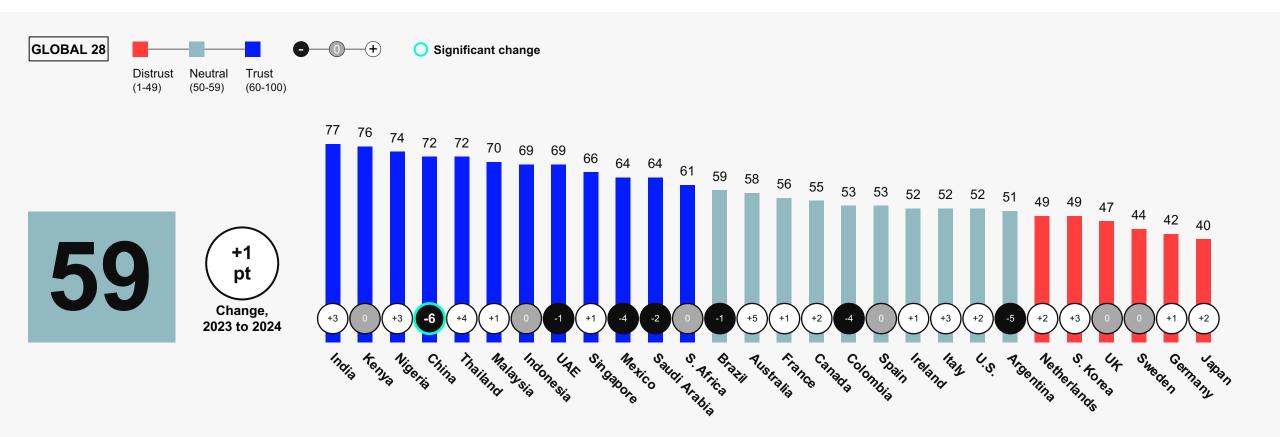

Percent trust in business

2024 Edelman Trust Barometer. TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# NGOs Trusted in 12 of 28 Countries

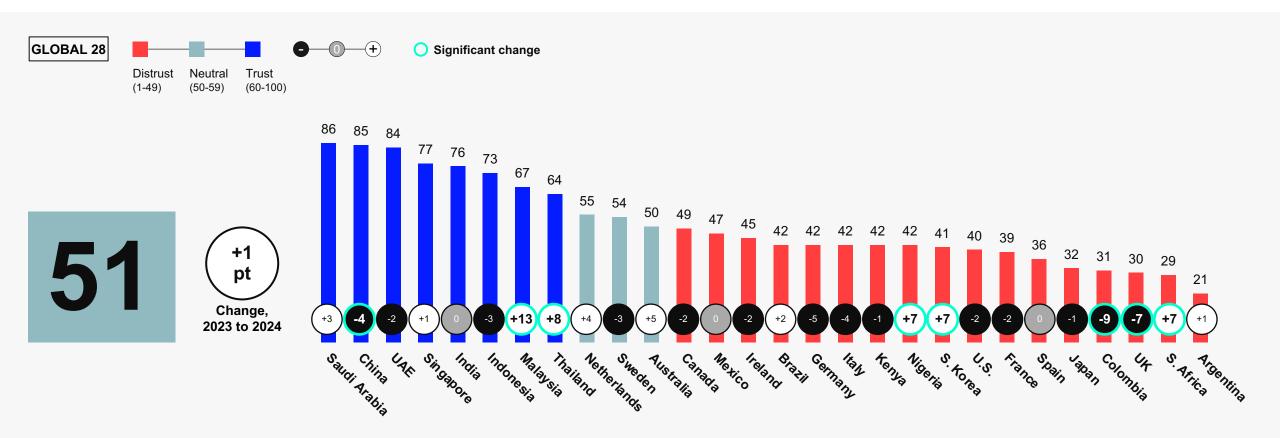

Percent trust in NGOs

2024 Edelman Trust Barometer. TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# **Government Distrusted in 17 of 28 Countries**

Percent trust in government

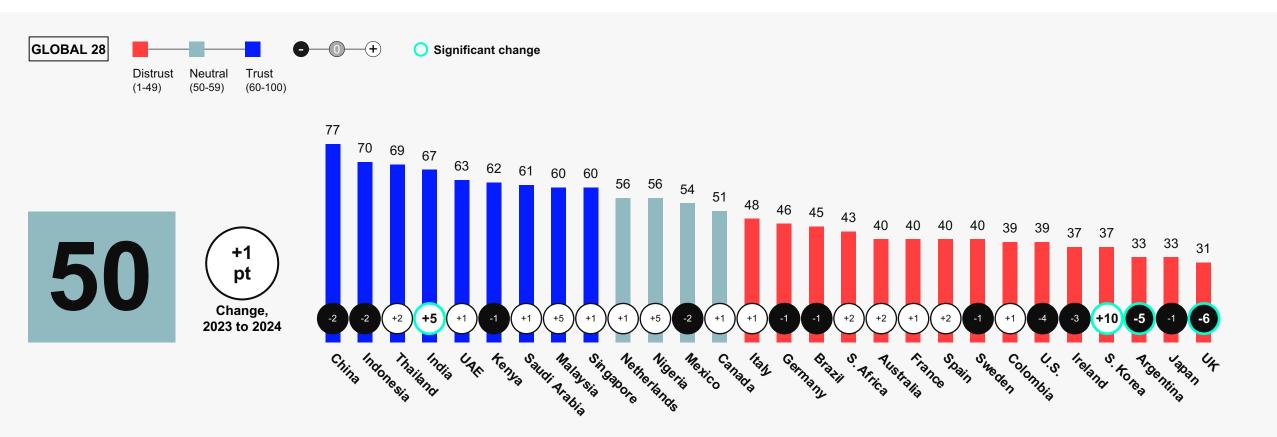

**2024 Edelman Trust Barometer.** TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 government in general data has been imputed using a model. For more details, please see the Technical Appendix.

# Media Distrusted in 15 of 28 Countries

Percent trust in media

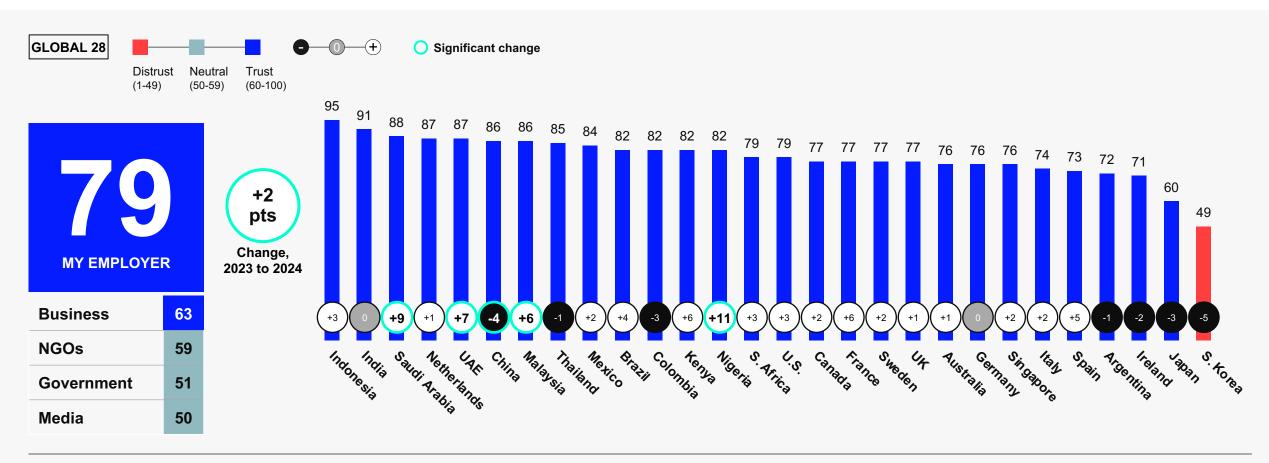

**2024 Edelman Trust Barometer.** TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

For S. Korea, the language used in 2023 for "media" translated to "press." In 2024 it was adjusted to translate as "media."

# My Employer Trusted in 27 of 28 Countries

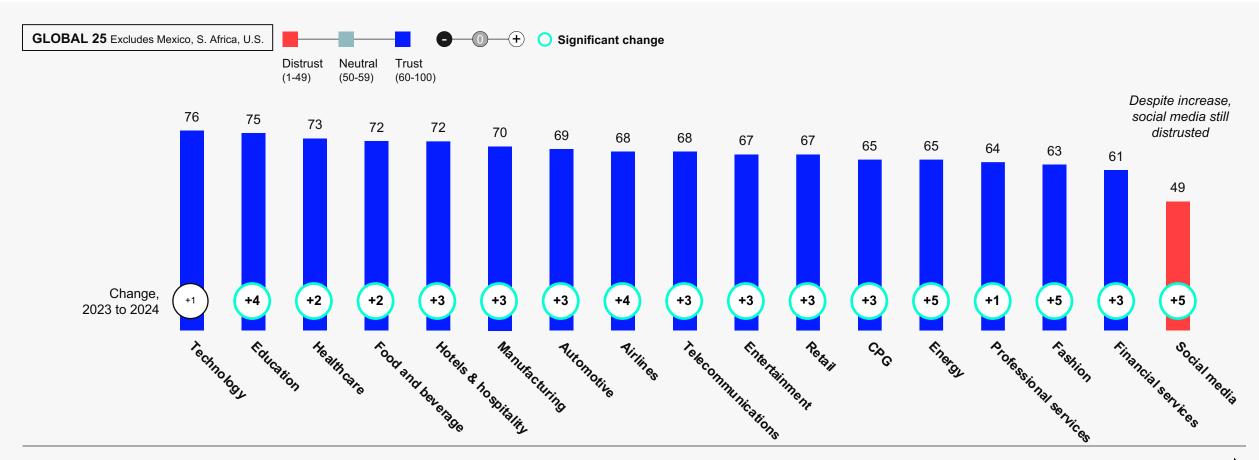

Percent trust

**2024 Edelman Trust Barometer.** TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. "Your employer" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# **Significant Trust Increases Across Most Industry Sectors**

Percent trust in businesses in the following industries to do what is right

**2024 Edelman Trust Barometer.** TRU\_IND. Please indicate how much you trust businesses in each of the following industries to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 25-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In S. Africa, the Afrikaans translation for "Food and beverage" was updated in 2024. In Mexico and the U.S., the Spanish translation for "Automotive" was updated in 2024. These language changes mean the 2024 data cannot compared to data from previous years and have been removed from this analysis for all sectors to ensure a consistent global average is shown for each.

# **Family-Owned Businesses Most Trusted**

Percent trust in each type of business to do what is right

**2024 Edelman Trust Barometer.** TRU\_ORG. Thinking about different types of businesses, please indicate how much you trust each type of business to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# **Family-Owned Business Most Trusted Type of Business**

Percent trust in each type of business to do what is right

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	10yr change

2024 Edelman Trust Barometer. TRU\_NAT. Now we would like to focus on global companies headquartered in specific markets. Please indicate how much you trust global companies headquartered in the following markets to do what is right. 9point scale; top 4 box, trust. Question asked of half the sample. General population, 21-mkt avg. Data excludes respondents from the country being rated. Ten-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# **Trust in People**

Percent trust to do what is right

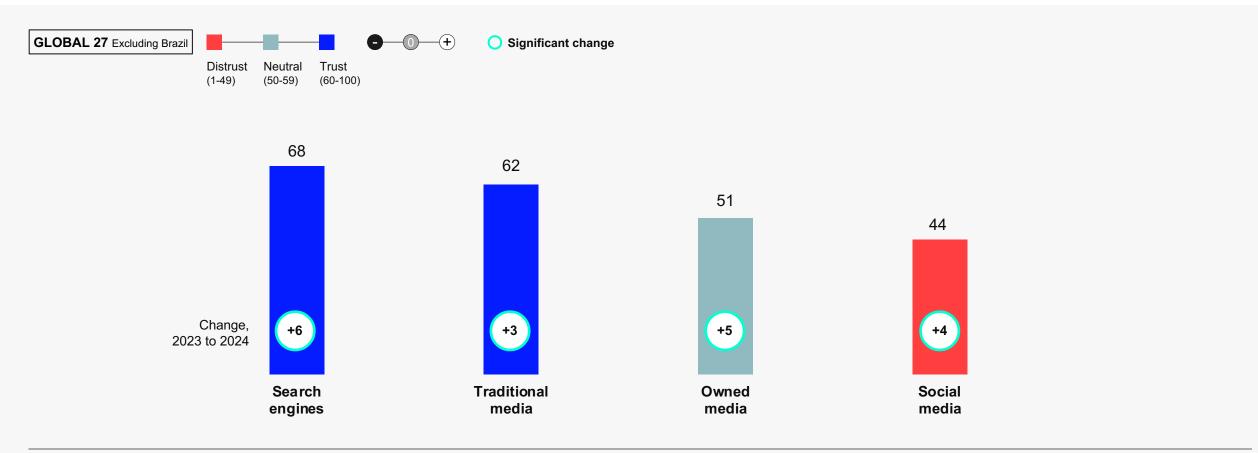

**2024 Edelman Trust Barometer.** TRU\_PEP. Below is a list of groups of people. For each one, please indicate how much you trust that group of people to do what is right. 9-point scale; top 4 box, trust. Attributes asked of half the sample. General population, 25-mkt avg. "My CEO" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Sweden, the Swedish translation for "Government leaders" was updated in 2024. In China and Singapore, the Chinese translation for "Journalists" was updated in 2024. These language changes mean the 2024 data cannot compared to data from previous years and have been removed from this analysis for all items to ensure a consistent global average is shown for each.

## **Trust in Media Sources**

Percent trust in each media source for general news and information

**2024 Edelman Trust Barometer.** COM\_MCL. When looking for general news and information, how much would you trust each type of source for general news and information? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 27-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Brazil, the translation for "Search engines" was updated in 2024. This language change mean the 2024 data cannot compared to data from previous years and has been removed from this analysis for all items to ensure a consistent global average is shown for each.

# **10-Year Trend: Trust in Media Sources**

Percent trust in each media source for general news and information

(60-100)

(50-59)

(1-49)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	10yr change
Search engines	63	63	64	65	61	65	62	56	59	61	66	+3*
Traditional media	63	58	59	58	64	66	62	54	58	58	62	-1
Owned media	45	44	48	45	41	49	47	41	44	44	49	+4*
Social media	44	46	45	42	40	43	40	35	36	38	41	-3*

**2024 Edelman Trust Barometer.** COM\_MCL. When looking for general news and information, how much would you trust each type of source for general news and information? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 21-mkt avg. Ten-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Brazil, the translation for "Search engines" was updated in 2024. This language change mean the 2024 data cannot compared to data from previous years and has been removed from this analysis for all items to ensure a consistent global average is shown for each.

# Fear of Innovation Becomes Political, by Innovation

Percent who reject each innovation

1. Data reported on slides is weighted to the same total base size to ensure each country has an equal effect on the global average. Some questions were asked of only half of the sample. Please refer to the footnotes on each slide for details.

2. The "global average" indicates the average result of all the countries where data was collected. As mentioned above, there has been no adjustment made to the population size relative to each country and the global average is not intended to suggest a total result of the entire global population.

3. Margin of error is calculated on the unweighted sample sizes collected, utilizing a 99% confidence interval.

4. There were additional quotas on ethnicity in the UK and U.S., and on nationality in Saudi Arabia and the UAE.

5. All data collected in China is from the mainland. Regions of Greater China were not surveyed.

### 2024 Edelman Trust Barometer: Sample

## **Countries Included in the Various Global Averages**

28 countries surveyed	Global 28 average	Global 26 Excludes China and Saudi Arabia	Global 25 Excludes China, S. Korea, and Thailand	Global 22
	Used for current year averages and tracking to 2023	Used for current year averages; excludes sensitive countries <sup>1</sup>	Used for current year averages; excludes sensitive countries <sup>1</sup> ; excludes S. Korea <sup>2</sup>	Used for tracking to 2014 and 2015
Argentina	Argentina	Argentina	Argentina	Argentina
Australia	Australia	Australia	Australia	Australia
Brazil	Brazil	Brazil	Brazil	Brazil
Canada	Canada	Canada	Canada	Canada
China	China			China

UK	UK	UK	UK	UK
U.S.	U.S.	U.S.	U.S.	U.S.

1. Because some of the content we ask is deemed politically sensitive there are several countries where we take special precautions in order to avoid putting our respondents, or ourselves, in a position to break any local laws. We work closely with our sample partner and its legal team to identify which questions, and in what countries, we should refrain from asking. The three countries where we removed questions and/or answer options were China, Saudi Arabia, and Thailand.

2. Due to a translation inconsistency regarding the measure of competence in the four main institutions in S. Korea, the data was removed from the global average on the affected slide.

### 2024 Edelman Trust Barometer: Sample

# **Survey Languages Used and Internet Penetration by Country**

	Languages	Internet Penetration*		Languages	Internet Penetration*		Languages	Internet Penetration*
Global	-	-	Indonesia	Indonesian	76%	Singapore	Localized English, Simplified Chinese	92%
Argentina	Localized Spanish	91%	Ireland	Localized English	89%	S. Africa	Localized English, Afrikaans	63%
Australia	Localized English	89%	Italy	Italian	91%	S. Korea	Korean	97%
Brazil	Portuguese	83%	Kenya	Localized English	84%	Spain	Spanish	92%

India	Localized English, Hindi	60%	Saudi Arabia	Localized English, Arabic	89%			

\*Data source: https://www.internetworldstats.com/stats.htm as of Jan 11, 2024

Due to disproportionate access to internet in countries with lower internet penetration, the online sample in those countries tends to skew younger, urban, and more affluent.

## Data Analysis Explained: French Data Model

In 2021, the translation of "government in general" in the French questionnaire was incorrectly changed to "authorities in general," affecting data in all studies conducted in France from 2021 to 2023. When we discovered the inconsistency in early 2023, we suppressed all affected data while investigating the possibility of modeling and replacing the missing data.

Over the course of 2023, we built a data model that could reliably predict what the France data would have been if the translation were consistent. This involved identifying items (shown in the list on the right) that are predictive of trust in government in other Western democracies and testing whether they had similar predictive power in France.

To build a model with a sufficient level of accuracy, we iterated through 5,000 different randomly split samples, controlling for gender, income, age, and other demographics, of France data collected in the 2024 Edelman Trust Barometer and in the 2023 Special Report: Trust and Climate Change. In both surveys, we used the accurate translation for trust in "government in general," along with the predictor variables. In both surveys, we also included the trust in "authorities in general" attribute for our French respondents. This allowed us to include the mistranslated variable in our model as one of the predictors for trust in government.

For each split sample, 75% of the sample was used to train the data, and the remaining 25% was used as a test group. Using a random forest classification model, we were able to accurately classify 89.41% of respondents as trusters or non-trusters, which gave us the confidence to repopulate the data in affected reports with data from our predictive model.

The modeled data was applied to the France data from each impacted year (2021, 2022, and 2023) to predict the overall level of trust in government in general. The Trust Index for those years has also been updated, given that trust in government is part of that calculation.

Predictors	Question text
	<b>TRU_INS:</b> Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you "do not trust them at all" and nine means that you "trust them a great deal".
Trust in institutions	Media in general
	Business in general
	Non-governmental organizations (NGOs)
	Authorities in general
Economic optimism	<b>CNG_FUT:</b> Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years' time?
Government	TRU_3D_GOV: To what extent do you agree with the following statement?
competence	Government in general is good at what it does
Fears of gig-	<b>POP_EMO:</b> Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following?
economy	Permanent jobs with benefits being replaced by freelance, gig-economy or short-term jobs that do not offer benefits
	<b>GOV_PER_DIM:</b> In thinking about why you do or do not trust government in general, please specify where you think it falls on the scale between the two opposing descriptions.
Government	Highly effective agent of positive change
ethics dimensions	Honest and fair
	Has a vision for the future that I believe in
	Serves the interests of everyone equally and fairly

## Data Analysis Explained: Innovation Management Scale

The Innovation Management scale was created by averaging respondents' answers to five attributes measured on 9-point scales, shown in the table to the right.

- Respondents who believe that innovation is well managed were those that scored between 1 – 4.49 on the Innovation Management Scale, meaning on average they disagreed with these statements.
- Respondents who scored between 4.5 5.49 on the scale were classified as neutral.
- Respondents who believe that innovation is poorly managed scored between 5.5 – 9 on the Innovation Management Scale, meaning on average they agreed with these statements.

The specific items in the scale were chosen for their ability to represent three dimensions of innovation management and development:

- **Trust in institutions** to manage the introduction of new technologies and innovations
- Government's ability to regulate emerging technologies effectively
- Outside influence on science, in terms of how it's conducted

Items	Question text
Trust in business and	<b>TRU_INS_TCNG.</b> Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are <u>safe</u> , <u>understood</u> by the public, <u>beneficial</u> to society as a whole, and <u>accessible</u> to the people who need them). – <i>reverse scored</i>
NGOs	Business in general
	Non-governmental organizations (NGOs)
Government	<b>POP_MDC.</b> Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true".
regulation	The people in government in charge of regulating technology do not have an adequate understanding of emerging technologies to be able to regulate them effectively
Science	<b>CHG_AGR.</b> Please indicate how much you agree or disagree with the following statements.
influenced by politics and	Science has become politicized in this country
money	Government and other large organizations that fund research have too much influence on how science in this country is done

### Data Analysis Explained:

# **Classifying Respondents as Generally Resistant to Innovations**

Respondents were asked to characterize their feelings about each of the four innovations (shown below) using the scale to the right.

To classify respondents as resistant to innovations, we calculated an average score across the four innovations. If a respondent's average score was less than 2.5 (rounded to a 1 or 2), they were classified as rejecting of innovation.

#### Innovations

The growing use of **artificial intelligence** such as machine learning, natural language processing, and generative Al

The growing use of **green energy** such as biofuels and renewable natural gas, liquid hydrogen, and wind and solar power

The growing use of **genetically modified foods** (foods that are derived from genetically modified organisms, commonly referred to as GMOs) such as drought-, pest-, and disease-resistant crops, faster-growing fish, and produce that has a longer shelf life

The growing use of **gene-based medical technologies** such as mRNA vaccines, gene splicing, and gene therapy

#### Scale points

- **1. Resistant**: I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.
- **2. Hesitant**: I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.
- **3. Comfortable**: I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.
- 4. Enthusiastic: I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.
- 5. **Passionate**: I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.

## Data Analysis Explained: Average Acceptance Rating

Respondents were asked to separately rate four technologies (green energy, artificial intelligence, gene-based medicine, and GMO foods, as shown on the previous Tech Appendix slide) on a 5-point scale, ranging from Resistant to Passionate (see full scale to the right). We calculated overall levels of acceptance across the population by taking the average scale point selected.

Segments of the population were classified as one of the five categories, based on the cut points in the table to the far right.

- If the average of an audience segment fell between 1-2.49, they were classified as "rejecting" the innovation.
- Audience segments with an average score of 3.5-5 were classified as "embracing" the innovation.

This method of calculating an average acceptance rating was applied to different audiences throughout the report.

Segment category	Range
<b>Resistant</b> : I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.	1-1.49
<b>Hesitant</b> : I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.	1.5-2.49
<b>Comfortable</b> : I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.	2.5-3.49
<b>Enthusiastic</b> : I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.	3.5-4.49
<b>Passionate</b> : I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.	4.5-5
Don't know / not sure	

### Data Analysis Explained:

# How We Plotted the Institutional Competence and Ethics Scores

We define trust as the combination of competence and ethics. The report features a chart depicting how competent and ethical each of the institution are rated to be. Here's how we calculated each score.

The competence score (the x-axis of the plot): An institution's competence score is a net of the top 3 box (AGREE) minus the bottom 3 box (DISAGREE) responses to the question "To what extent do you agree with the following statement? *[INSTITUTION] in general is good at what it does*". The resulting net score was then subtracted by 50, which means that for an institution to qualify as competent, it would require a net difference of 51 points or more in its percentage of top 3-box ratings versus its bottom 3-box ratings. This ensures that an institution could not be considered competent unless there is a majority who rate it as such.

**The net ethical score (the y-axis of the plot):** The ethics dimension is defined by four separate items. For each item, a net score was calculated by taking the top 5 box percentage representing a positive ethical perception minus the bottom 5 box percentage representing a negative ethical perception. The y-axis value is an average across those 4 net scores. Scores higher than zero indicate an institution that is perceived as ethical.

#### **Respondents were asked:**

In thinking about why you do or do not trust [INSTITUTION], please specify where you think they fall on the scale between the two opposing descriptions. (Please use the slider to indicate where you think [INSTITUTION] falls between the two extreme end points of each scale.)

Dimension	Ethical Perception	Unethical Perception
Purpose-Driven	Highly effective agents of positive change	Completely ineffective agents of positive change
Honest	Honest and fair	Corrupt and biased
Vision	Have a vision for the future that I believe in	Do not have a vision for the future that I believe in
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people

# Full Question Text

2024 Edelman Trust Barometer: Full Text For Answer Choices Abbreviated

## **Dispersion of Authority: Peers on Par With Scientists**

TRU\_PEP\_TCNG. Below is a list of categories of people. For each one, please indicate how much you trust that person or group of people to tell you the truth about new innovations and technologies. (Please select one response for each.)

Shortened	Full	
NGO representatives	A representative of a non-profit organization or NGO	
Scientists	Scientists or technical experts in general	
Company technical expert	A scientist or technical expert working for a company that is helping to develop the new innovation or technology	

2024 Edelman Trust Barometer: Full Text For Answer Choices Abbreviated

## **Economic Fears Persist as Societal Concerns Rise**

POP\_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? Please indicate your answer using a nine-point scale where one means "I do not worry about this at all" and nine means "I am extremely worried about this". (Please select one response for each.)

Shortened	Full	
Job loss (net)	Automation and/or other innovations taking your job away Your job being moved to other countries where workers are paid less Cheaper foreign competitors driving companies like yours out of business Not having the training and skills necessary to get a good paying job International conflicts about trade policies and tariffs hurting the company you work for Losing your job as a result of a looming recession Permanent jobs with benefits being replaced by freelance, gig-economy, or short-term jobs that do not offer benefits	
Inflation	Your pay increases not keeping up with the inflation rate causing you to lose ground financially	
Climate change	Climate change leading to drought, rising sea levels and other natural disasters	
Hackers	Hackers, cyber-attacks and cyber-terrorism	
Nuclear war	International conflicts escalating into nuclear war	
Information war	Other countries waging an information war against us by purposefully contaminating our media with falsehoods and publishing things meant to inflame our differences	

# Trust in Industry Sectors Does Not Guarantee Trust in Industry Innovations

TEC\_TRU. How much do you trust each of these technologies? (Please select one response for each.)

Shortened	Full
Artificial intelligence	Artificial intelligence such as machine learning, natural language processing, and generative AI
Genetically modified foods	Genetically modified foods (foods that are derived from genetically modified organisms, commonly referred to as GMOs) such as drought-, pest-, and disease-resistant crops, faster-growing fish, and produce that has a longer shelf life
Green energy	Green energy such as biofuels and renewable natural gas, liquid hydrogen, and wind and solar power
Gene-based medicine	Gene-based medical technologies such as mRNA vaccines, gene splicing, and gene therapy

# Acceptance of Innovation at Stake

CHG\_TEC\_COM. How would you characterize your feelings about each of the following?

Shortened	Full
I reject this innovation	Resistant: I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same
	Hesitant: I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.
I embrace this innovation	Enthusiastic: I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.
	Passionate: I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.
Green energy	The growing use of green energy such as biofuels and renewable natural gas, liquid hydrogen, and wind and solar power
AI	The growing use of artificial intelligence such as machine learning, natural language processing, and generative AI
Gene-based medicine	The growing use of gene-based medical technologies such as mRNA vaccines, gene splicing, and gene therapy
GMO foods	The growing use of genetically modified foods (foods that are derived from genetically modified organisms, commonly referred to as GMOs) such as drought-, pest-, and disease-resistant crops, faster-growing fish, and produce that has a longer shelf life

## **Government Lacks Competence to Regulate Emerging Innovations**

Shortened	Full
Government regulators lack adequate understanding of emerging technologies to regulate them effectively	The people in government in charge of regulating technology do not have an adequate understanding of emerging technologies to be able to regulate them effectively

## Nearly 2x More Likely to Fear Innovation Poorly Managed

TRU\_INS\_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them). (Please select one response for each.)

Shortened	Full
Do I trust how business and NGOs introduce innovations into society?	Business in general Non-governmental organizations

# Nearly 2x More Likely to Fear Innovation Poorly Managed

Shortened	Full
Can government regulate new technologies?	The people in government in charge of regulating technology do not have an adequate understanding of emerging technologies to be able to regulate them effectively

## Nearly 2x More Likely to Fear Innovation Poorly Managed

CHG\_AGR. Please indicate how much you agree or disagree with the following statements. (Please select one response for each.)

Shortened	Full
Is science independent of politics and money?	Science has become politicized in this country. Government and other large organizations that fund research have to much influence on how science in this country is done.

# When Institutions Mismanage Innovation, We Feel Both Technology and Society Are Leaving Us Behind

Shortened	Full
Technology is changing too quickly, in ways that are not good for people like me	Technological innovations are happening too quickly and are leading to changes that are not good for people like me

## When Institutions Mismanage Innovation, Fairness and Capitalism in Question

Shortened	Full
The system is biased in favor of the rich	The system is biased against regular people and in favor of the rich and powerful

## Scientists and Experts Expected to Lead on Implementation of Innovation

RSP\_TEC\_CHG. How big a role do you feel each of the following should have in ensuring that the introduction of new technologies and innovations is wellmanaged (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them)? (Please select one response for each.)

Shortened	Full
Leaders of multilaterals	The leaders of global or multinational organizations like the United Nations
Central government leaders	Central / federal government leaders

## To Earn My Acceptance, Show Me the Innovation Is Vetted by Scientists and Ethicists

TEC\_TST. How confident are you that these technologies have been adequately tested, evaluated, and assessed by scientists, ethicists, and other experts? (Please select one response for each.)

Shortened	Full
Confidence that each innovation has been evaluated by scientists and ethicists	How confident are you that these technologies have been adequately tested, evaluated, and assessed by scientists, ethicists, and other experts?

## I'm Doing My Own Research: Help Me Find Information I Can Trust

INO\_INF\_SRC. Where do you get most of your information and knowledge about new technologies and innovations from?

Shortened	Full
Social media (net)	My social media news feed On social media posted by, or forwarded from, someone in my social network
Online influencers	On social media posted by an influencer or expert I follow
My friends and family	In conversations with my friends and family
National media	National newspapers or national TV or radio news programs

## To Be Trusted With Innovation, Give Me a Voice

[INS]\_CHG\_PER. If [institution] wants to earn or keep your trust in their being good stewards or managers of change, how important is it that they do each of the following in response to the technological and social changes taking place in your country today? (Please select one response for each.)

Shortened	Full
Hear our concerns, let us ask questions	Give people the opportunity to ask questions and to have their concerns heard when it comes to change and innovation
Communicate pluses and minuses	Clearly communicate the nature of new innovations and technologies, including potential benefits and negative side effects
Ensure our future prosperity	Push our country to make the changes necessary to ensure our future prosperity
Investigate innovations	Do investigative reporting on new technologies and innovations to uncover any hidden issues or dangers
Work with government to develop regulations	Work with government to institute safeguards and security measures and to develop appropriate regulations
Institute safeguards	Institute safeguards to protect us from potential harm or exploitation by new technologies developed in other countries
Aid the vulnerable	Aid those who need help coping with the consequences of change

## **CEOs: Address Impacts of Innovation in Society**

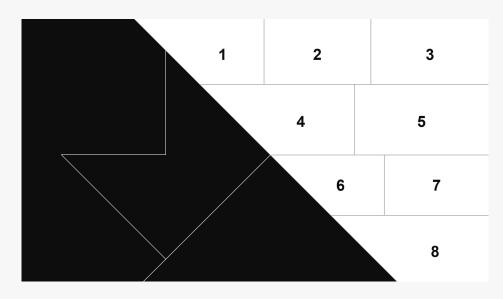

CEO\_RSP\_CHOICE. You are about to see two choices. We want you to choose the one that best describes your beliefs. (Please select only one of the two options given.)

Shortened	Full
I expect CEOs to manage changes occurring in society, not just those occurring in their business	I expect CEOs to work to manage changes that are occurring in society in addition to those occurring within their organizations or that are directly related to their products and services

## **CEOs: Address Impacts of Innovation in Society**

CEO\_ISS. How important is it to you that the CEO or head of the organization you work for speaks out publicly about each of the following issues? Please indicate your answer using the following 9-point scale where one means "not at all important" and nine means "very important" (Please select only one response for each.)

Shortened	Full
Job skills of the future	Training, education, and job skills of the future
Ethical use of technology	The ethical use of technology
Automation impact on jobs	Technology and automation and their impact on jobs
