

# 2023 Edelman Trust Barometer

Special Report:  
Trust and Health in the UK

# 2023 Edelman Trust Barometer Special Report: Trust and Health

Methodology

## Annual online survey in its 2nd year

Fieldwork conducted: Mar 2 – Mar 13, 2023

Brazil	China	Germany	Japan	*Nigeria	S. Korea
Canada	France	India	Mexico	S. Africa	 UK
					U.S.

\*\*The sample size varies by country from 805 to 1,002.  
12-market global data margin of error: General population +/- 1.1 percentage points (n=12,785)  
Country-specific data margin of error: General population +/- 4.1 to 4.6 percentage points (varies by country based on sample size, n=805 to n=1,002)  
Margin of error is calculated at the 99% confidence level

### Global averages

These vary based on the number of countries surveyed each year:

GLOBAL 12

\*Nigeria will not be included in the average until the respondent sample composition stabilizes year over year

GLOBAL 11 Excludes China

The sensitive nature of the question prevented this data from being collected in China

### Statistical significance

 Significant change

All indicated year-over-year significant changes were determined using a t-test set at a 99%+ confidence level

For more details on global averages and country-specific methodology, please refer to the Technical Appendix

# The Shifting Landscape of Health

## Economic Fears

Inflation tops the list of societal factors that are negatively affecting people's health. Cost and lack of affordability have also increased as the greatest barriers to better health.

## Polarization and its Drivers

A sense of the system being unfair, distrust in media, and societal fears were all top drivers of polarization in the January 2023 Trust Barometer. The present report shows similar factors also lead to a lack of confidence in the health system.

## The Dispersion of Authority

While medical professionals, national authorities, and health experts are still seen as trusted health information sources, friends and family have surged in influence.

## Trust and the Empowered Patient

People are more engaged with health information and comparing findings across sources, and they want care that treats them like an equal partner.

# Economic Fears Create Health Crisis

# Health Inequality: Low Income Far Less Likely to Report Good Health

Percent who say, in the UK

My overall health is **very good or better**

*Low-income people 24pts less likely than high income to report very good health*

# Inflation Tops List of Societal Factors Making Us Sick

Percent who say

This issue **negatively impacts** my health (net\*\*)

 2023 Edelman Trust Barometer Special Report: Trust and Health. SOC\_HEA. For each of the following, please indicate whether it has in some way negatively impacted your personal mental or physical health, the health of your relationships, and/or the livability of your community. Select all that apply for each. General population, 12-mkt avg. \*\*Data shown is a net of codes 1-4; physical health, mental health, health of my relationships, livability of my community. \*Nigeria is not included in the global average.

# It's Now Much Harder to Take Care of My Health

Percent who say

GLOBAL 9  Significant change

There is a **gap between how well I am taking care of my health vs how well I should be**

2023 Edelman Trust Barometer Special Report: Trust and Health. HEA\_GAP. Which of the following best describes the size of the gap between how well you currently are taking care of your health and how well you should ideally be taking care of your health? 5-point scale; code 2, slight gap; top 3 box, moderate/large/extremely large gap. General population, 9-mkt avg and UK. Data shown is rebased to exclude those who selected "prefer not to answer." Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# Biggest Barriers to Better Health: Cost and Information

Among the 85% in the UK who say there is a gap between how well they are currently taking care of their health vs how well they should be, percent who say

Significant change

This plays a **large/very large** role in keeping me from taking better care of my health

2023 Edelman Trust Barometer Special Report: Trust and Health. HEA\_BAR. How big a role does each of the following have in keeping you from closing the gap between how well you currently are taking care of your health and how well you should ideally be taking care of your health? 5-point scale; top 2 box, large role. Question asked of those who said there is a slight or larger gap (HEA\_GAP/2-5). General population, UK, and by income. “Cost” is a net of attributes 1-3; “Information” is a net of attributes 4-6. Data shown on slide is rebased to exclude those who selected “prefer not to answer.” Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# Health Now Bigger Than Healthcare

# My Health Is More Than My Physical Health

Percent who say, in the UK

When I think about being “healthy,” I think about...

Net dimensions:		
Mental health	88%	<ul style="list-style-type: none"><li>Feeling happy</li><li>Can manage negative emotions</li></ul>
Physical health	88%	<ul style="list-style-type: none"><li>Can do important activities</li><li>No sickness or injury</li><li>Can manage my physical health</li></ul>
Social health	75%	<ul style="list-style-type: none"><li>Have a person I can speak freely to</li><li>People care about me</li><li>Not discriminated against</li></ul>
Community livability	69%	<ul style="list-style-type: none"><li>Clean, safe, peaceful community</li><li>Healthy planet</li></ul>

57%

say all four components are dimensions of my “health”

Only 3% say being healthy is just about physical health

2023 Edelman Trust Barometer Special Report: Trust and Health. HEA\_DEF. Think about what being healthy means to you. For each of the following, please indicate how big a consideration it is in whether you see yourself as being healthy. 3-pt scale; code 3, major consideration. General population, UK. “Mental health” is a net of codes 4-8; “physical health” is a net of codes 1-3; “social health” is a net of codes 9-12; “community livability” is a net of codes 13-15. The four-component score consists of respondents who selected at least one attribute from each of the four health dimensions. The exclusive physical health score is comprised of respondents who only selected one or more attributes in the physical health dimension and did not select attributes in any of the other three dimensions.

# Beyond the Healthcare System: All Institutions Have a Role to Keep Us Healthy

Percent who say, in the UK

I expect each to **play a meaningful role** in making sure I am as healthy as possible

*Significant expectations for business, media and NGOs to play a role in keeping people healthy*

# Businesses Across Sectors Must Play a Meaningful Role in Health, Especially for Age 18-34

Percent who say, in the UK

I expect each type of company to **play a meaningful role** in making sure I am as healthy as possible

# In the UK, No Institution Seen as Doing Well on Health

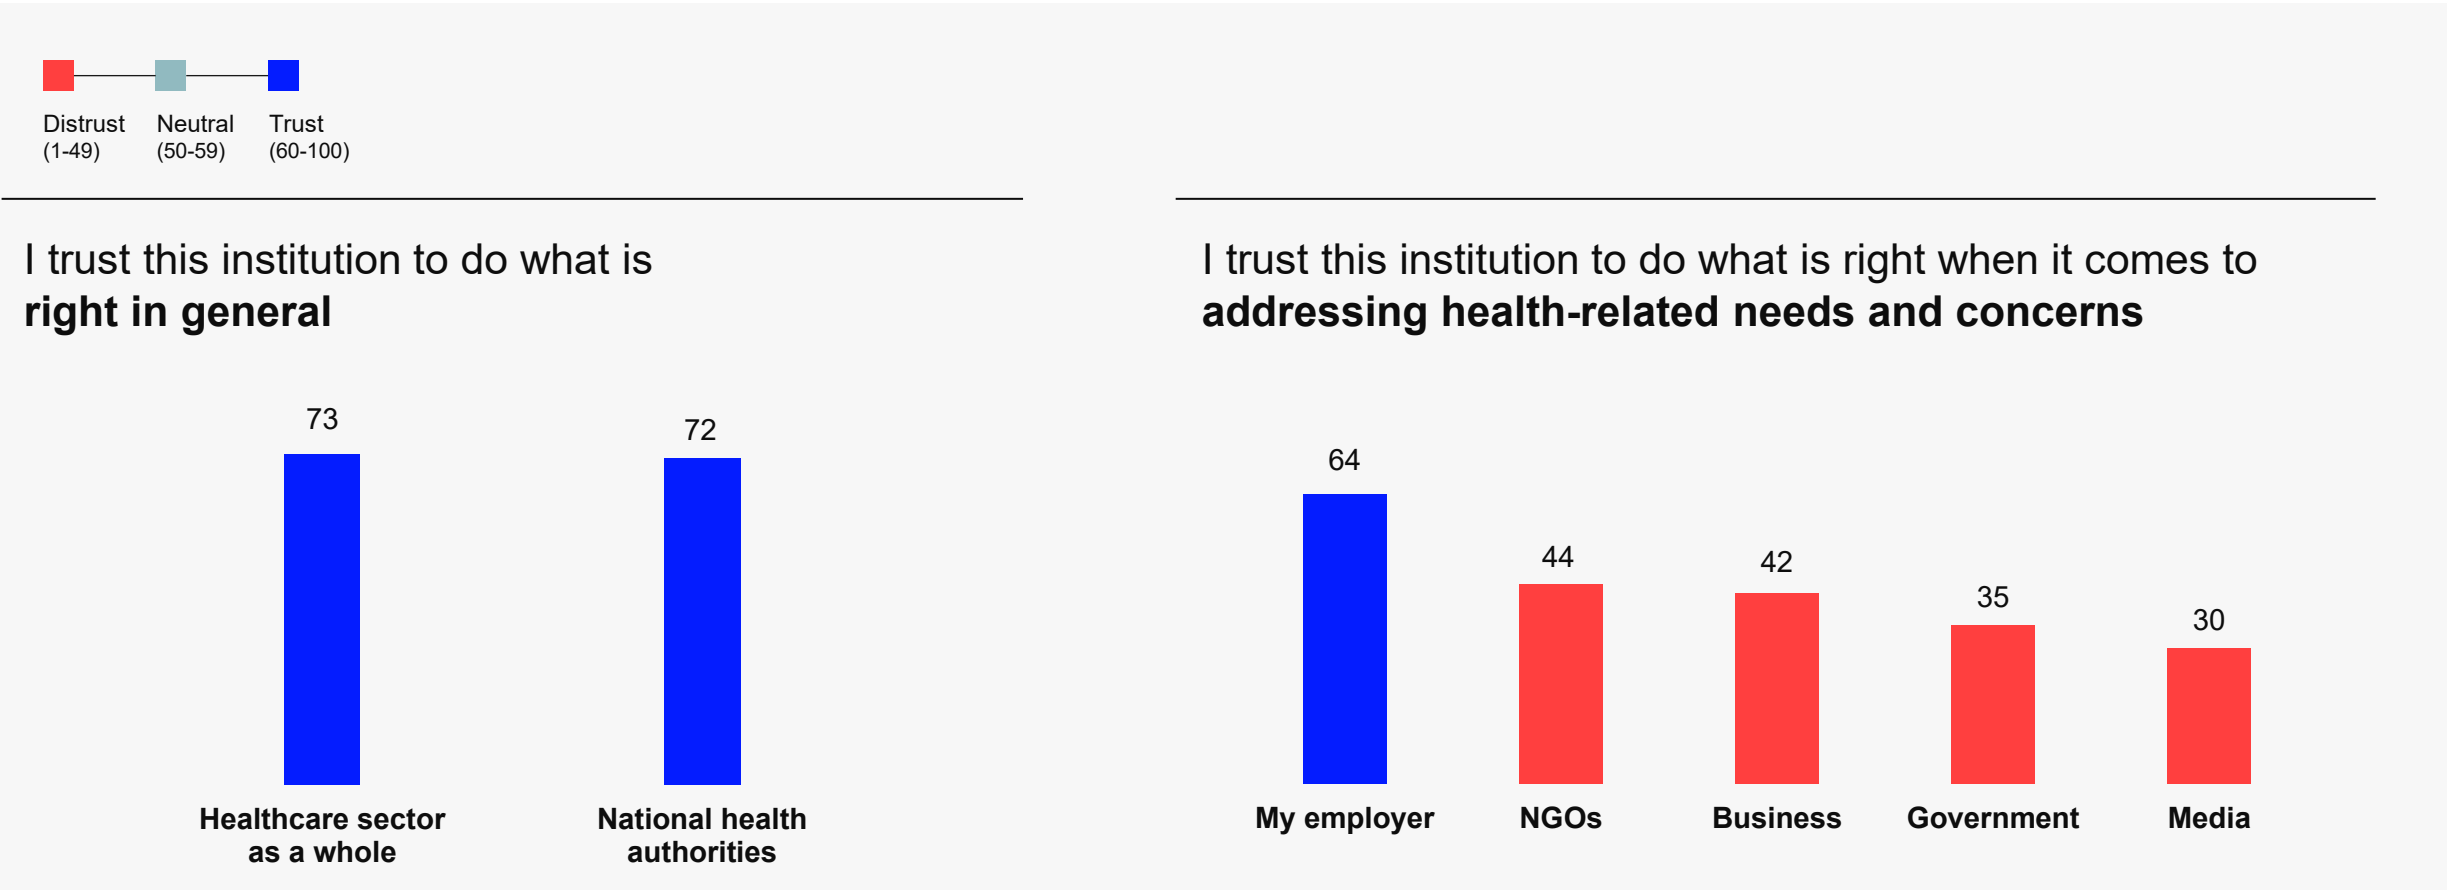

Percent who say, in the UK

This institution is **doing well**  
in making sure **I am as**  
**healthy as possible**

# Employers Only Non-Health Institutions Trusted With Health

Percent who say, in the UK

2023 Edelman Trust Barometer Special Report: Trust and Health. TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. "My employer" only asked among those employed by an organization (Q43/1). TRU\_INS\_HEA. Please indicate how much you trust each of the following to do what is right when it comes to addressing your health-related needs and concerns. 9-point scale; top 4 box, trust. Question asked of half of the sample. General population, UK.

# Rise in Peer Voices and Empowered Patients

# Trust in the Media’s Healthcare Reporting Plummetes Since 2019

Percent who say

I trust the media to report accurate information about healthcare

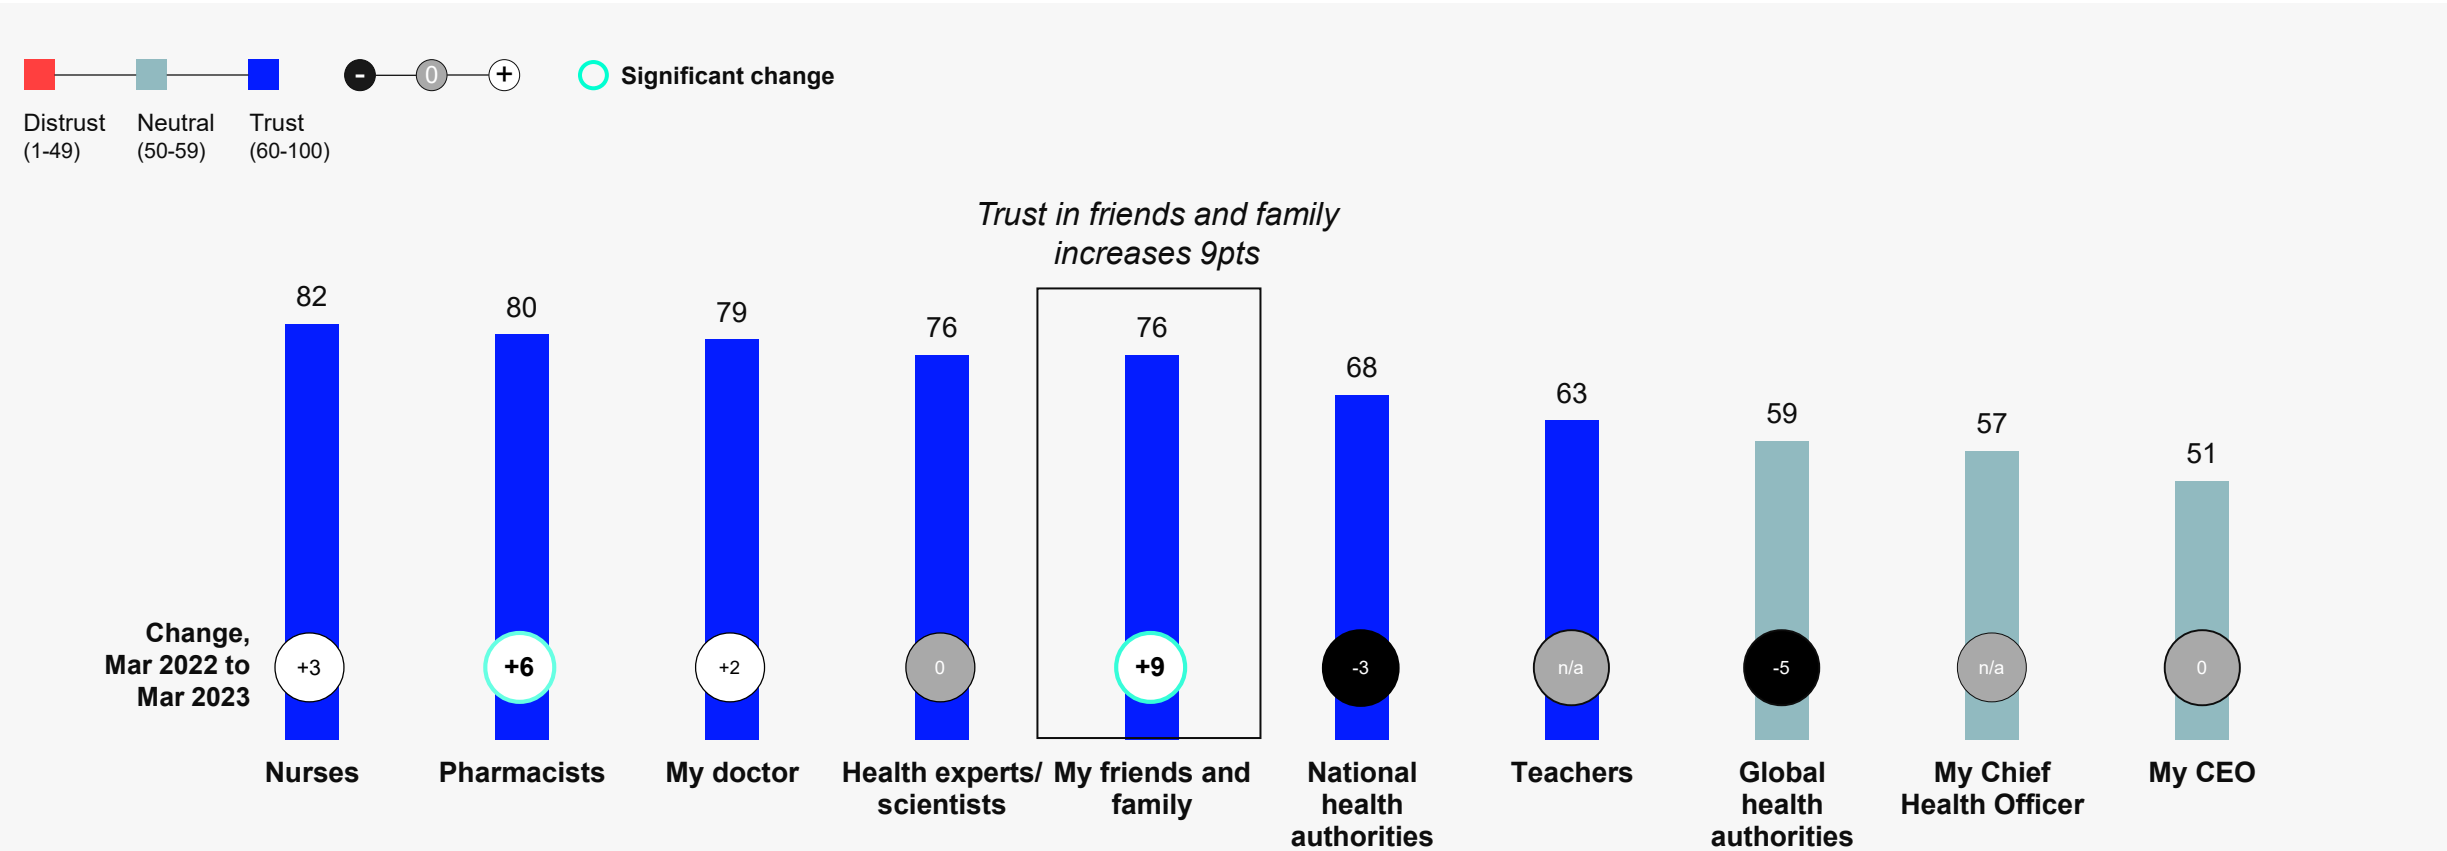

2023 Edelman Trust Barometer Special Report: Trust and Health. DRV\_HEA\_REP. How much do you trust the media to report accurate information about healthcare, such as diseases, treatments and prevention? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 12-mkt avg. \*Nigeria is not included in the global average. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# In the UK, Trust in Peer Voices Now on Par with Medical Experts

Percent trust to tell the truth about health issues and about how to best protect the health of the public, in the UK

 2023 Edelman Trust Barometer Special Report: Trust and Health. HEA\_TRU\_PEP. Below is a list of categories of people. For each one, please indicate how much you trust that group of people to tell you the truth about health issues and about how best to protect the health of the public. 9-point scale; top 4 box, trust. General population, UK. "My Chief Health Officer" and "my CEO" only asked of those who are an employee of an organization (Q43/1). Data shown is rebased to exclude those who selected "don't know/not applicable." Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# I'm Now Educating Myself More About Health

Percent who say, in the UK

Since before the beginning of the pandemic, I have been doing this more or less

# Many Believe the Average Person Can Know as Much as a Doctor

Percent who agree, in the UK

The average person who has done their **own research** is **just as knowledgeable** on most health matters **as doctors**

# To Follow Doctors, Empowered Patients Need Confidence in the Healthcare System

Among the 34% globally who agree the average person can be as knowledgeable as doctors, percent who say

GLOBAL 12

In the past year, I have...

# Build a Healthcare System I Can Trust

# To Drive Better Health Habits, Invest in Trust and Patient Relationships

Regression analysis: increase associated with each determinant

GLOBAL 12

When respondents:

Increased likelihood to have  
**made a positive health change**  
such as diet or exercise  
(standardized across determinants)

Are highly educated	+5.6%
<b>Have a good relationship with their primary healthcare provider</b>	<b>+4.3%</b>
<b>Trust in the health ecosystem</b>	<b>+3.2%</b>
Are younger	+2.1%
Have higher income	+1.7%

2023 Edelman Trust Barometer Special Report: Trust and Health. Regression analysis. HEA\_BHV. Have you done any of the following within the past year? 3-point scale; code 1, yes. General population, 12-mkt avg. This analysis found the increased likelihood for the behavior given a respondent's score on the items in the table. For a full explanation of how this analysis was done, please see the Technical Appendix.

# Healthcare Companies: To Prevent Further Trust Declines, Convince Me You Will Do What Is Right

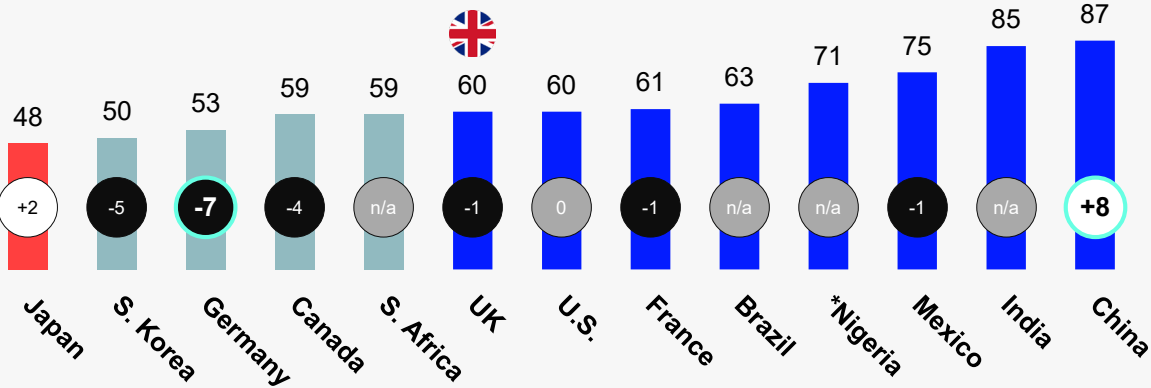

Percent who say

In general, I trust **healthcare companies** to do what is right

## Market

## Gender | Age | Income

2023 Edelman Trust Barometer Special Report: Trust and Health. TRU\_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 9-mkt avg., and by UK demographics. \*Nigeria is not included in the global average. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

# Providers: Treat Me With My Whole Self in Mind

Percent who say each is necessary to feel well cared for by a healthcare provider, in the UK

## Treat my medical needs (net)

- Give me medications I need
- Follow up with me after seeing me
- No long wait time
- Not rushed through my appointment

80%

## Ease my concerns (net)

- Listen to me, take my concerns seriously
- Use terminology I can easily understand
- Put me at ease if I am anxious
- Do not make me feel judged

76%

## Care about me as an individual (net)

- Understand the health concerns of people like me
- Recommendations are compatible with my life
- Ask questions about my life

61%

# Health Experts: Talk To Me Like I’m Your Equal Partner

Percent who say, in the UK

If health experts are trying to get me to change my behavior, it is very/extremely important they do each of the following

Include me in the science

Show the recommendation was based on data collected from people like me

58%

Show how it fits my life

Acknowledge the burden the recommended change may present in my life

58%

Give me a voice

Give me a way to ask questions and voice my concerns

65%

# Bridging the Trust Divide: Embrace the Voices They Will Hear

Among those with lower vs higher trust in the health ecosystem,  
sources most likely to be trusted or believed and most convincing recommendation style

GLOBAL 12

Among those with lower trust in the health ecosystem		Among those with higher trust in the health ecosystem
Friends and family	Most trusted source of health information	My doctor
My employer	Most believable channel for health information	National health authorities
Show credentials and Let me ask questions	Most convincing health expert recommendations	Use clear, informal language

2023 Edelman Trust Barometer Special Report: Trust and Health. HEA\_TRU\_PEP. Below is a list of categories of people. For each one, please indicate how much you trust that group of people to tell you the truth about health issues and about how best to protect the health of the public. 9-point scale; top 4 box, trust. Data shown is rebased to exclude those who selected "don't know/not applicable." HEAR\_TIME\_HEA. When you see a new piece of information or a news story about a health or healthcare issue in each of the following information sources, how many times do you need to see it or hear it repeated in that same type of information source before you believe it is really true? Question asked of half of the sample; "Employer communications" only shown to those who are an employee of an organization (Q43/1). Data is a net of codes 1-3, zero/once/twice. INF\_REL. If health experts want to get you to change your behavior to help you improve or protect your own health and the health of those around you, how important is it that they do each of the following? 5-point scale; top 2 box, very/extremely important. Question asked of half of the sample. General population, 12-mkt avg., by level of trust in health ecosystem. For full details on how the Health Ecosystem Trust scale was built, please refer to the Technical Appendix.

# Majority See Promise of Tech in Delivery of Care

Percent who say, in the UK

I believe the use of **technology** will improve my experience when seeking medical attention in one or more of these ways ... (net)

75%

... by making this more likely to happen

**Meeting my medical needs** (net)

- My provider will follow up after seeing me*
- I will not have a long wait time*
- I will be given medications I need*
- I will not feel rushed through my appointment*

65

**Easing my concerns** (net)

- I will be able to easily understand my diagnosis and treatment options*
- I will be listened to, my concerns will be taken seriously*
- I will not feel judged*
- I will be put at ease if anxious*

48

**Caring about me as an individual** (net)

- My provider's recommendations will be compatible with my life*
- My provider will understand health issues of people like me*
- My provider will ask questions about my life*

44

2023 Edelman Trust Barometer Special Report: Trust and Health. TECH\_CARE. For each of the following, please indicate whether you believe the use of technology is going to make this more or less likely to happen when you seek medical attention. Code 1, more likely. General population, UK. Question asked of half the sample. "Treat my medical needs" is a net of codes 4, 6-8. "Care about me as an individual" is a net of codes 1-2, 9. "Ease my concerns" is a net of codes 3, 5, 10-11.

# CEOs and Employers: Invest in Our Health

# Business: Address the Societal Factors That Affect Our Health

Percent who say, in the UK

To improve people’s health,  
business must:

Provide **trustworthy** health information 71

Address health issues such as **climate or inequality** 70

Improve health of your **local communities** 62

**Convene stakeholders** to improve healthcare 59

# Brands: Optimize For Health Across Your Products and Operations

Percent who say

When deciding which brands to buy, I consider the **impact the brand, its products, and its business practices** have on people’s health

GLOBAL 12

64%

Market

 Gender | Age | Income

# CEOs: Show Me That You Value Mental Health and Work-Life Boundaries

Percent of employees who say, in the UK

To improve their employees' health:

**My CEO must talk about the importance of mental health in the workplace**

**74%**

**My CEO must model healthy behavior, such as respecting boundaries between work and non-work and taking all their PTO**

**73%**

**My employer must implement policies to prevent burnout**

**82%**

# Special Report: Trust and Health

**1**

## Address health inequalities

Cost is the number one barrier keeping people from being as healthy as they want to be. Address the societal issues and inequities that disproportionately affect those with lower access to affordable care.

**2**

## Leverage the dispersion of authority

Friends and family have grown as trusted on health matters as domain experts. Rather than fighting this trend, incorporate it into your approach.

**3**

## Invest in employee health

Employees benefit greatly when their employers invest in their wellbeing. Make this part of your talent strategy, especially for early career and front-line team members.

**4**

## Optimize business around health

Health has a bottom-line impact on consumer decisions for businesses across all sectors. Make health central to your products and business operations.

## 2023 Edelman Trust Barometer Special Report: Trust and Health

# How We Measured Belief in the Healthcare System

Ten attributes were examined to gauge respondents' perceptions of the healthcare system in terms of its fairness and effectiveness.

Respondents' perceptions were measured using a 9-point agree-disagree scale in which 1 = strongly disagree and 9 = strongly agree, with 5 being a neutral mid-point. An overall *Belief in the Healthcare System* score was calculated by taking a respondent's average score across the ten items displayed on the right.

Respondents were then categorized into one of three segments based their mean score:

- Those who averaged 6.00 or higher were classified as believing the **system is failing**
- Those who averaged between 5.00 and 5.99 were labelled as **uncertain**
- Those who averaged less than 5.00 were classified as believing the **system is working**

## Respondents were asked:

Please indicate how much you agree or disagree with the following statements.

### Fairness items

Racism within the healthcare sector is widespread and systemic

While the wealthy get quick access to healthcare, most people in this country struggle to get medical attention when they need it

There are two tiers of medical care available in this country. Leading-edge treatment and access to the best doctors for the wealthy, and a much lower quality of care for everyone else.

As regular people struggle to pay for and access healthcare, healthcare companies are making more profit than they should be

The people who run healthcare companies care more about profits than people

People are needlessly dying in this country because they cannot afford good healthcare

### Effectiveness items

The quality of healthcare available in our country today is the worst I have ever seen it

I deserve better healthcare than I am currently getting

The healthcare system in this country is broken beyond repair

I believe that our country's healthcare system is taking good care of me and my family (Reverse scored)

2023 Edelman Trust Barometer Special Report: Trust and Health

# How We Measured Trust in the Health Ecosystem

In order to determine trust in the health ecosystem, we first had to understand what respondents consider to be the components of that ecosystem.

We identified those components using a factor analysis run across all of the healthcare-related institutional and people trust data from our survey. This analysis yielded four distinct groups of healthcare-related entities that define the ecosystem:

- Healthcare businesses
- Healthcare practitioners
- Global health authorities and NGOs
- Federal and local health authorities

The overall *Trust in the Healthcare Ecosystem* scale was built using the top four loading items from each of the four factors identified. This approach ensured that the final scale would equally represent the impact all four elements that comprise the ecosystem.

Respondents’ levels of trust in each of the 16 entities described in the chart on the right were measured using a 9-point scale in which 1 = do not trust them at all and 9 = trust them a great deal. Their overall *Trust in the Healthcare Ecosystem* score was calculated by taking the respondent’s average trust score across all 16 items.

We then divided respondents into equal thirds within each country. The upper one-third are those with highest trust in the health ecosystem, and the bottom one-third are those with lowest trust in the health ecosystem.

Healthcare businesses	Healthcare practitioners
Biotech / life sciences companies <sup>2</sup> Consumer health / over-the-counter companies <sup>2</sup> Health technology companies <sup>2</sup> Pharmaceutical / drug companies <sup>2</sup>	Doctors <sup>3</sup> Your doctor / primary healthcare provider / pharmacist <sup>3</sup> Nurses <sup>3</sup> Your doctor or primary healthcare provider <sup>4</sup>
Global health authorities and NGOs	Federal and local health authorities
The WHO <sup>1</sup> Global health officials <sup>3</sup> Global health authorities <sup>4</sup> Heads of health NGOs <sup>4</sup>	National health authorities <sup>1,3,4</sup> Local health officials <sup>3</sup>

1. TRU\_INS: trust in an institution to do what is right

2. TRU\_SUB\_HEA: trust in businesses in health industry subsectors to do what is right

3. TRU\_PEP: trust in people to do what is right

4. HEA\_TRU\_PEP: trust in people to tell you the truth about health issues and how best to protect the health of the public.

## 2023 Edelman Trust Barometer Special Report: Trust and Health

# How We Calculated the Determinants of Good Health Behaviors

We used a *regression analysis* to identify drivers that increased the likelihood that respondents **started and maintained a positive health change, such as a diet or exercise routine.**

The analysis looked at trust in the health ecosystem, as well as additional factors that other research has found are important in predicting good health behaviors:

- Age
- Gender
- Income
- Level of education
- Quality of healthcare
- Trust in government
- Relationship with primary healthcare provider
- Trust in the health ecosystem

The results indicated that even after accounting for the traditional social determinants of health, trust in the health ecosystem is a top determinant of good health behaviors.

### Regression variables in detail:

1. Age:
  - 18-34
  - 35-54
  - 55+
2. Gender
  - Men
  - Women
3. Income
  - First quartile
  - Second quartile
  - Third quartile
  - Fourth quartile
4. Education
  - Less than a college degree
  - College degree or more
5. Quality of healthcare
  - Less than very good
  - Very good or better
6. Trust in government
  - Those who trust government (top 4 box trust, codes 6-9)
  - Those who do not trust government (codes 1-5, 99)
7. Relationship with primary healthcare provider
  - Those who have a good working relationship with their primary healthcare provider (top 4 box agree, codes 6-9)
  - Those who do not (codes 1-5, 99)
8. Trust in the health ecosystem
  - Lower 33%
  - Middle 33%
  - Upper 33%

2023 Edelman Trust Barometer Special Report: Trust and Health

# How We Calculated the Determinants of Good Health Behaviors, Continued

The variables shown in the formula below were significant drivers of good health behaviors. Overall, 3.47% of the variance in adopting a positive health behavior is accounted for by this model.

$$PositiveHealthChange = (0.2883) + (0.0262)age + (.1111)Education + (.0152)Income + (.0911)HCPRelationship + (.0386)TrustHealthEcosys$$

The coefficient associated with each driver indicates the relative increase in the likelihood to adopt and maintain a positive health behavior when that variable increases by one unit.

Due to the variation in number of categories or levels across our driver variables, a standardized coefficient value (bStdX) was calculated. This coefficient allows us to rank the importance of each predictor variable relative to the others. Specifically, the number displayed in the third column of the table to the right is the predicted increase in the likelihood to adopt and maintain a positive health behavior associated with each variable increasing by one *standard deviation*.

Linear regression	Positive health change		
	Coefficient	p-val	bStdX
Age	0.0262	0.0013	0.0210
Gender	-0.0151	0.2446	-0.0076
Education	0.1111	0.0000	0.0555
Income	0.0152	0.0157	0.0166
Quality of healthcare	-0.0098	0.4909	-0.0048
Trust in government	0.0008	0.9573	0.0004
Relationship with HCP	0.0911	0.0000	0.0433
Trust in the health ecosystem	0.0386	0.0000	0.0316
Constant	.2883

# Biggest Barriers to Better Health: Cost and Information

HEA\_BAR. How big a role does each of the following have in keeping you from closing the gap between how well you currently are taking care of your health and how well you should ideally be taking care of your health?

Shortened	Full
Healthy options cost too much	Healthy options and health-promoting products and activities cost more than I am willing to pay
Cannot afford good healthcare	I cannot afford to pay for good healthcare
Cannot afford treatments	I cannot afford to pay for some of the medications or medical devices that I need
Lack of information	A lack of information. I do not know how to go about taking better care of my health.
Changing health recommendations	Health recommendations keep changing. One day something is considered healthy, and the next day the experts change their advice. When this happens, it makes me unsure about what I should be doing to stay healthy.
Contradictory expert advice	Different health experts give contradictory advice. When this happens, it makes me unsure about my health decisions.
