

2024 Edelman Trust Barometer

APAC Region Report

2024 Edelman Trust Barometer

Methodology

Annual online survey in its 24th year

Fieldwork conducted: Nov 3 – Nov 22, 2023

Argentina	Colombia	Ireland	Mexico	S. Africa	UAE
Australia	France	Italy	Netherlands	S. Korea	UK
Brazil	Germany	Japan	Nigeria	Spain	U.S.
Canada	India	Kenya	Saudi Arabia	Sweden	
China	Indonesia	Malaysia	Singapore	Thailand	

Data collected is representative of the general population across age, gender, region and ethnicity/nationality (where applicable) within each country.

**The sample size varies by country from 1,109 to 1,500.
 28-market global data margin of error: General population +/- 0.7 percentage points (n=32,492)
 Country-specific data margin of error: General population +/- 3.3 to 3.9 percentage points (varies by country based on sample size, n=1,109 to n=1,500)
 Margin of error is calculated at the 99% confidence level

Global averages

Unless otherwise indicated, global averages are composed of all 28 countries surveyed.

Statistical significance

Indicates a statistically meaningful difference or change in the data that is unlikely to be due to chance or a random fluctuation.

All indicated year-over-year significant changes were determined using a t-test set at a 99%+ confidence level.

Shortened question text

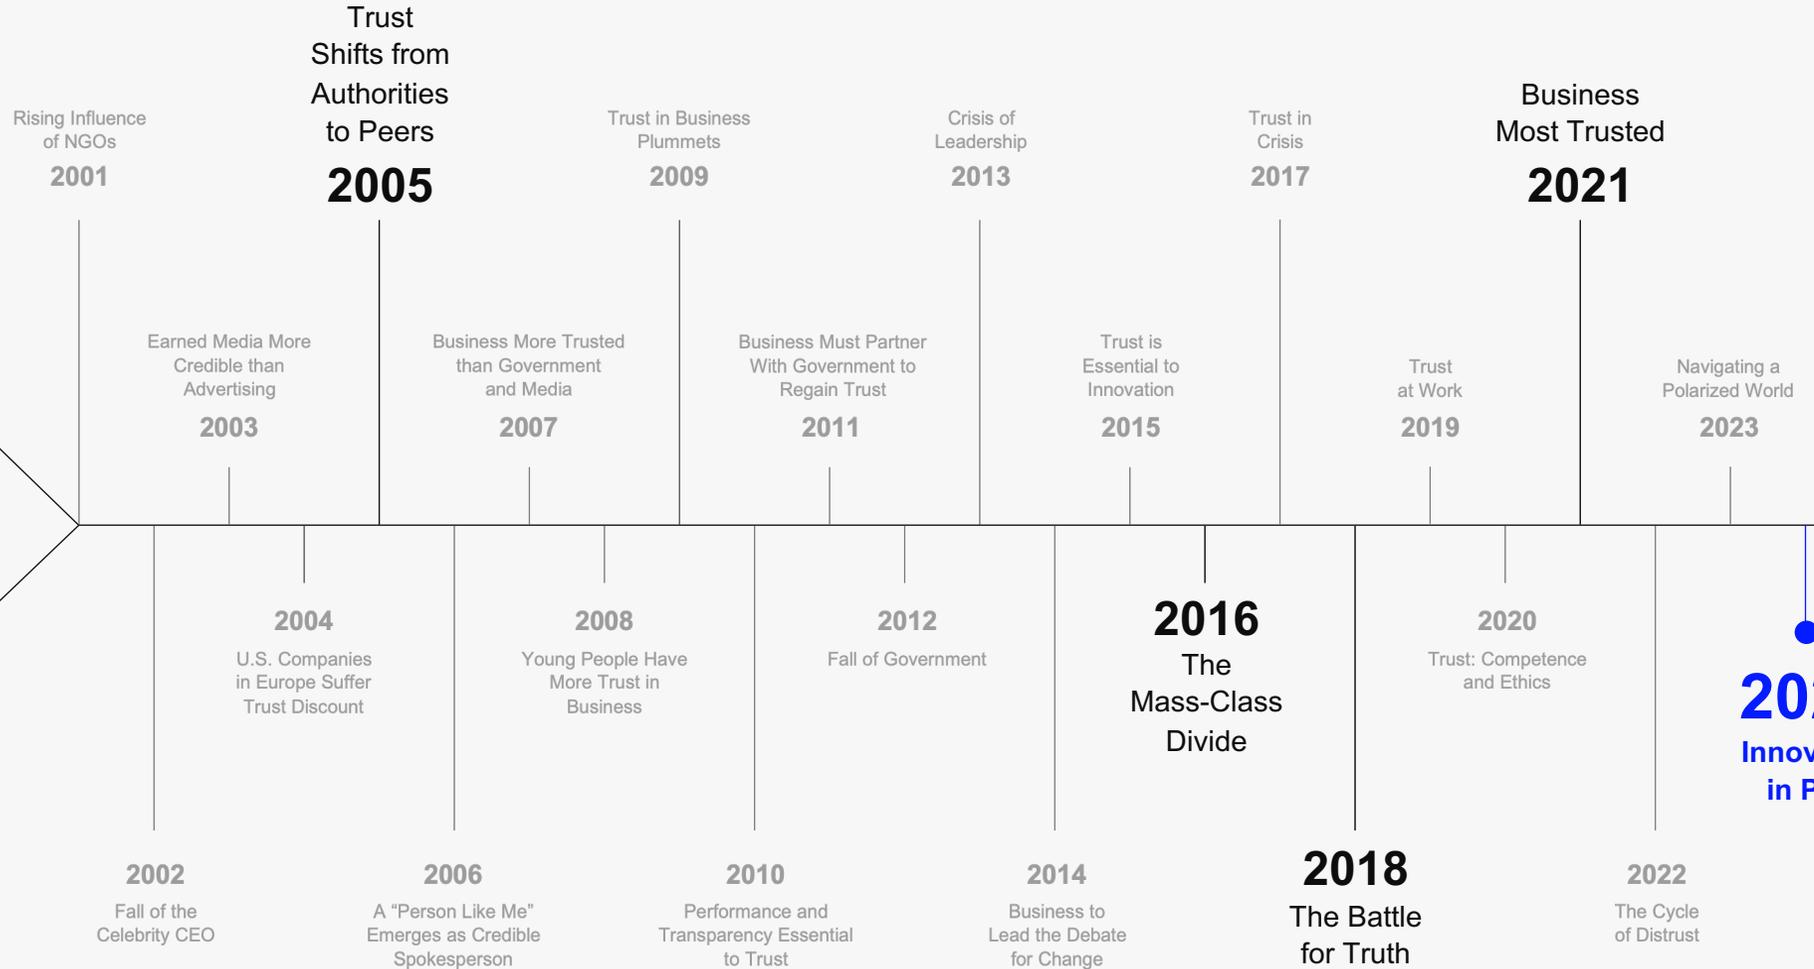

Throughout the report, question text has been edited for readability.

For more details on global averages, country-specific sample information, or to see the full text for any shortened statements, please see the Technical Appendix

A Shift in Authority

Trust Index 2023 to 2024: APAC Countries Lead on Trust

Trust Index

(average percent trust in NGOs, business, government, and media)

2024 Trust Index among

Developing countries **63**

Developed countries **49**

2024 Edelman Trust Barometer. The Trust Index is the average percent trust in NGOs, business, government and media. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg., and by developed and developing countries. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 Trust Index has been imputed using a model. For more details, please see the Technical Appendix.

least-trusting countries

In APAC, Institutional Imbalance Less Acute Compared to Global

(Competence score, net ethical score)

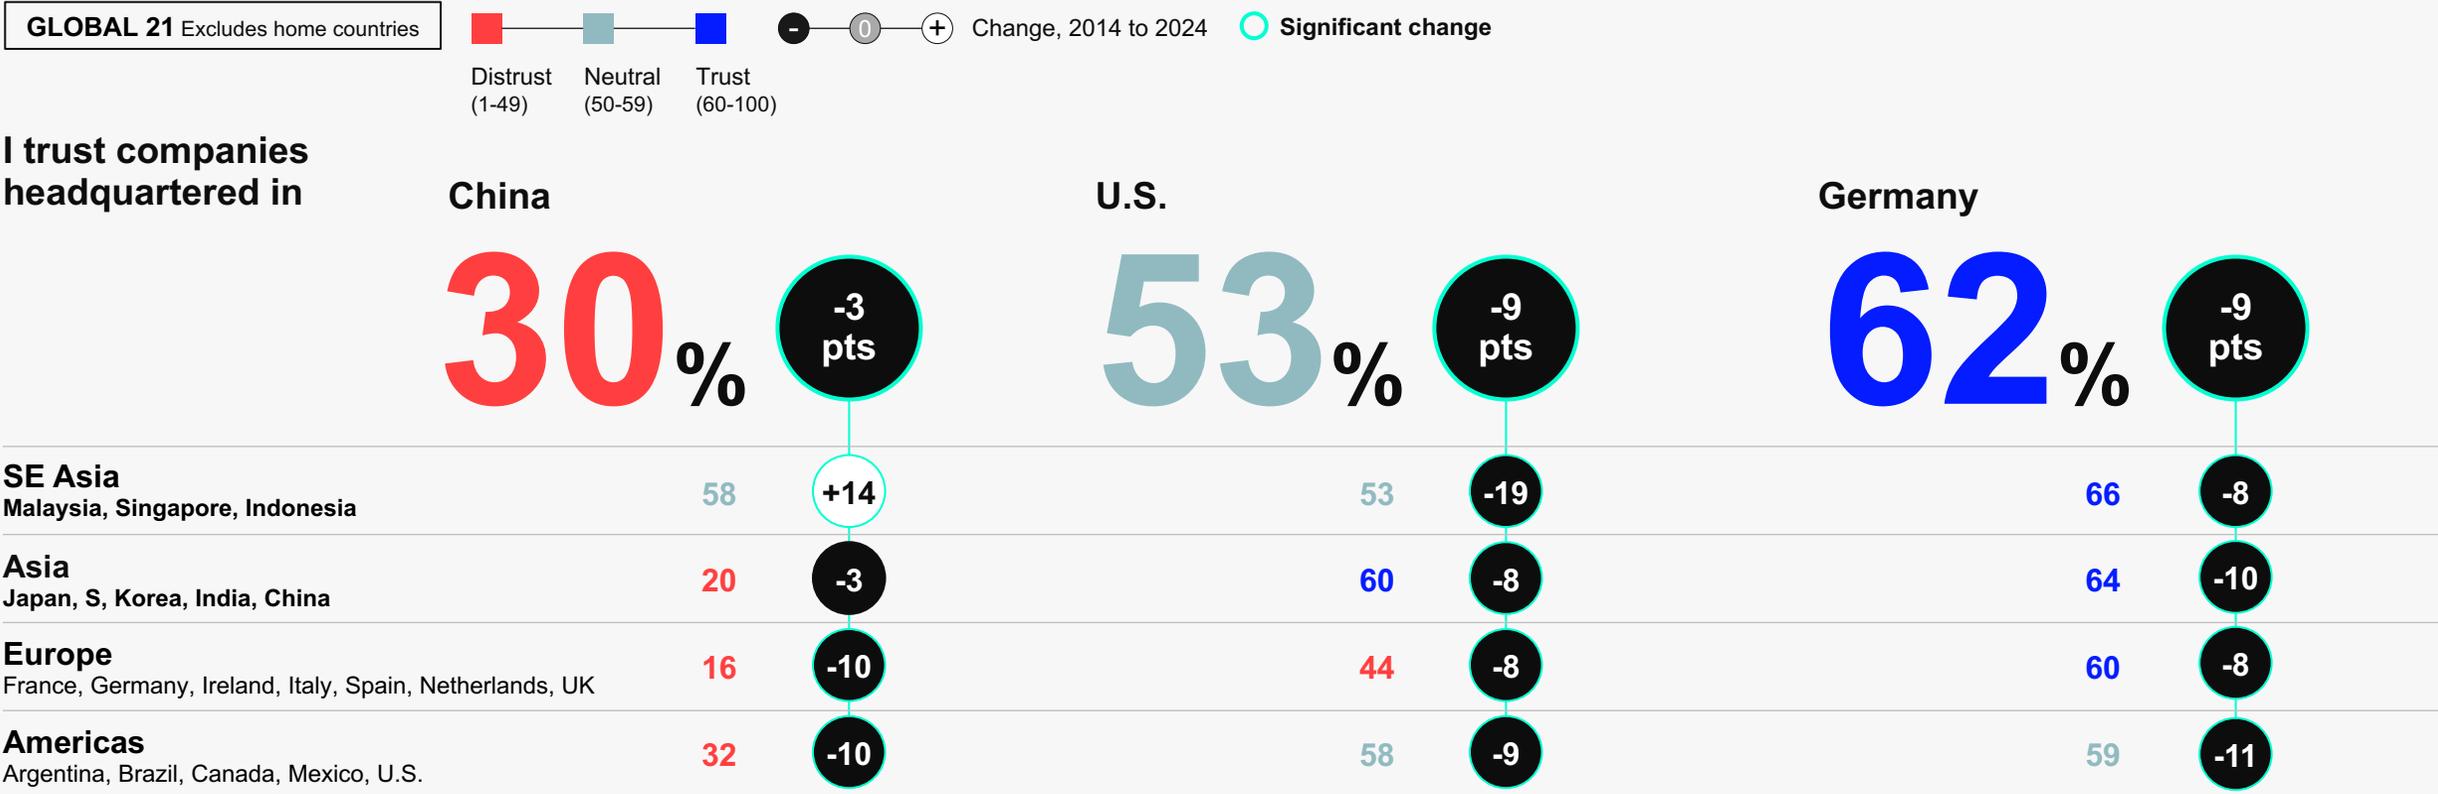

2024 Edelman Trust Barometer. The ethical scores are averages of nets based on [INS]_PER_DIM/1-4. Media and NGOs were only asked of half the sample. The competence score is a net based on TRU_3D_[INS]/1. Media and NGOs were only asked of half the sample. General population, APAC region. Data not collected in China and Thailand; Due to a translation inconsistency in S. Korea, it has been excluded from this analysis. For full details regarding how this data was calculated and plotted, please see the Technical Appendix.

10-Year Shift: Less Trust for Companies Headquartered in Global Powers

Percent trust in companies headquartered in each country, among respondents from outside each country being rated

2024 Edelman Trust Barometer. TRU_NAT. Now we would like to focus on global companies headquartered in specific markets. Please indicate how much you trust global companies headquartered in the following markets to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 21-mkt avg., and by region. Data excludes respondents from the country being rated. Ten-year changes were tested for significance using a t-test set at the 99%+ confidence level.

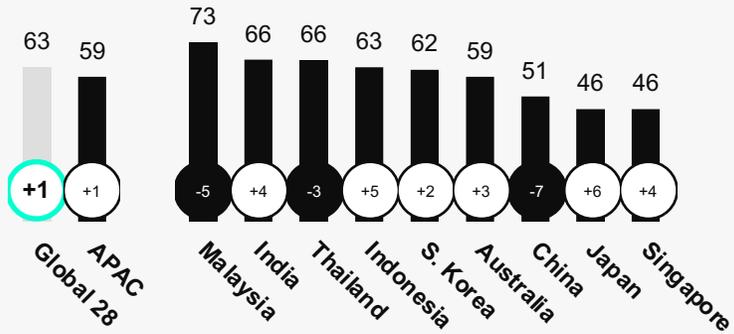

Establishment Leaders Not Trusted to Tell Us the Truth

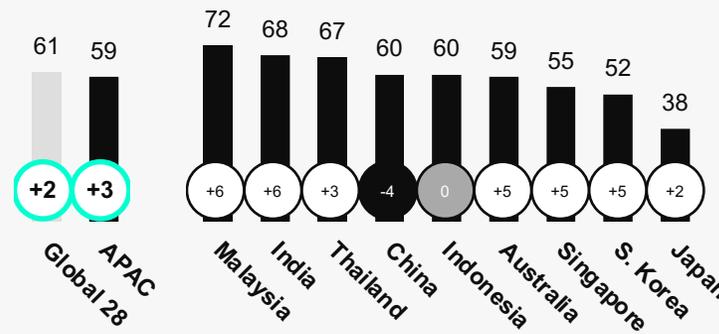

Percent who worry

-
0
+
 Change, 2023 to 2024
 ○ Significant change

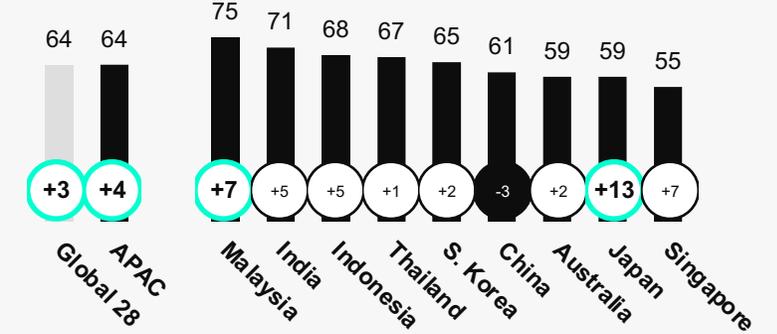

Government leaders

Business leaders

Journalists and reporters

are **purposely trying to mislead people** by saying things they know are false or gross exaggerations

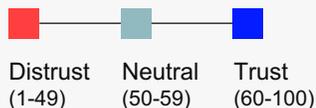

2024 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. General population, 28-mkt avg and APAC region. Attributes asked of half the sample. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

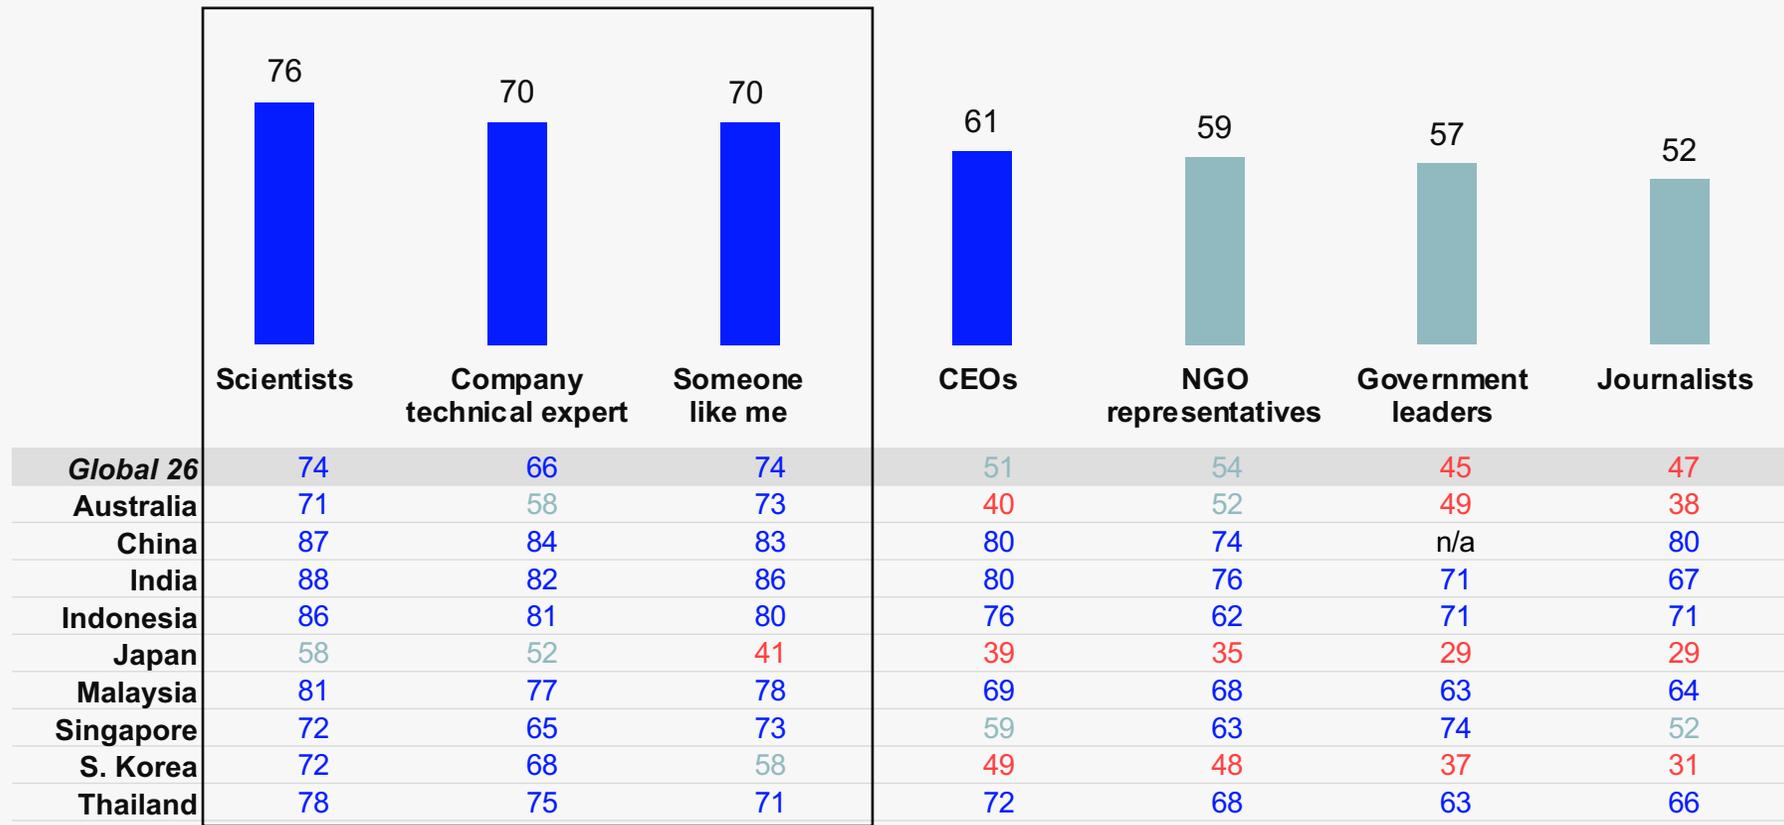

Dispersion of Authority: Peers on Par With Scientists and Experts

Percent trust

APAC Excludes China

I trust each to tell me the truth about new innovations and technologies

2024 Edelman Trust Barometer. TRU_PEP_TCNG. Below is a list of categories of people. For each one, please indicate how much you trust that person or group of people to tell you the truth about new innovations and technologies. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 26-mkt avg and APAC region. "Government leaders" not asked in China.

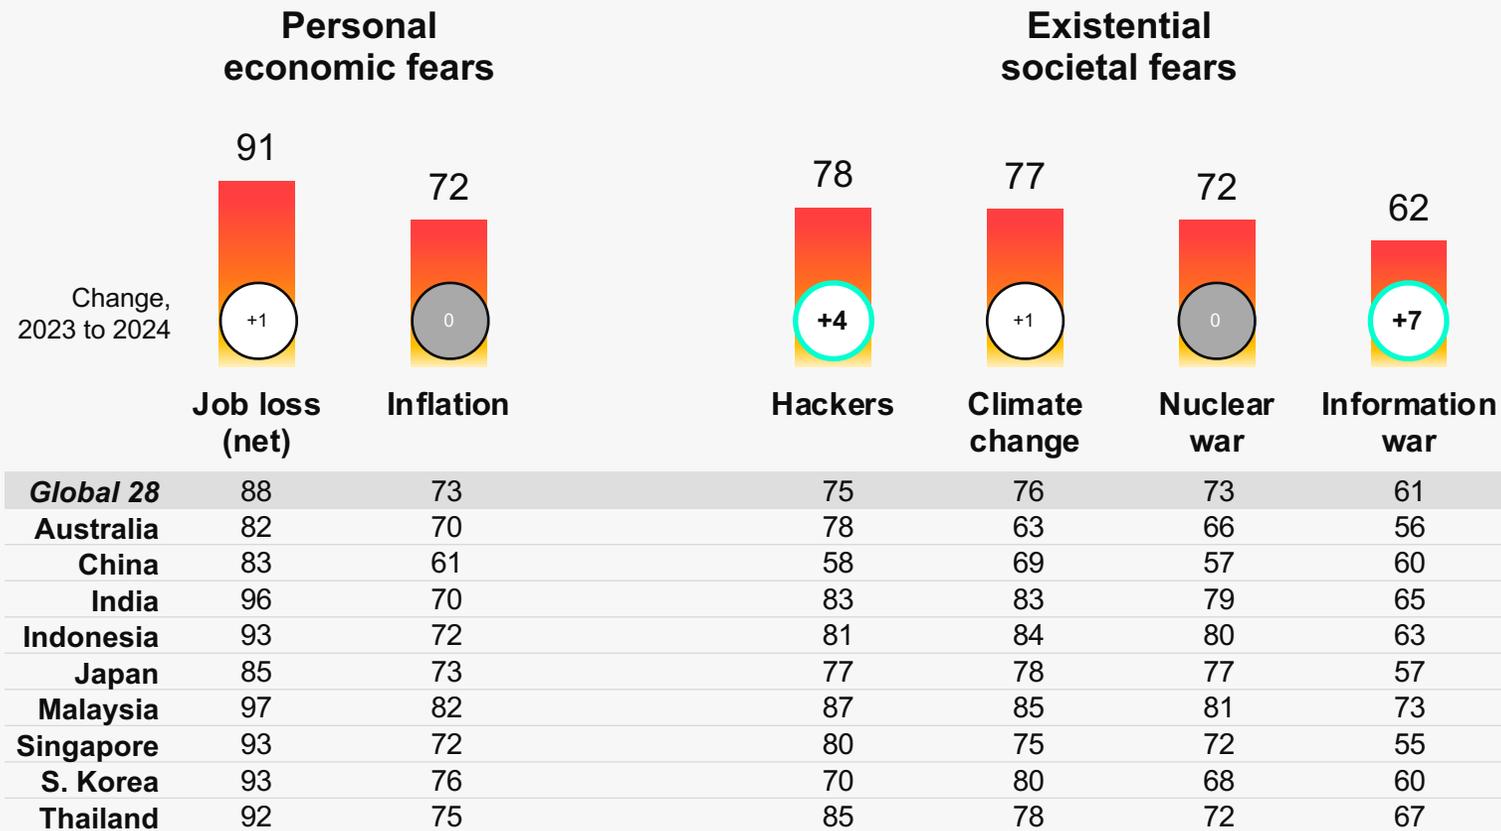

Economic Fears Persist as Societal Concerns Rise

Percent who worry about...

APAC

Significant change

2024 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Some attributes asked of half the sample. General population, 28-mkt avg and APAC region. Job loss asked of those who are an employee of an organization (Q43/1). Job loss is a net of attributes 1-3, 5, and 22-24. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Trust Imbalance: In APAC Business and Government Most Trusted to Integrate Innovation into Society – But This Must Be Inclusive

Percent trust

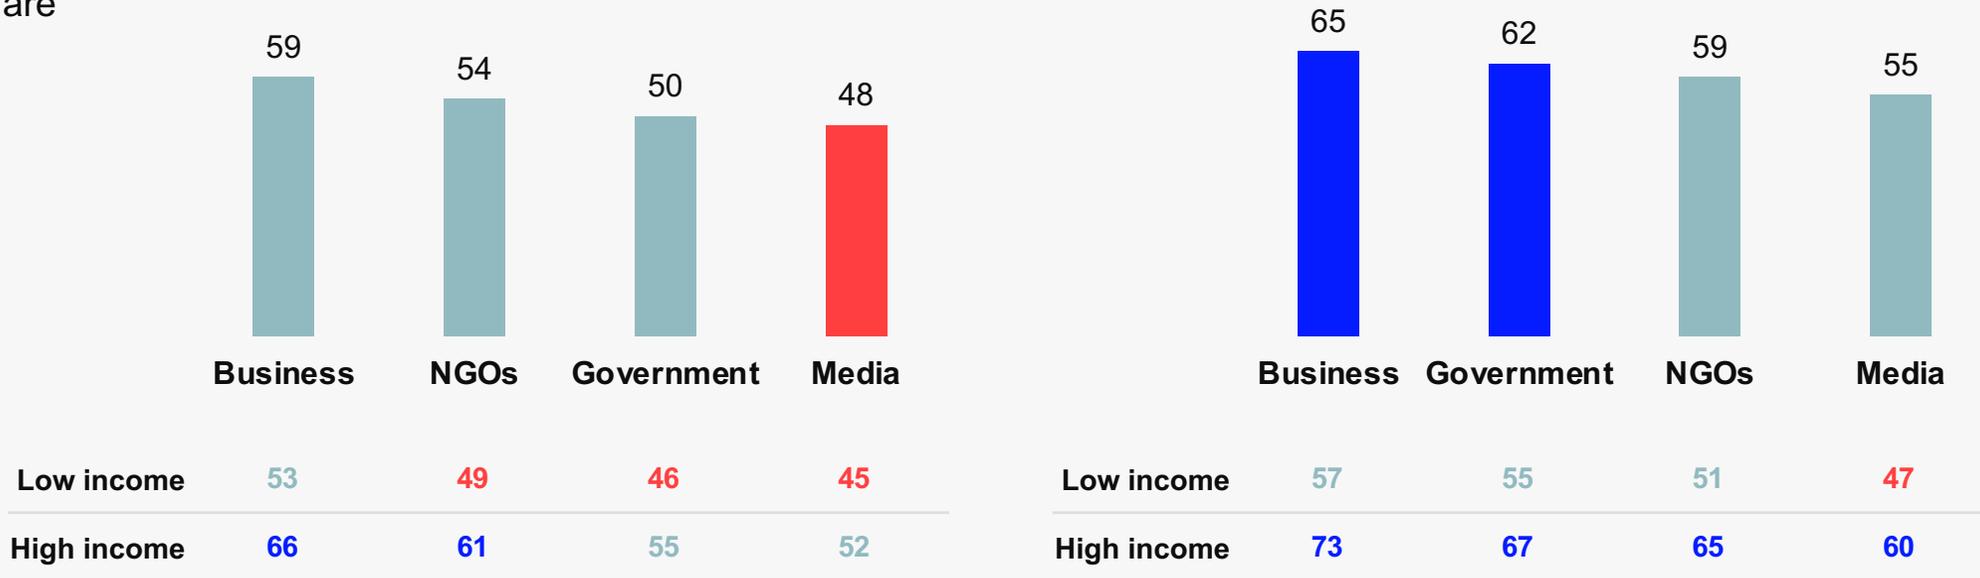

GLOBAL 26 Excludes China, Saudi Arabia

APAC Excludes China

I trust each with the introduction of innovations into society, ensuring they are

- Safe
- Understood by the public
- Beneficial
- Accessible

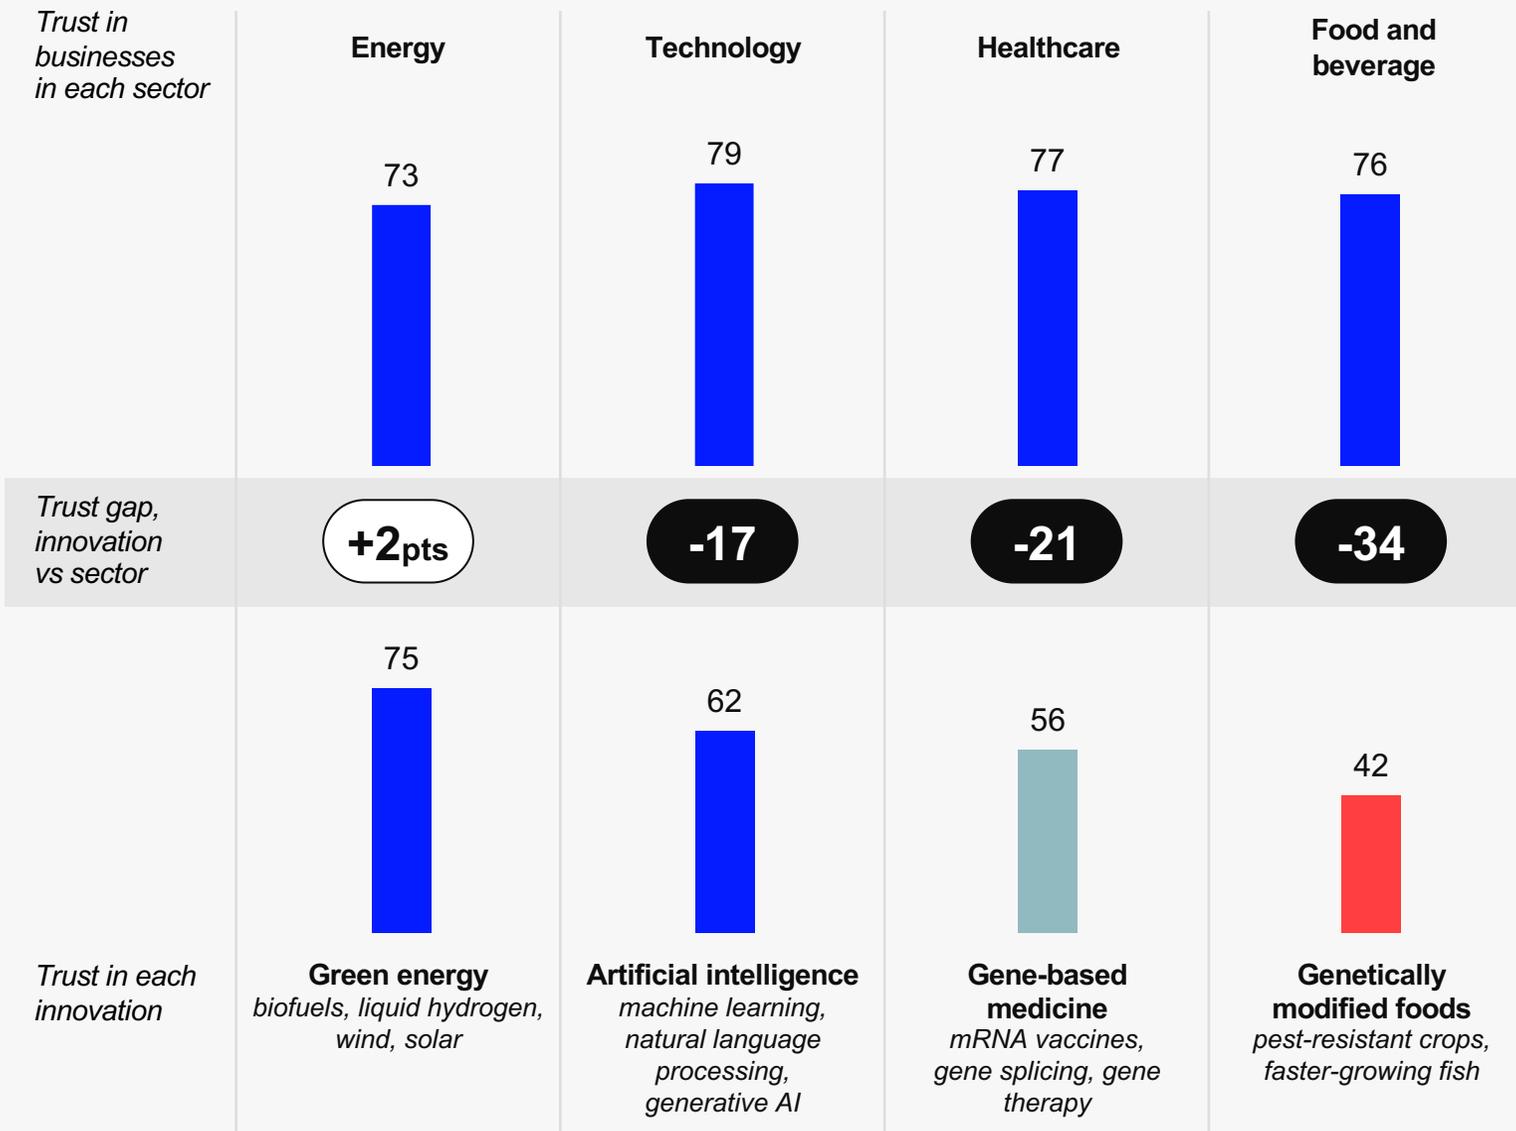

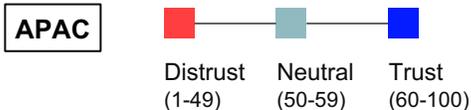

2024 Edelman Trust Barometer. TRU_INS_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them). 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 26-mkt avg., APAC region, and by income. Data for "Government" and "Media" not collected in China.

Trust in Industry Sectors Does Not Guarantee Trust in Industry Innovations

Percent trust, in APAC

2024 Edelman Trust Barometer. TRU_IND. Please indicate how much you trust businesses in each of the following industries to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. TEC_TRU. How much do you trust each of these technologies? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, APAC region and 28-mkt avg.

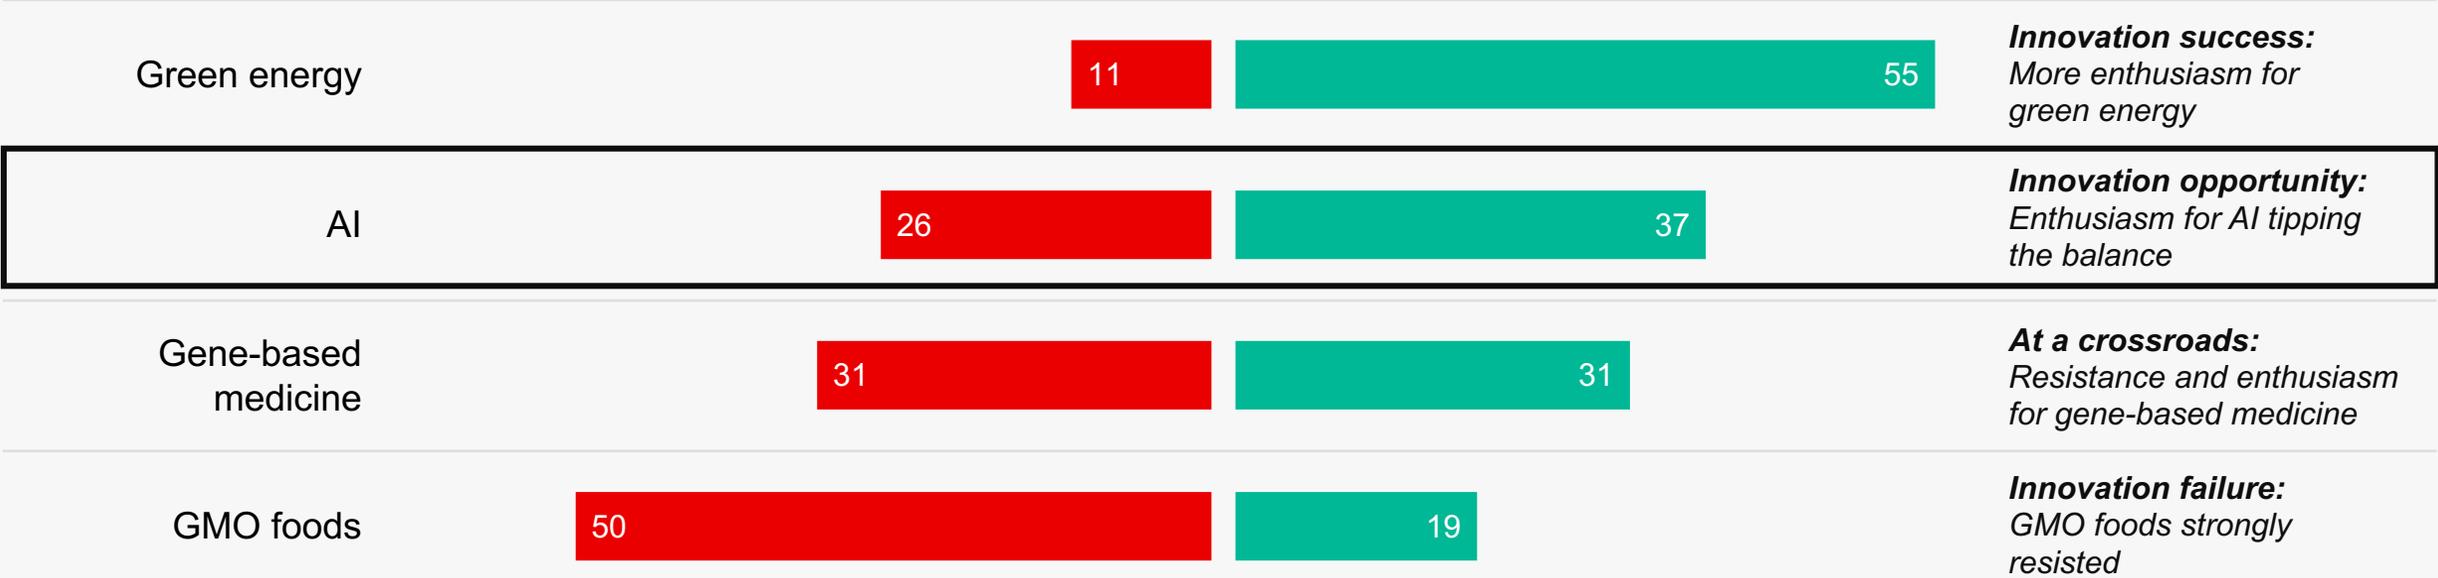

Acceptance of Innovation at Stake

Percent who say, in APAC

APAC

I reject this innovation I embrace this innovation

2024 Edelman Trust Barometer. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; bottom 2 box, resistant or hesitant = reject; top 2 box, enthusiastic or passionate = embrace. General population, APAC region.

Innovation is on the Ballot

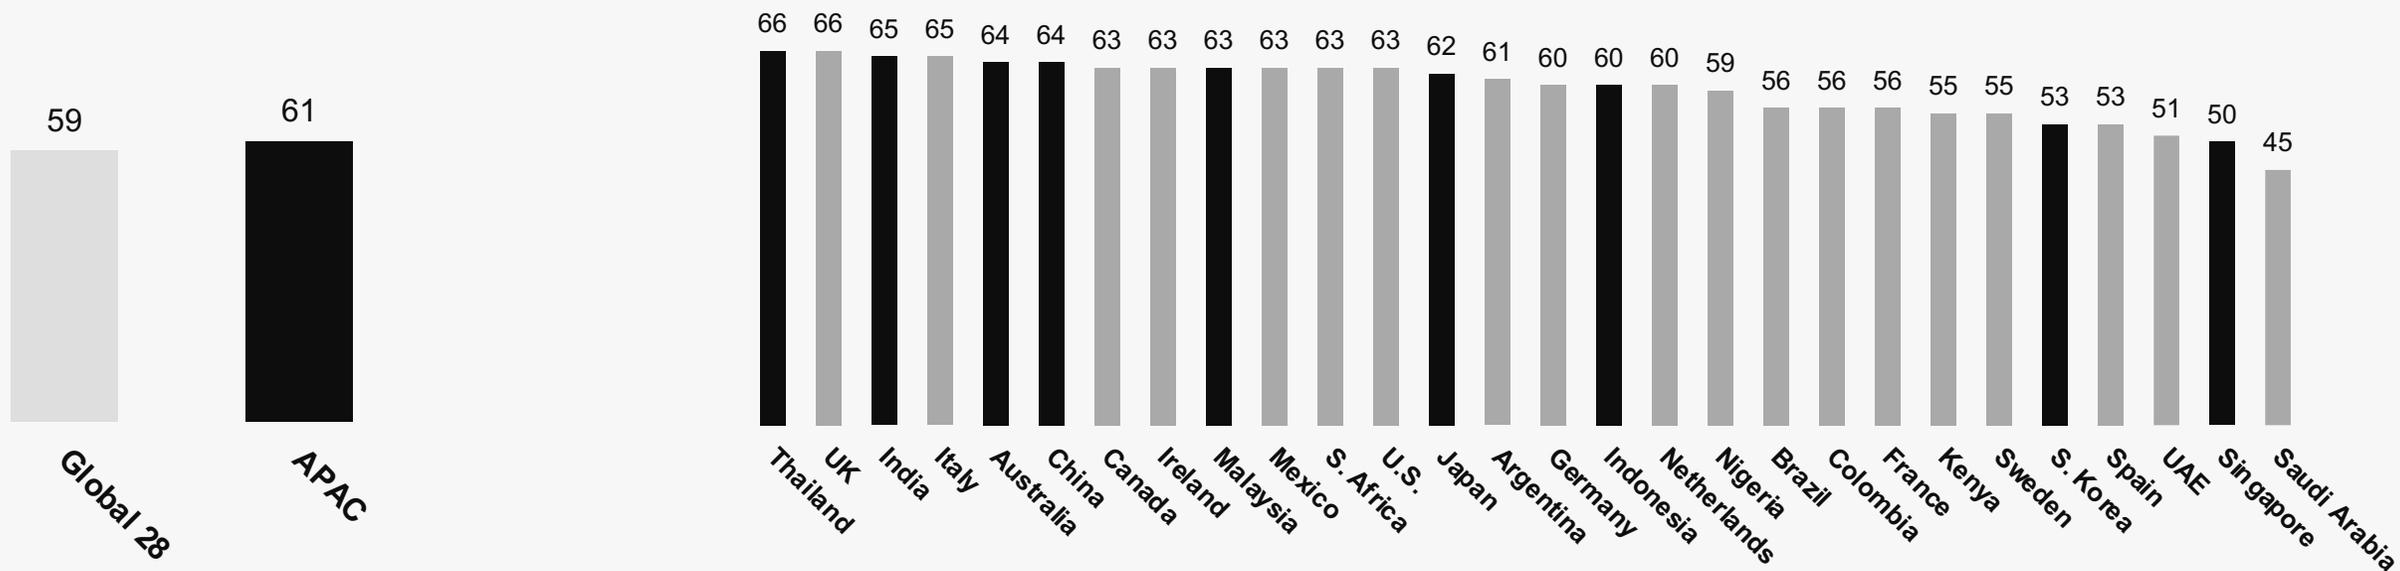

Government Lacks Competence to Regulate Emerging Innovations

Percent who say this is true

Government regulators **lack adequate understanding of emerging technologies to regulate them effectively**

At least 1 in 2 across all APAC countries say government not regulating well

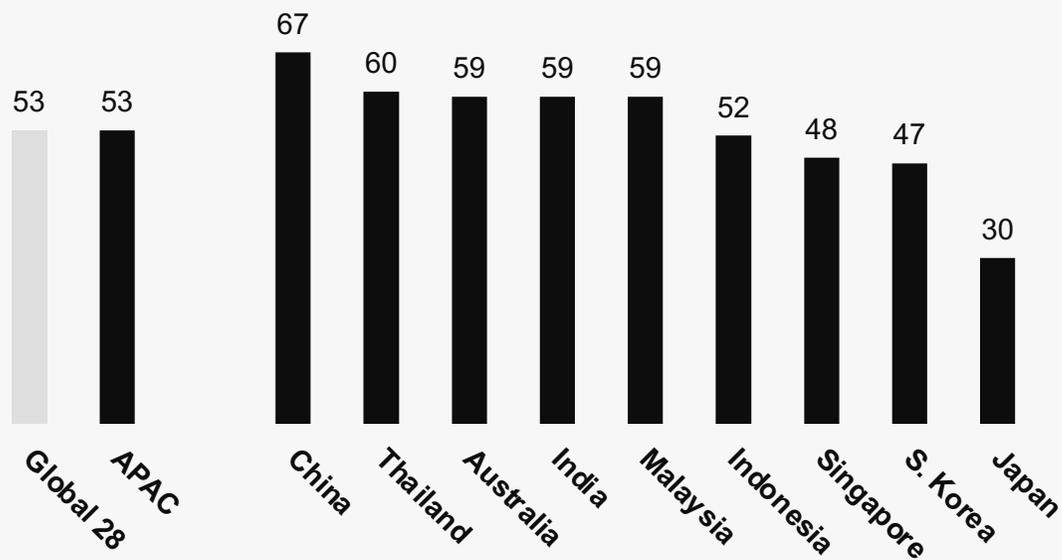

2024 Edelman Trust Barometer. POP_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. General population, 28-mkt avg and APAC region.

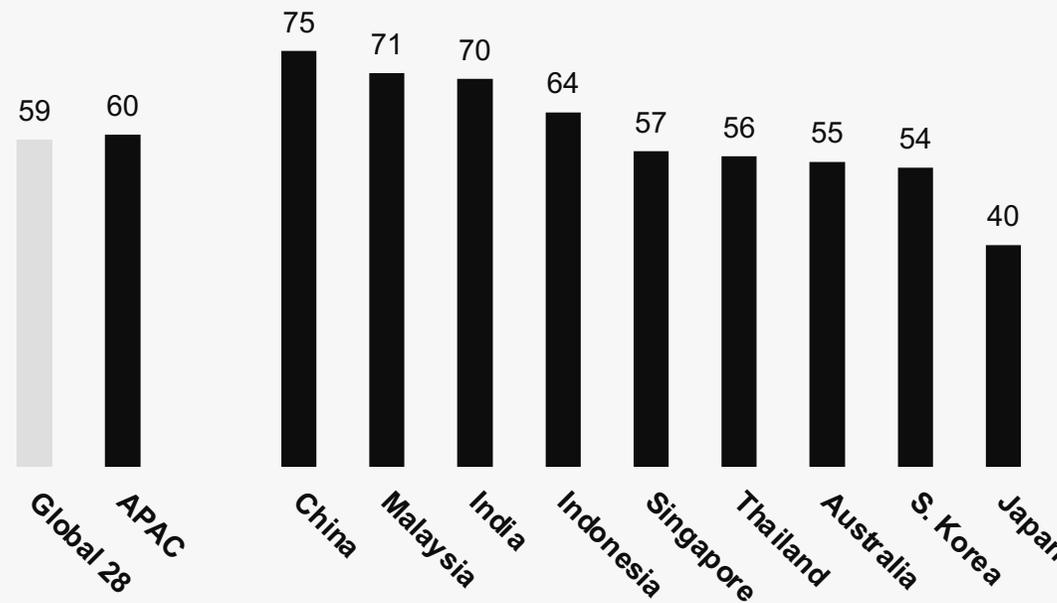

Concerned Government Has Too Much Influence on Science

Percent who agree

Science has become politicised in this country

Government and organisations that fund research have too much influence on how science is done

Globally, Nearly 2x More Likely to Fear Innovation Poorly Managed

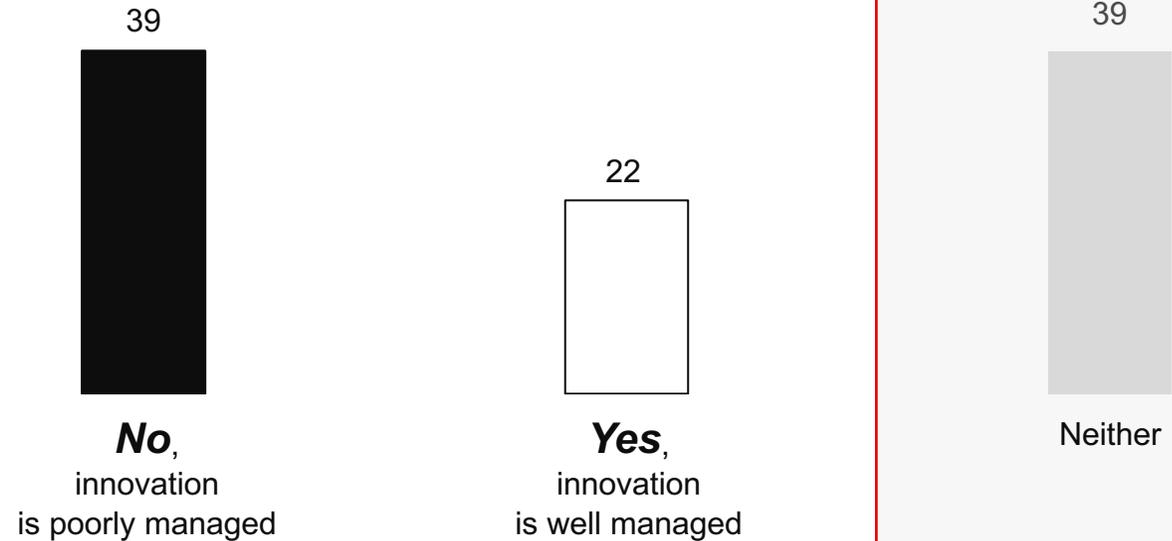

On average, percent who say

GLOBAL 28

In thinking about innovation –

- *Do I trust how **business** and **NGOs** introduce innovations into society?*
- *Can **government** regulate new technologies?*
- *Is science independent of **politics** and **money**?*

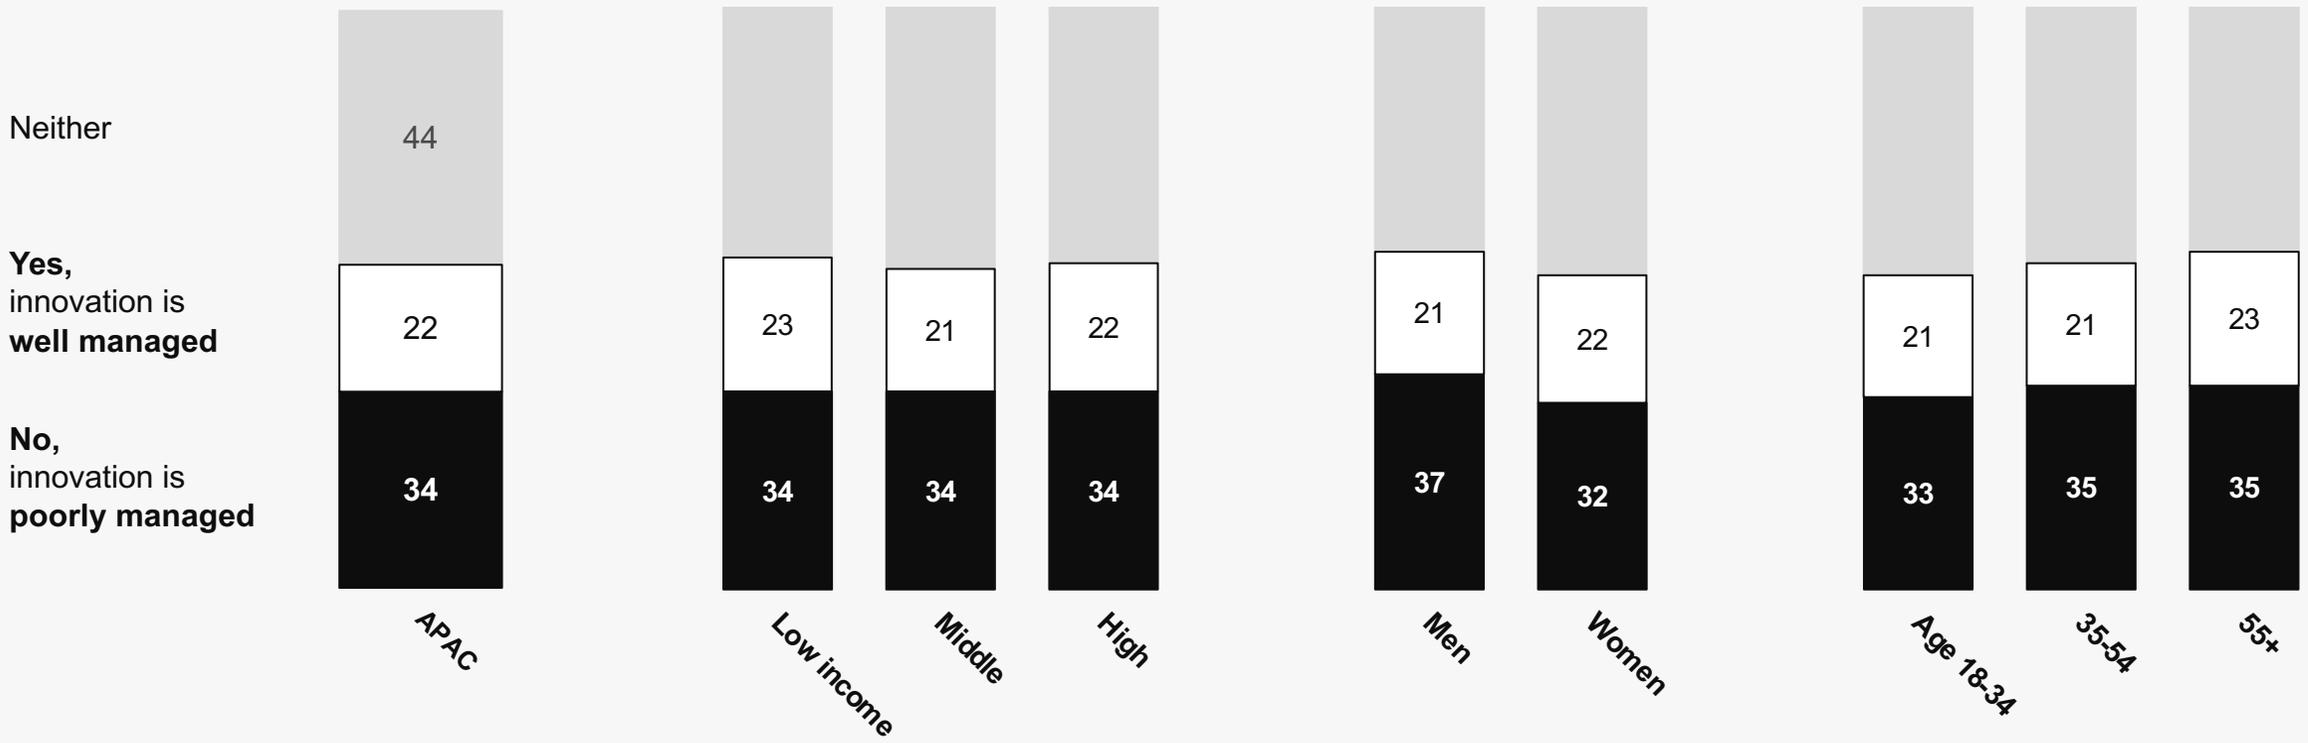

Nearly **2x more likely**
to say innovation is poorly managed vs well managed

In APAC, Concern Innovation is Mismanaged Shared Across Income, Gender, and Age

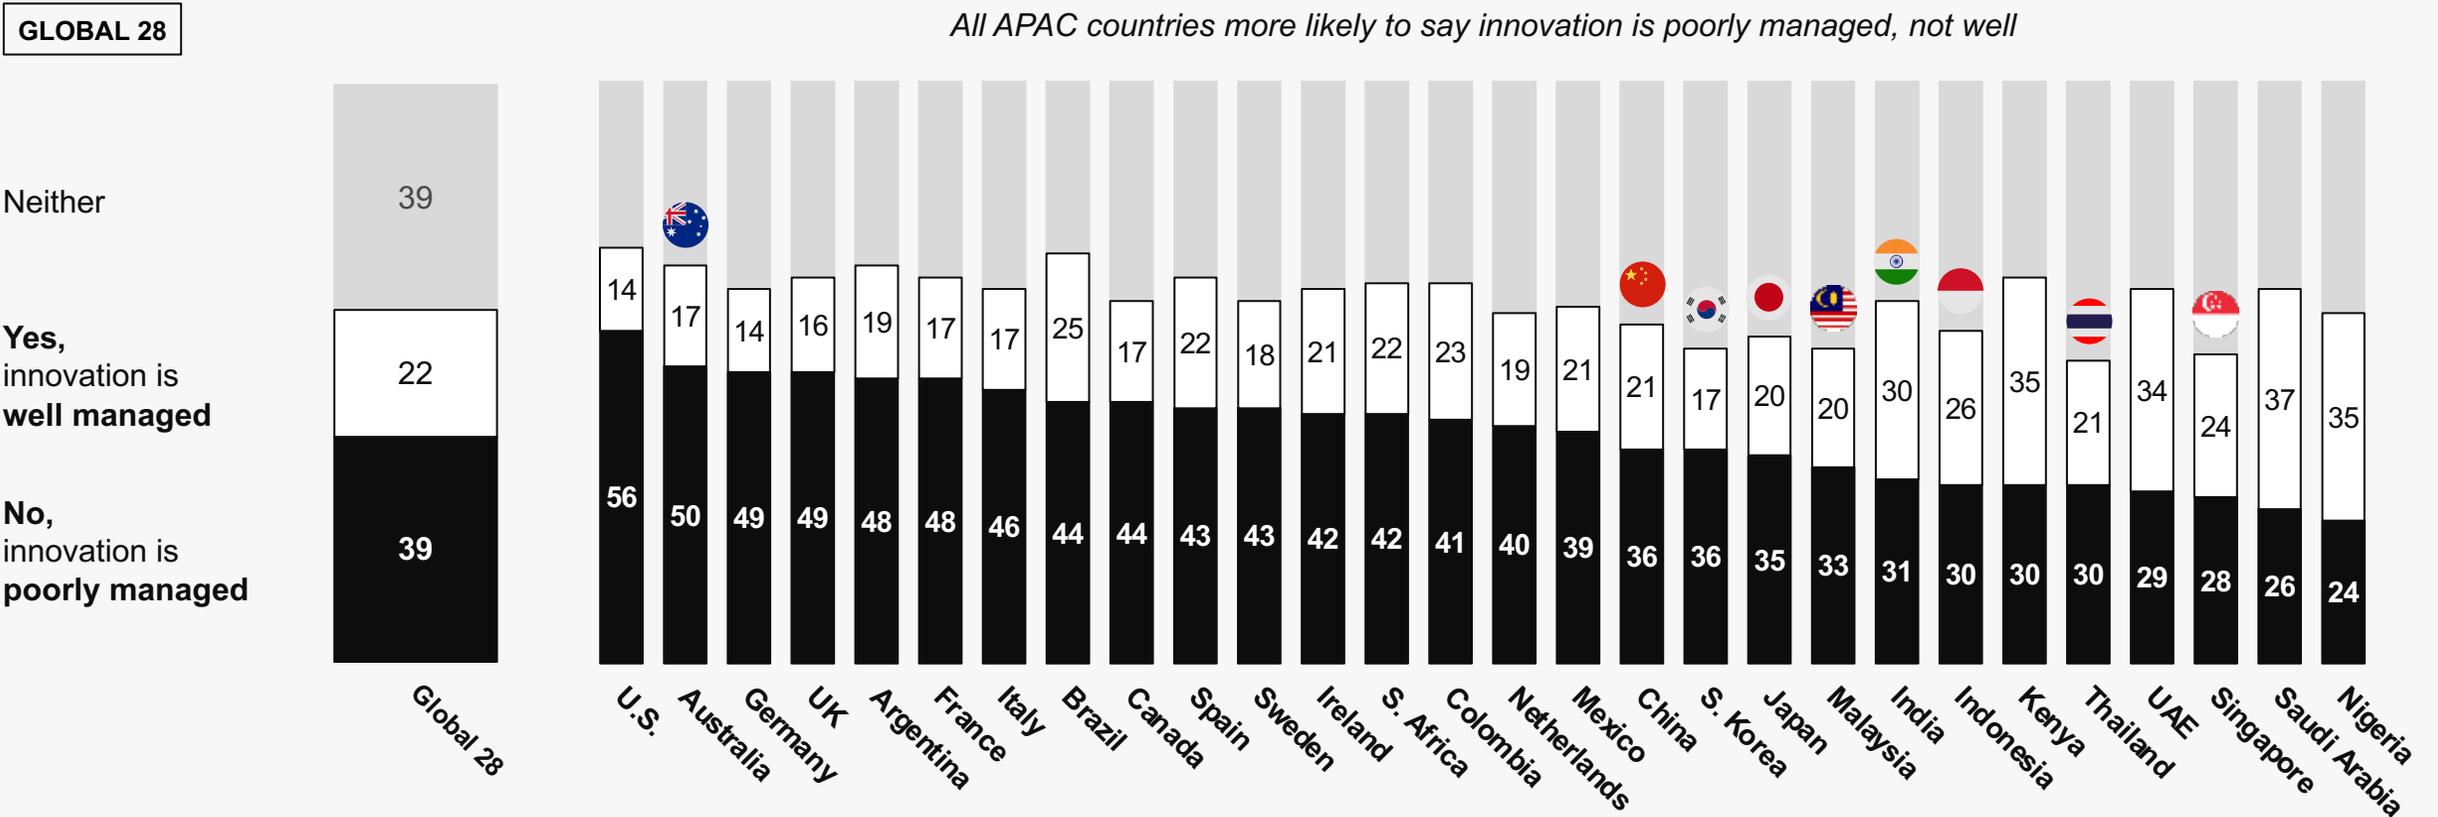

On average, percent in APAC who say

APAC

Nearly All Countries More Likely to Believe Innovation is Mismanaged Rather Than Well Managed

On average, percent who say

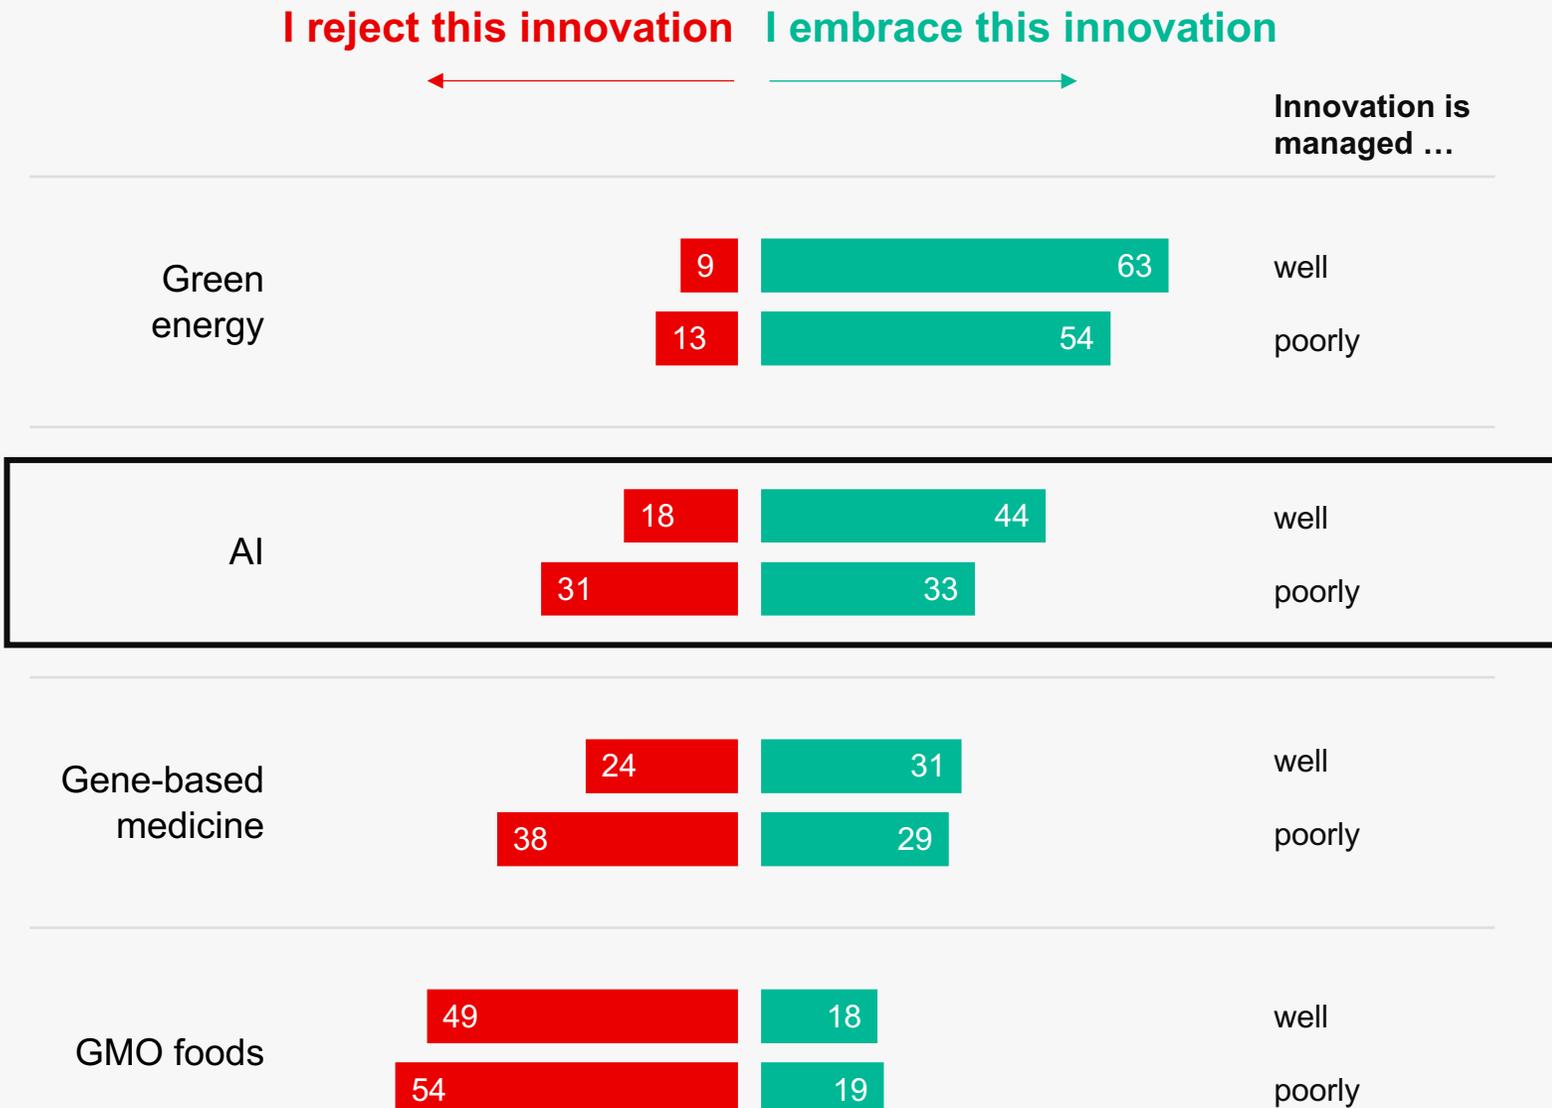

When Institutions Mismatch Innovation: More Rejection, Less Enthusiasm for Emerging Technologies

Percent who say, in APAC

APAC

2024 Edelman Trust Barometer. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; bottom 2 box, resistant or hesitant = reject; top 2 box, enthusiastic or passionate = embrace. General population, APAC region, by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

In Many Countries, Resistance to Innovation Is Political

Percent of respondents who reject innovation, based on their individual average acceptance rating across green energy, AI, gene-based medicine, and GMO foods

GLOBAL 21

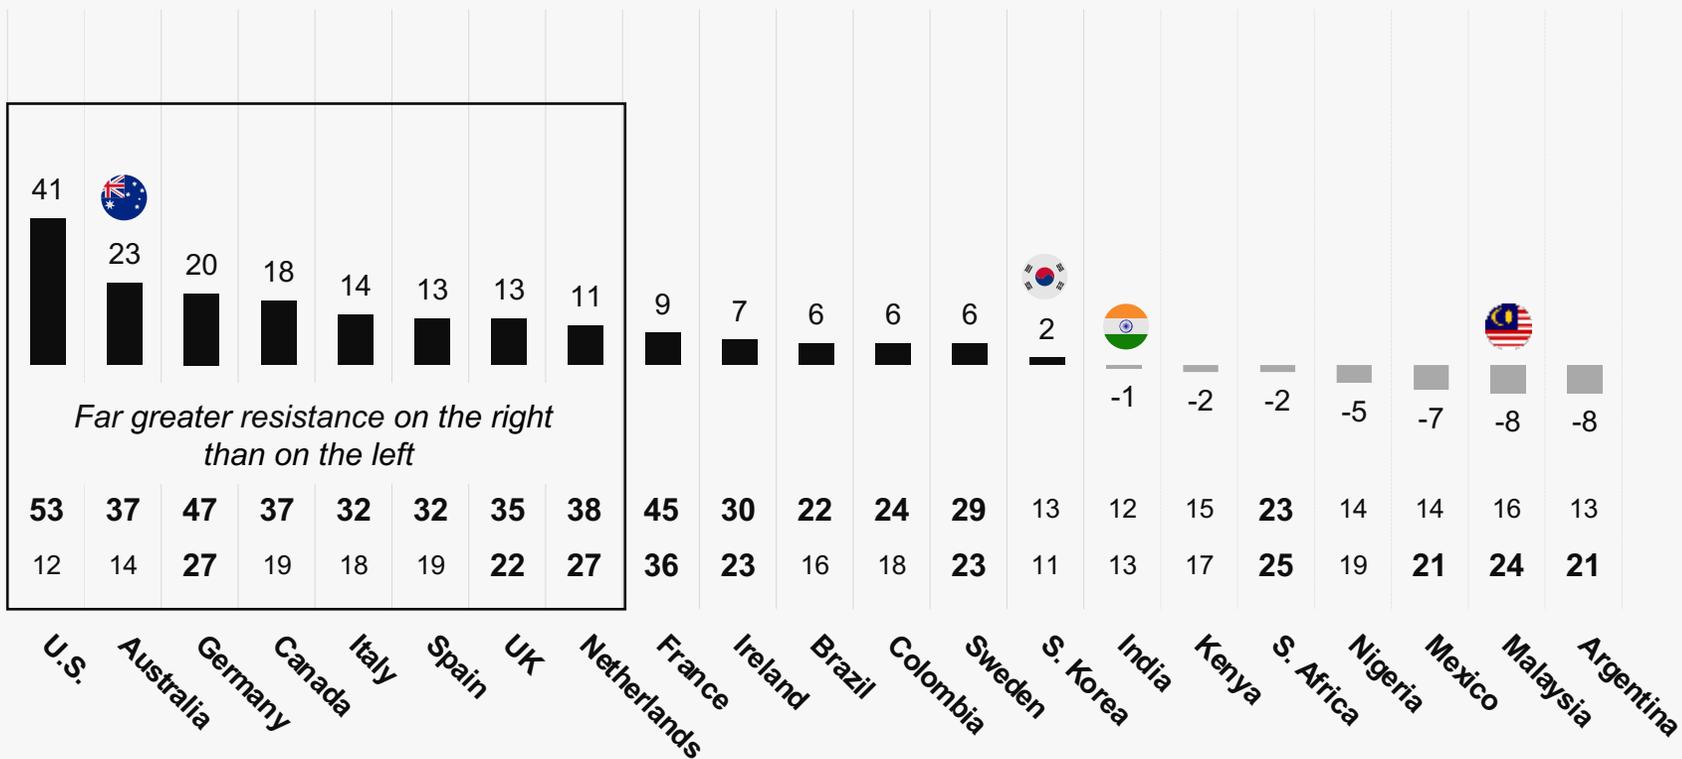

Difference in innovation rejection
between those who lean right or left politically

Political leaning

Right

Left

7 pts

Far greater resistance on the right than on the left

bold font indicates
20% or more reject innovation

2024 Edelman Trust Barometer. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; Data is showing the percent of respondents who, on average, rejected innovation when looking at the mean scores "acceptance ratings" for each of the four innovations, and the differences between those who lean left or right politically. Those that rejected innovation averaged a score between 1 and 2.49 on the 5-point scale. General population, 21-mkt avg., by political leaning. Political leaning is not asked in China, Saudi Arabia, Thailand or the UAE. Indonesia, Japan, and Singapore are excluded from the analysis due to having sample sizes too low to report (less than n100).

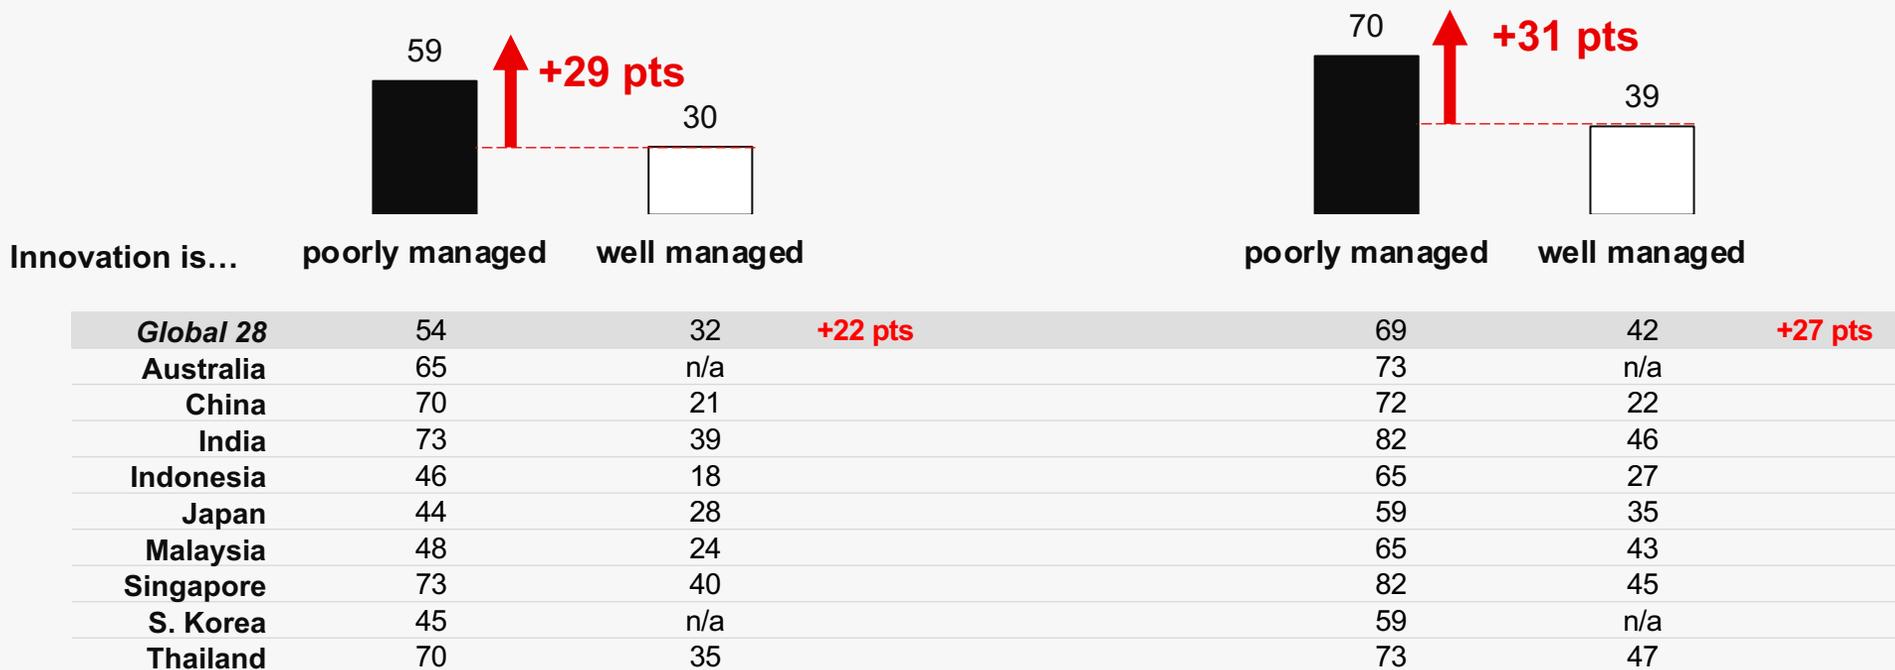

When Institutions Mismanage Innovation, We Feel Both Technology and Society Are Leaving Us Behind

Percent who say

APAC

Technology is changing too quickly, in ways that are not good for people like me

Our society is changing too quickly and not in ways that benefit people like me

2024 Edelman Trust Barometer. POP_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. General population, 28-mkt avg. and APAC region, by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

The base sizes for the "well managed" segments in Australia and S. Korea are too low to report (less than n100 respondents).

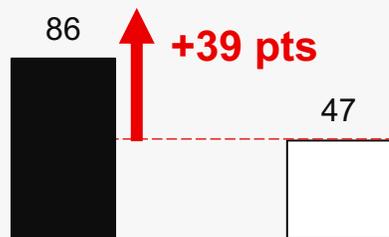

When Institutions Mismanage Innovation, Fairness and Capitalism in Question

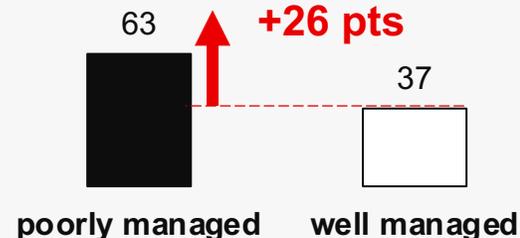

Percent who say

APAC

The system is
biased in favour of the rich

Capitalism as it exists today
does more harm than good in the world

Innovation is... poorly managed well managed

	poorly managed	well managed	Change	poorly managed	well managed	Change
Global 28	82	53	+29 pts	57	40	+17 pts
Australia	86	n/a		59	n/a

India	91	46		73	45	
Indonesia	93	64		72	47	
Japan	82	41		43	13	
Malaysia	89	41		76	51	
Singapore	81	30		63	28	
S. Korea	80	n/a		39	n/a	
Thailand	92	65		76	43	

2024 Edelman Trust Barometer. POP_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is "not at all true" and nine means it is "completely true". 9-point scale; top 4 box, true. TMA_SIE_SHV. Please indicate how much you agree or disagree with the following statements. 9-point scale; top 4 box, agree. Attribute asked of half the sample. General population, 28-mkt avg. and APAC region, by the innovation management scale. For a full explanation of how the Innovation Management Scale was developed, please see the Technical Appendix.

The base sizes for the "well managed" segments in Australia and S. Korea are too low to report (less than n100 respondents).

A Reset for Science in Society

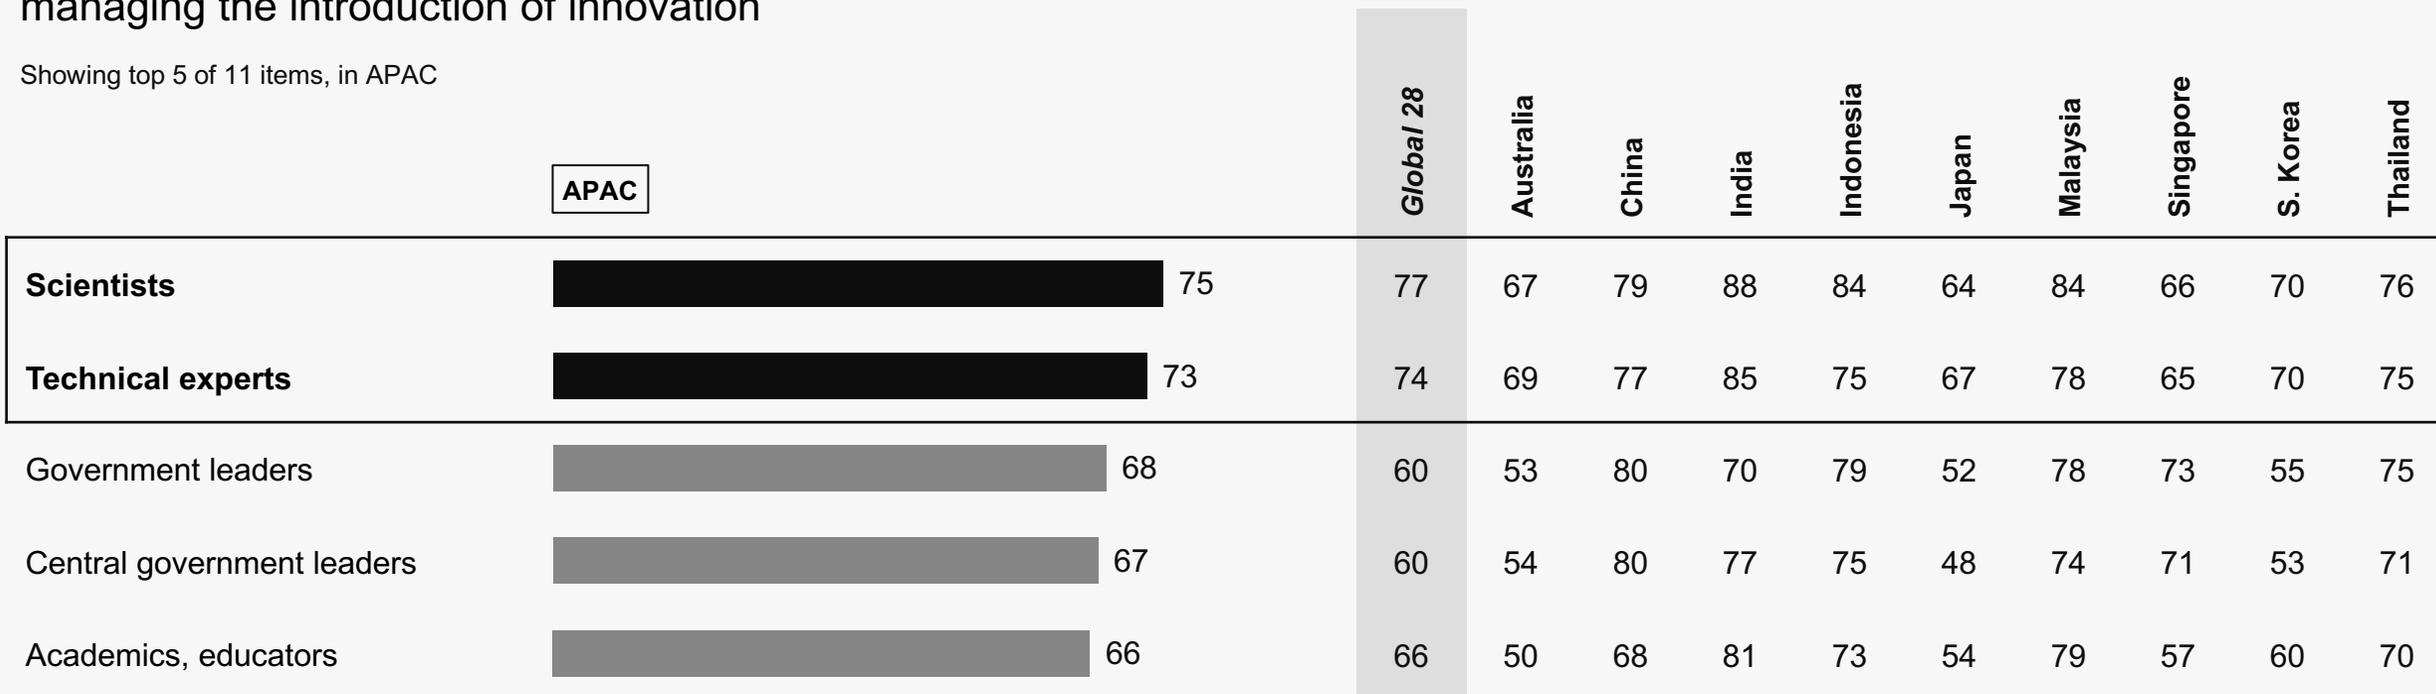

Scientists and Experts Expected to Lead on Implementation of Innovation

Percent who say

I believe each **should have a big role** in managing the introduction of innovation

Showing top 5 of 11 items, in APAC

2024 Edelman Trust Barometer. RSP_TEC_CHG. How big a role do you feel each of the following should have in ensuring that the introduction of new technologies and innovations is well-managed (e.g., they are safe, understood by the public, beneficial to society as a whole, and accessible to the people who need them)? 5-point scale; top 2 box, a big or huge role. Question asked of half the sample. General population, 28-mkt avg and APAC region. Data is showing the top 5 roles, with ties broken by decimal, with APAC.

To Earn My Acceptance, Show Me the Innovation Is Vetted by Scientists and Ethicists

Average acceptance rating

for each innovation

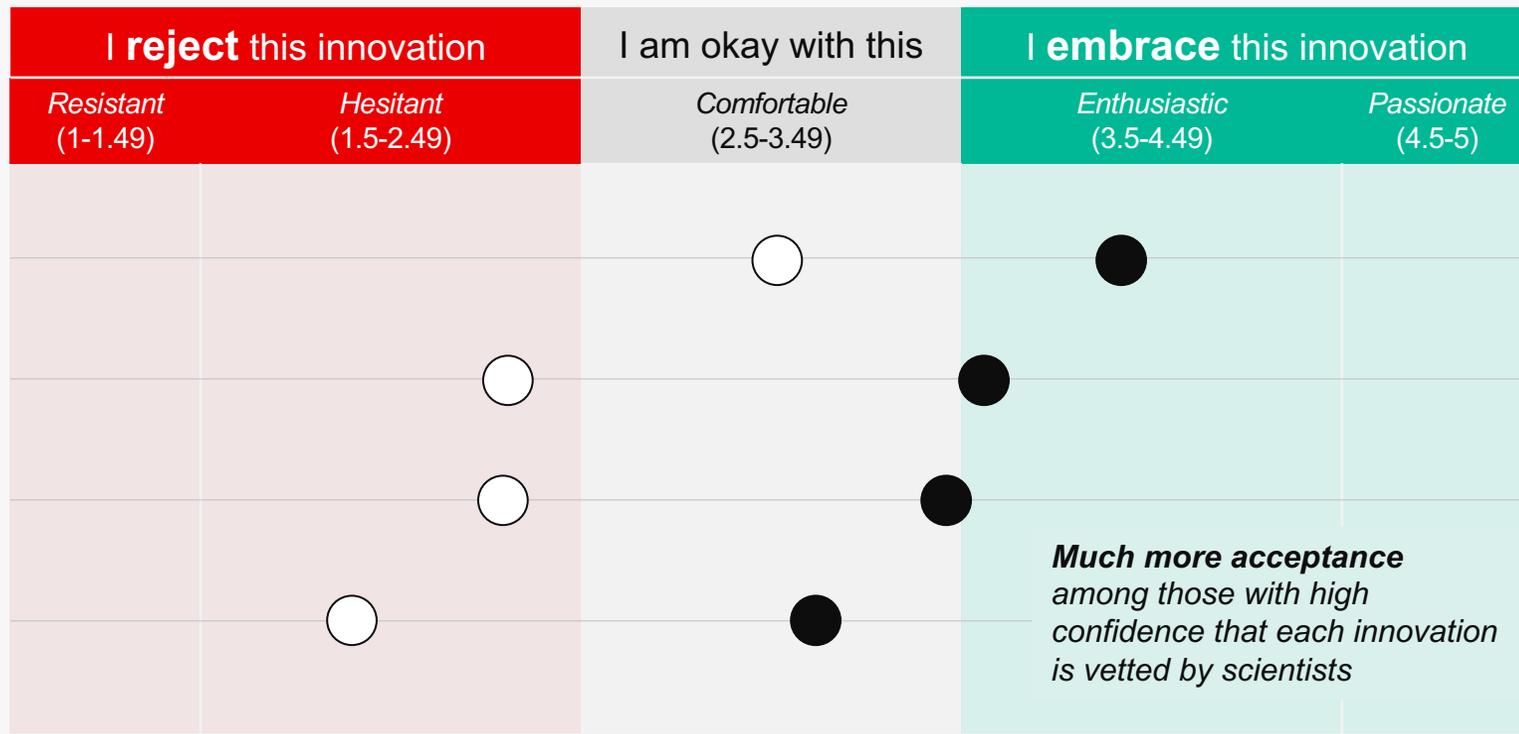

GLOBAL 28

Among those who have

○ low ● high

confidence that each innovation has been **evaluated by scientists and ethicists**

Green energy
AI
Gene-based medicine
GMO foods

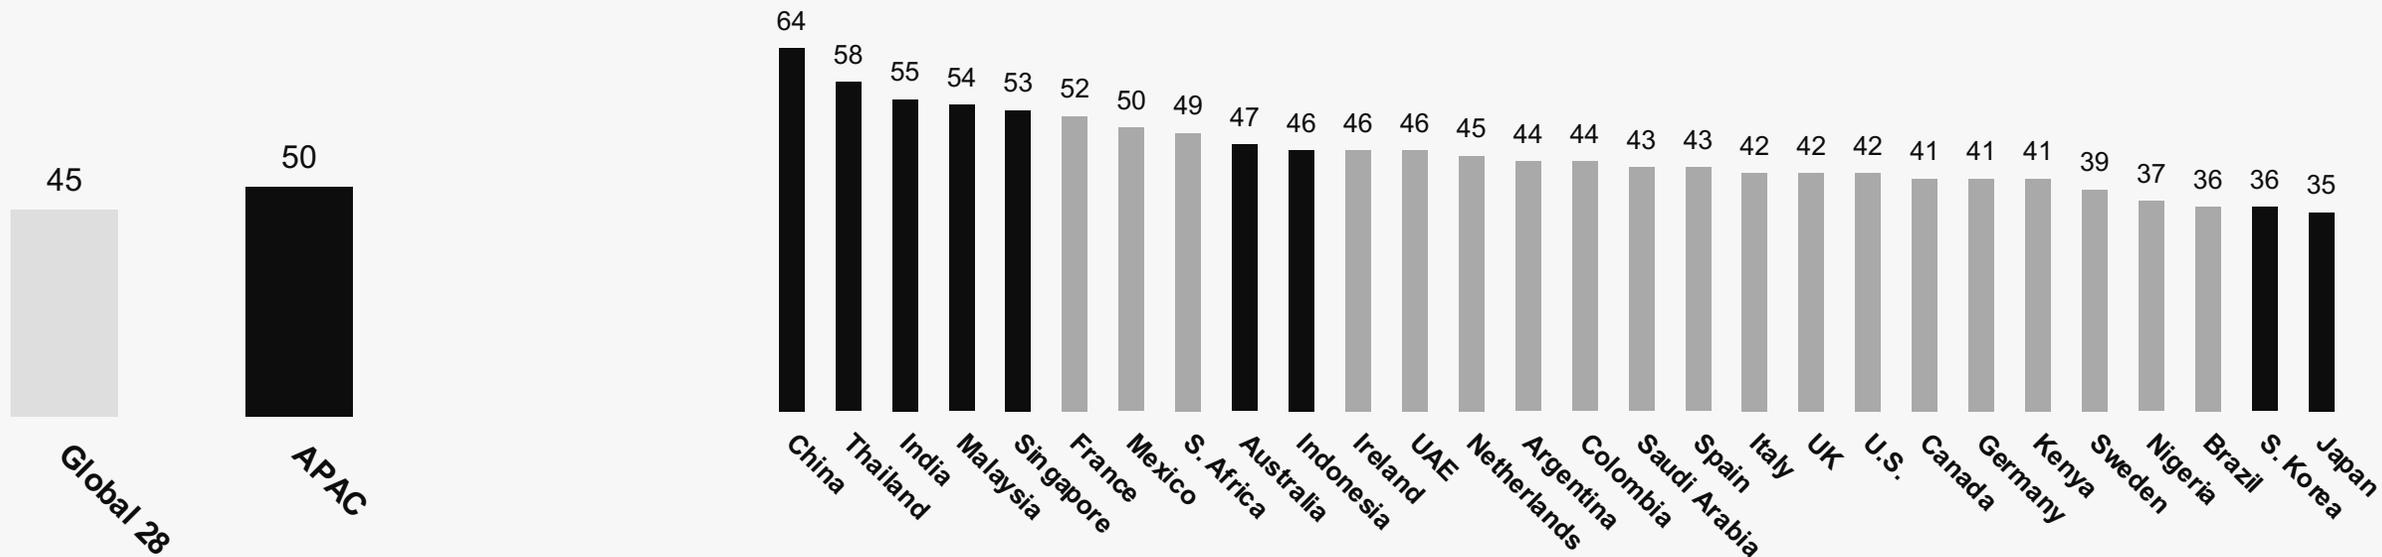

2024 Edelman Trust Barometer. TEC_TST. How confident are you that these technologies have been adequately tested, evaluated, and assessed by scientists, ethicists, and other experts? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

Make the Science Transparent and Accessible to the Public

Percent who agree

Scientists do not know how to communicate with people like me

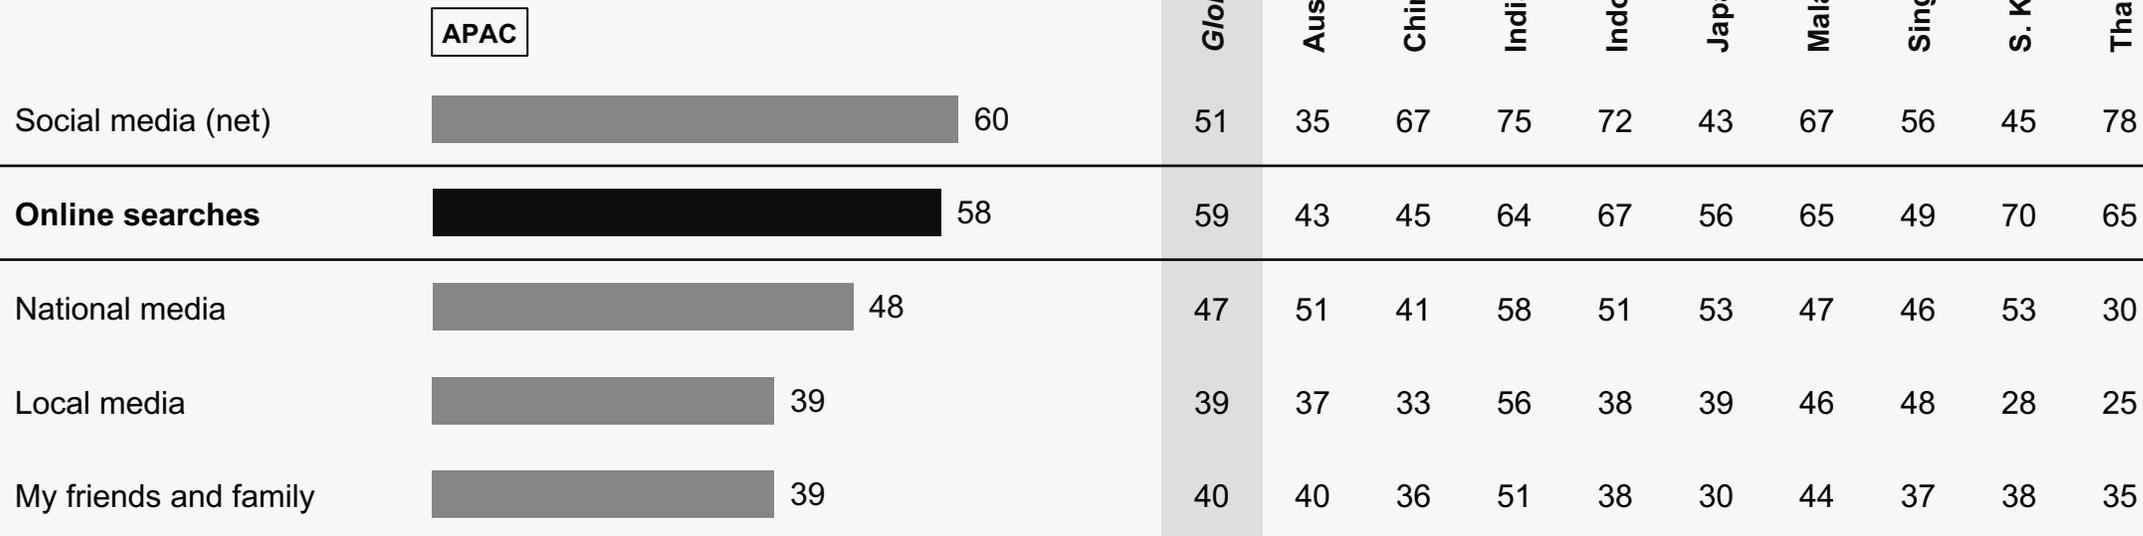

I'm Doing My Own Research: Help Me Find Information I Can Trust

Percent who say

This is where I get most of my information about new technologies and innovations

Showing top 5 of 9 items, in APAC

2024 Edelman Trust Barometer. INO_INF_SRC. Where do you get most of your information and knowledge about new technologies and innovations from? Pick all that apply. Question asked of half the sample. General population, 28-mkt avg and APAC region. "Social media" is a net of "My social media news feed" and "On social media posted by, or forwarded from, someone in my social network". Data is showing the top 5 sources, with ties broken by decimal, within APAC.

To Be Trusted With Innovation, Be Transparent and Give Me a Voice

Percent who say this is **important** to earning or keeping their trust in each institution to be good managers of change, showing the top 3 actions in APAC

Across most institutions, listening and communication are top trust-building actions within APAC

Business	Global 28	APAC
Keep innovations affordable	84	83
Communicate pluses and minuses	83	82
Work with government to develop regulations	80	81

NGOs	Global 28	APAC
Aid the vulnerable	79	79
Help people keep up	78	77
Hear our concerns, let us ask questions	78	77

Government	Global 28	APAC
Communicate pluses and minuses	80	80
Ensure our future prosperity	80	80
Hear our concerns, let us ask questions	82	80

Media	Global 28	APAC
Communicate pluses and minuses	81	81
Investigate innovations	80	81
Hear our concerns, let us ask questions	81	80

2024 Edelman Trust Barometer. INS_CHG_PER. If [Institution] wants to earn or keep your trust in their being good stewards or managers of change, how important is it that they do each of the following in response to the technological and social changes taking place in your country today? 6-point scale; top 3 box, moderately or more important. Media and NGOs were only asked of half the sample. General population, 28-mkt avg and APAC region. Data showing the top 3 trust-building actions, with ties broken by decimal, among APAC.

To Earn My Acceptance, Give Us Control Over the Impact of Innovations

Average acceptance rating
for each innovation

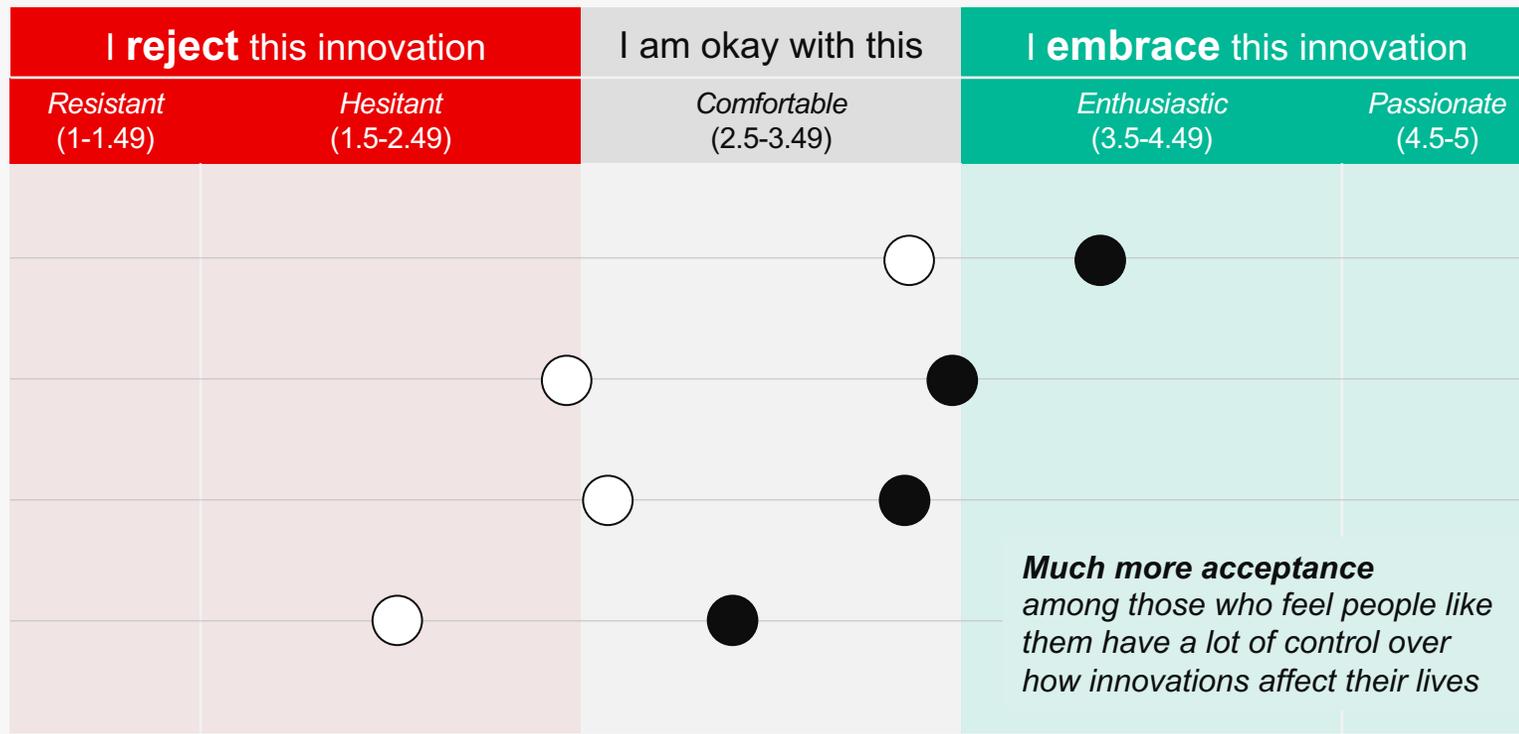

GLOBAL 28

Among those who believe
“people like me” have

○ little
● a lot of

control over how
these innovations
affect their lives

Green energy
AI
Gene-based medicine
GMO foods

2024 Edelman Trust Barometer. TEC_INF. How much influence or control do you feel people like you have over how these technologies are used in ways that might affect their lives? 5-point scale; top 2 box, a lot of control; bottom 2 box, a little control. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of control. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

Restoring Trust in the Promise of Innovation

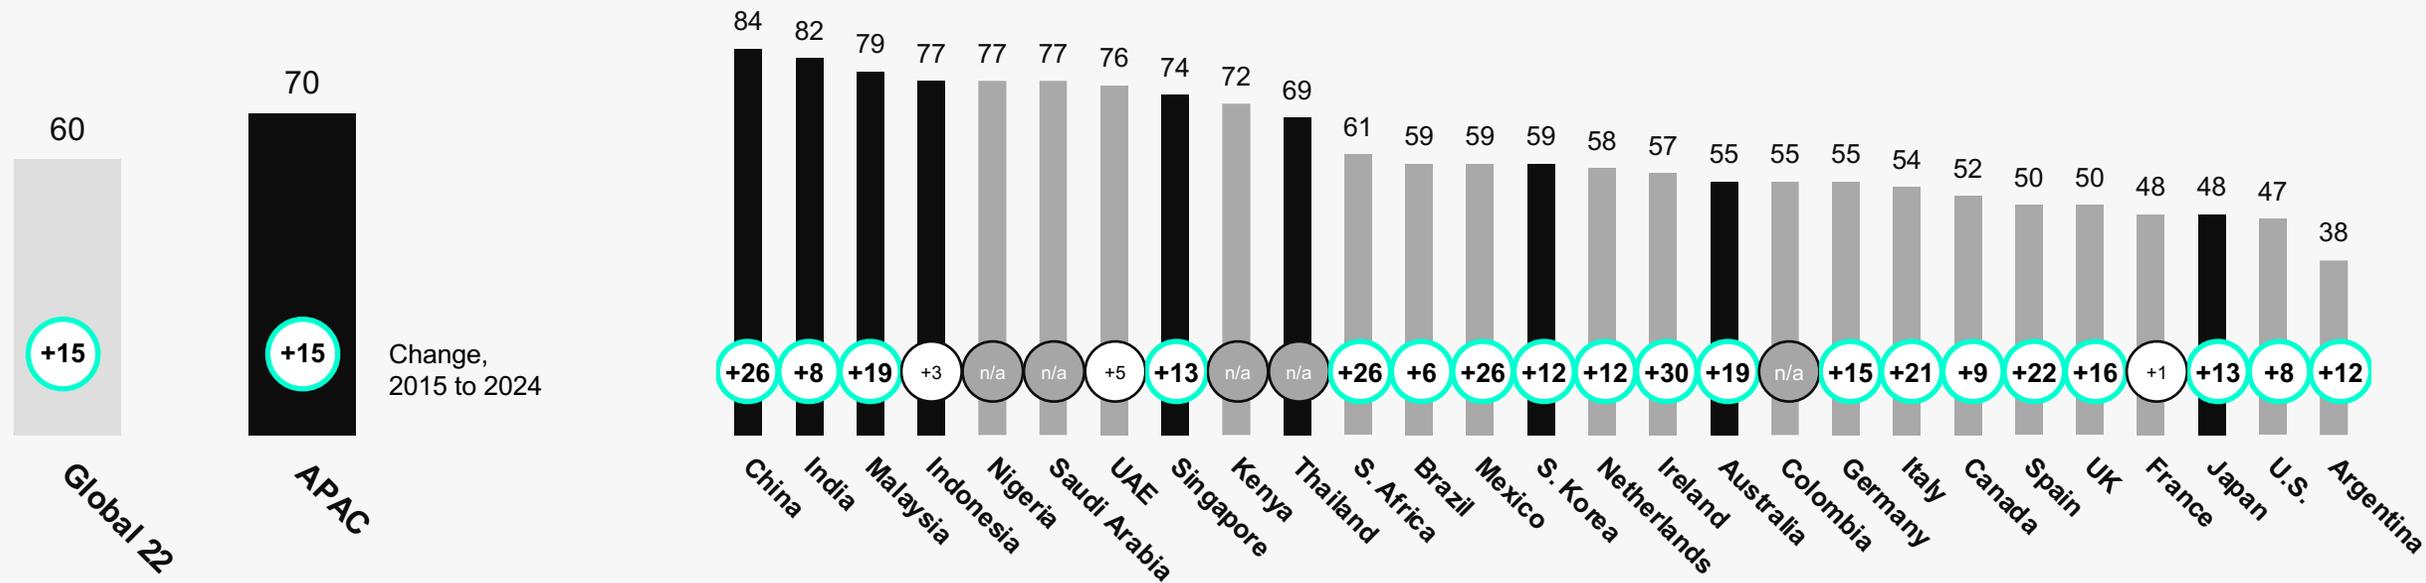

Over Past Decade, Demand for Business-Government Partnership on Innovation Surges

Percent who say

2015 to 2024 ○ Significant change

If business partners with government, I would trust it more with technology-led changes

2024 Edelman Trust Barometer. INS_PTN. Below are a number of actions that could impact your trust in business and industry to develop and implement technology-led changes. What impact would each of these actions have on your trust? 9-point scale, top 4 box, trust business and industry more. General population, 22-mkt avg. and APAC region. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Confidence in Effective Regulation Drives Adoption

Average acceptance rating

for each innovation

GLOBAL 28

Among those who have

○ low ● high

confidence that each innovation is **effectively regulated**

Green energy
AI
Gene-based medicine
GMO foods

2024 Edelman Trust Barometer. TEC_SAF. How confident are you that each of the following is being effectively regulated? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

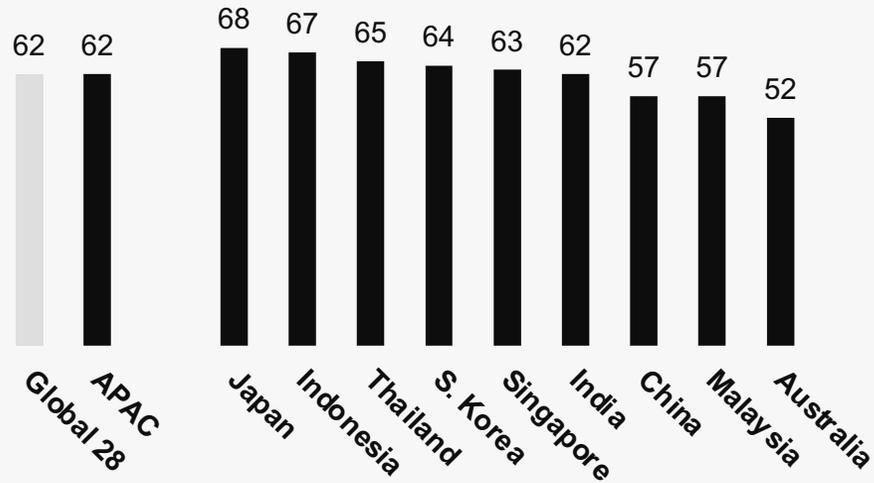

CEOs: Address Impacts of Innovation in Society

Percent who say

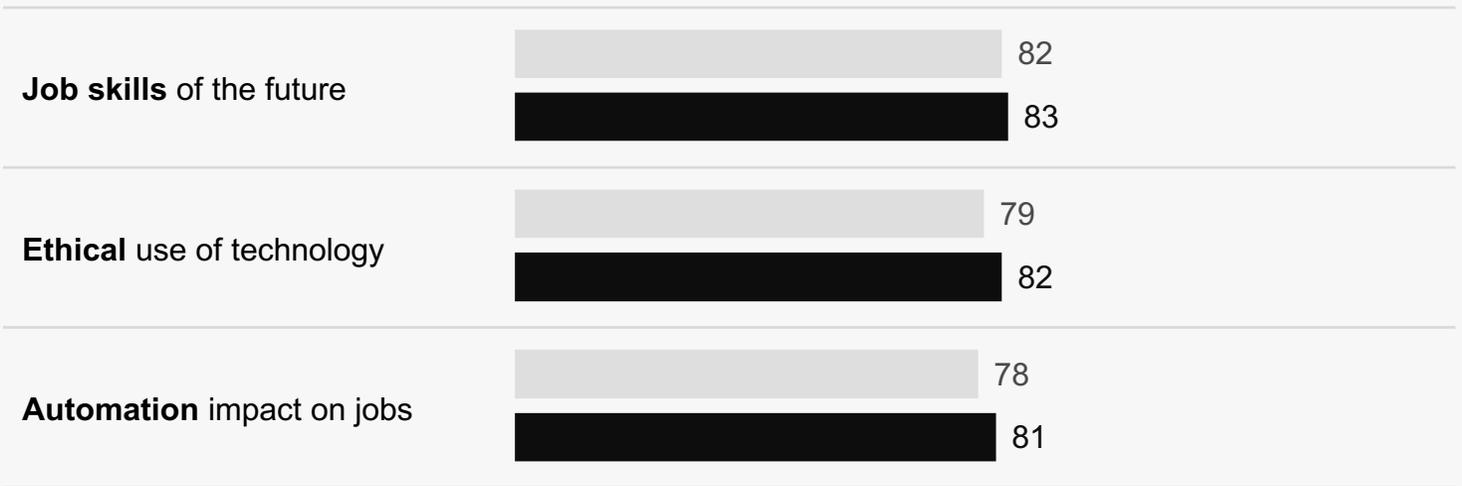

Global 28 APAC

I expect CEOs to **manage changes occurring in society**, not just those occurring in their business

Among employees,

It is important to me that **my CEO speaks publicly** about issues such as:

2024 Edelman Trust Barometer. CEO_RSP_CHOICE. You are about to see two choices. We want you to choose the one that best describes your beliefs. Question asked of half the sample. CEO_ISS. How important is it to you that the CEO or head of the organization you work for speaks out publicly about each of the following issues? 9-point scale; top 4 box, important. Question asked of those who are an employee of an organization (Q43/1). General population, 28-mkt avg and APAC region.

Show Me How Innovation Will Bring Us a Better Future

Average acceptance rating

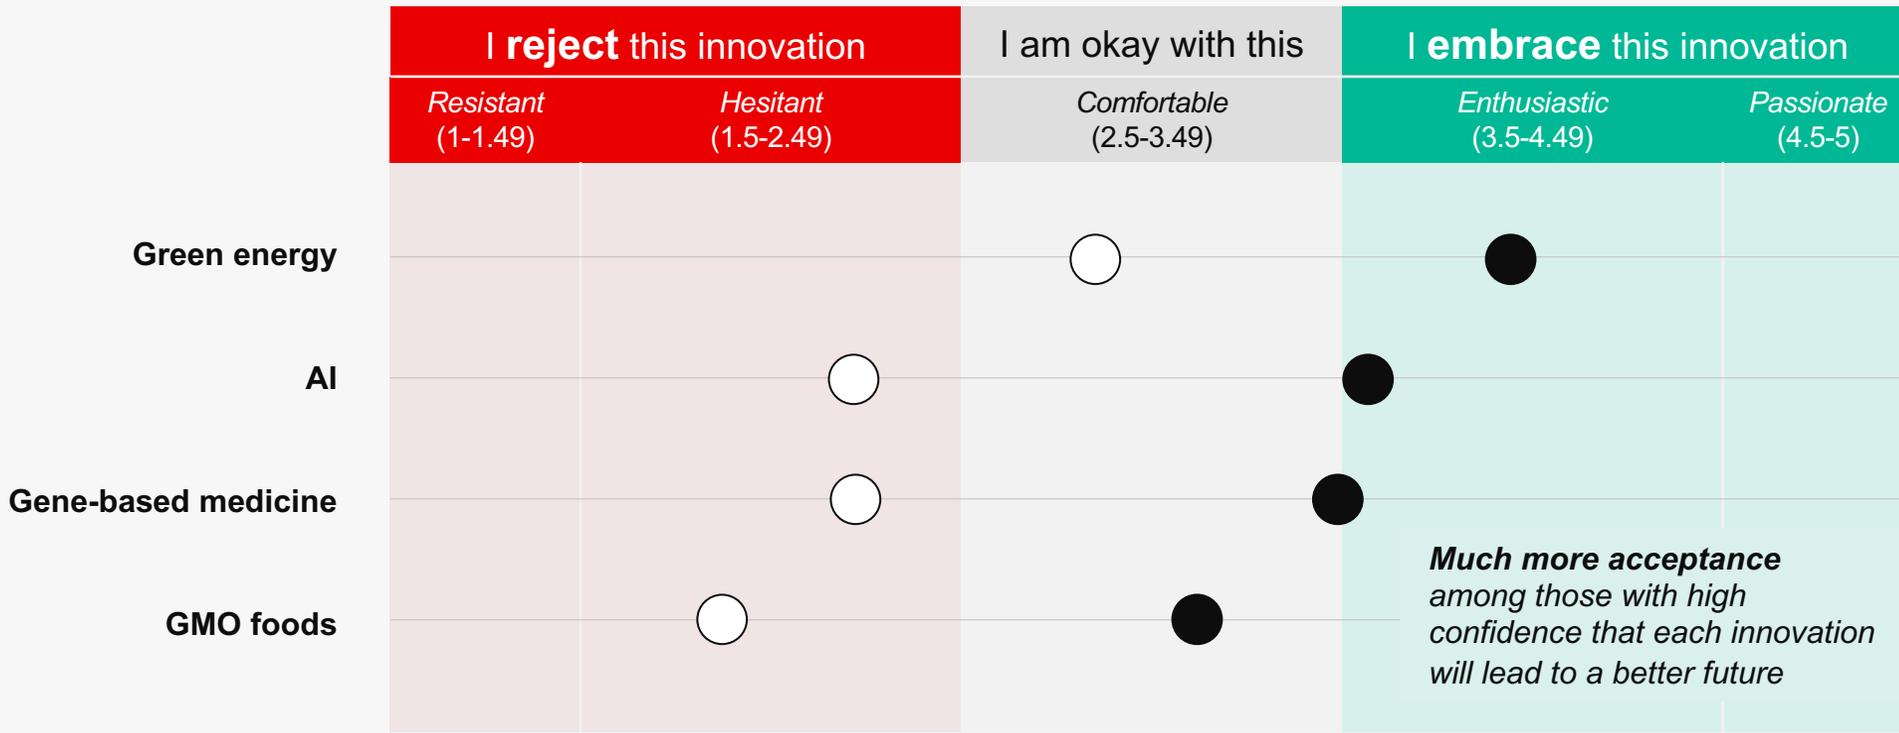

for each innovation

GLOBAL 28

Among those who have

○ low ● high

confidence that each innovation **will lead to a better future**

2024 Edelman Trust Barometer. TEC_FUT. How confident are you that these technologies will lead us to a better future? 5-point scale; top 2 box, high confidence; bottom 2 box, low confidence. Question asked of half the sample. CHG_TEC_COM. How would you characterize your feelings about each of the following? 5-point scale; data plotted is an average acceptance rating for each innovation. General population, 28-mkt avg., by level of confidence. For a full explanation of how the Average Acceptance Rating was calculated, please see the Technical Appendix.

Restoring Trust in the Promise of Innovation

1

Implementation as important as invention

Mismanaged innovations are as likely to divide as advance society. With breakthroughs like AI, vaccines, and green energy on the line, explaining the science and managing impact is essential.

2

Business and Government must urgently partner

Business is most trusted to introduce innovation into society, but this will be more effectively achieved in partnership with government. CEOs must demonstrate the broader societal impact innovation brings.

3

Science must integrate with society

Scientists are still trusted—but increasingly subject to public scrutiny. To build trust in expert recommendations, explain the research, engage in dialogue, and harness peer voices as advocates.

4

Give me control over my future

When people feel in control over how innovations affect their lives, they are more likely to adopt them, not resist them. Listen for concerns, be open to questions.

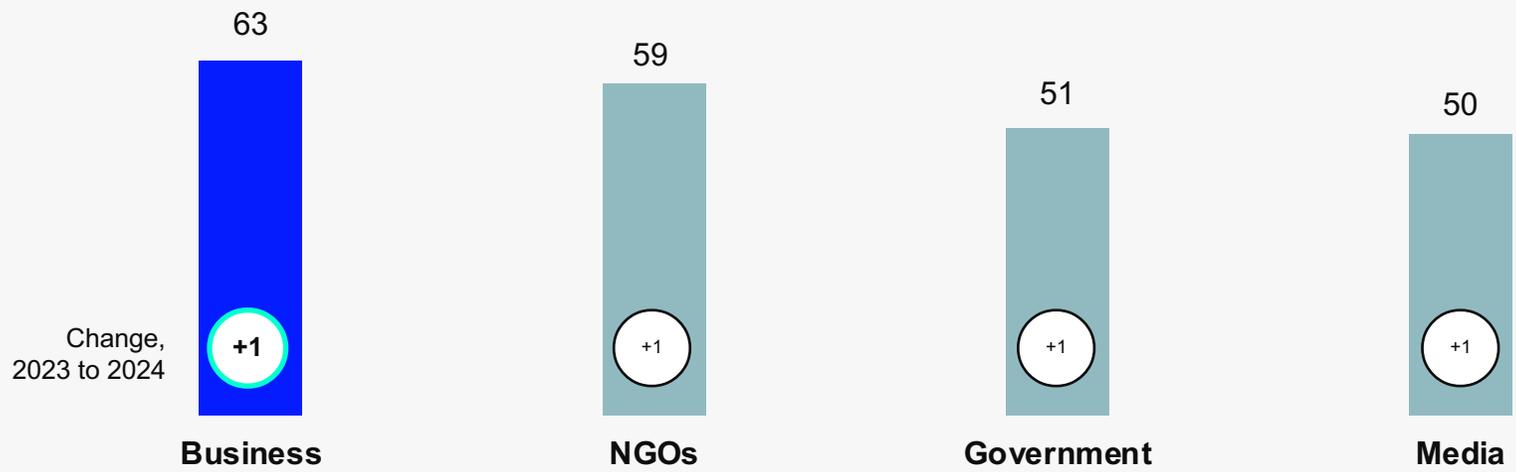

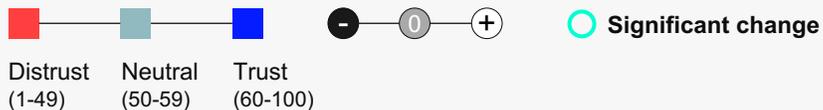

Supplemental Data

Business Remains Only Trusted Institution

Percent trust

GLOBAL 28

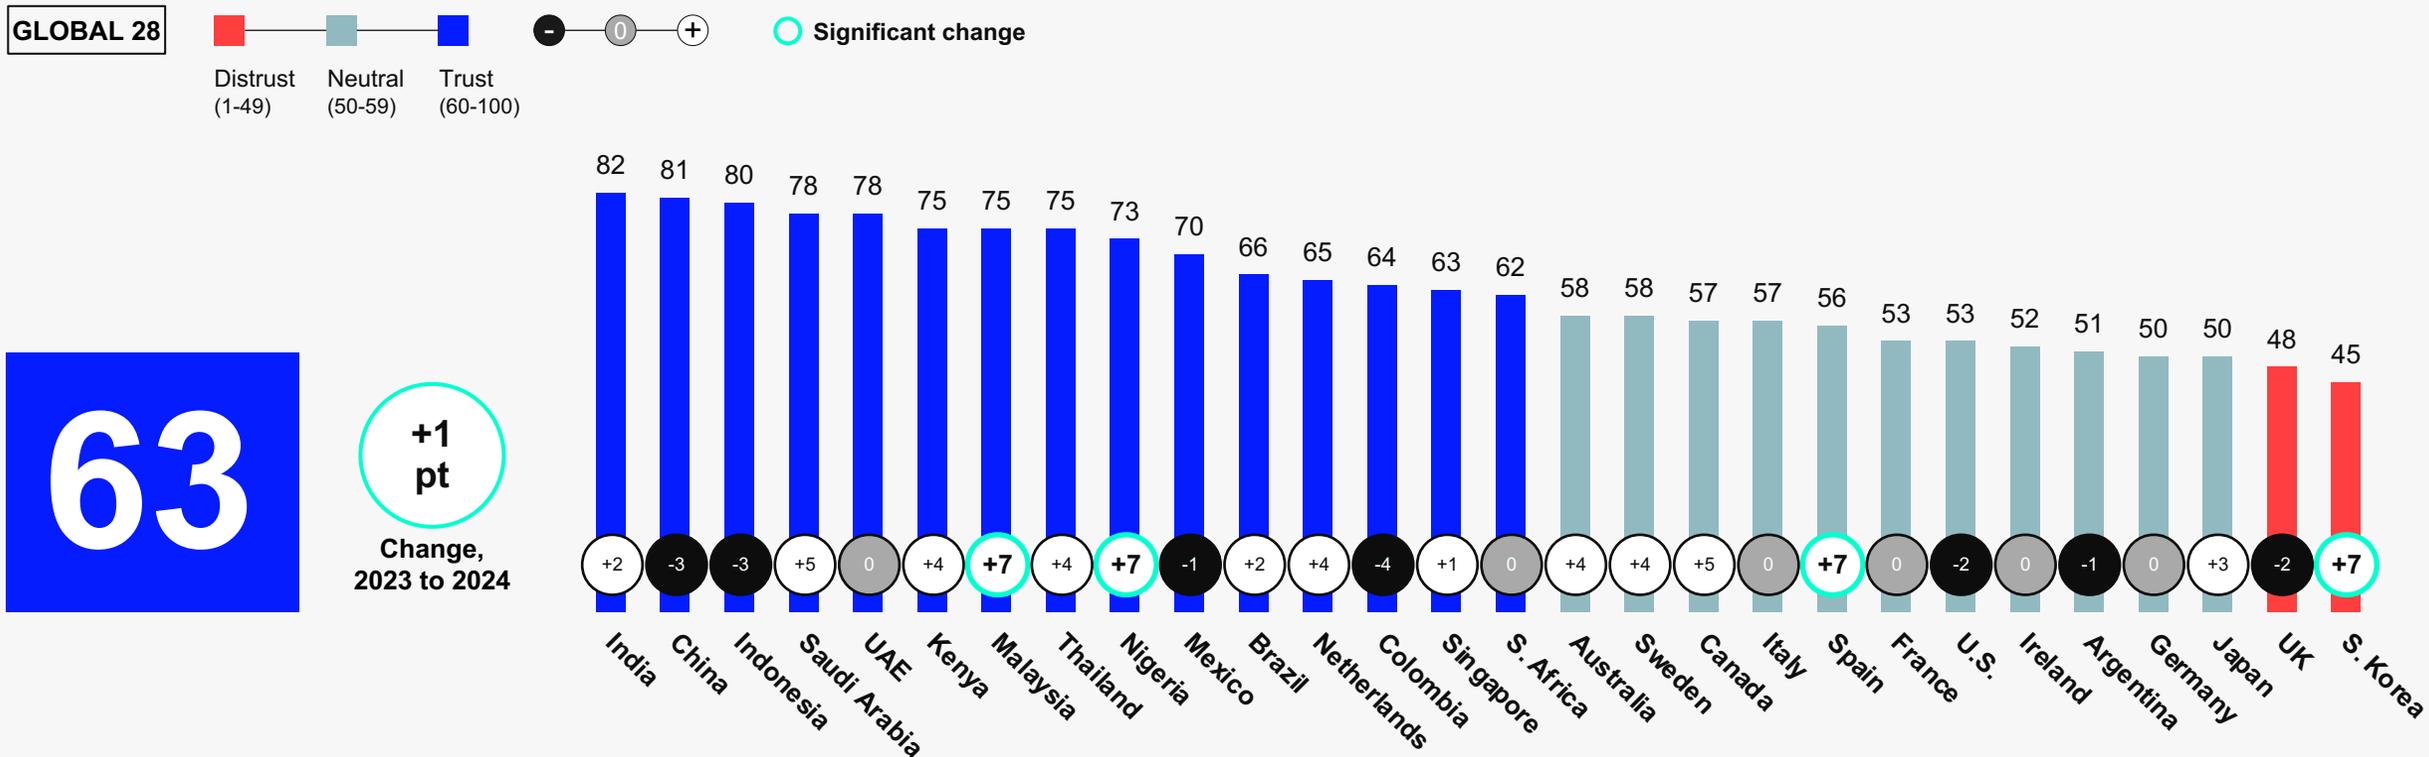

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 Trust Index has been imputed using a model. For more details, please see the Technical Appendix.

Business Trusted in 15 of 28 Countries

Percent trust in business

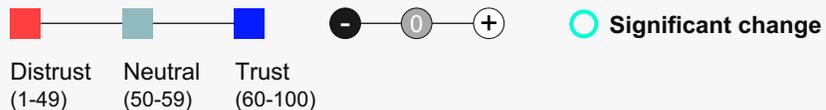

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

NGOs Trusted in 12 of 28 Countries

Percent trust in NGOs

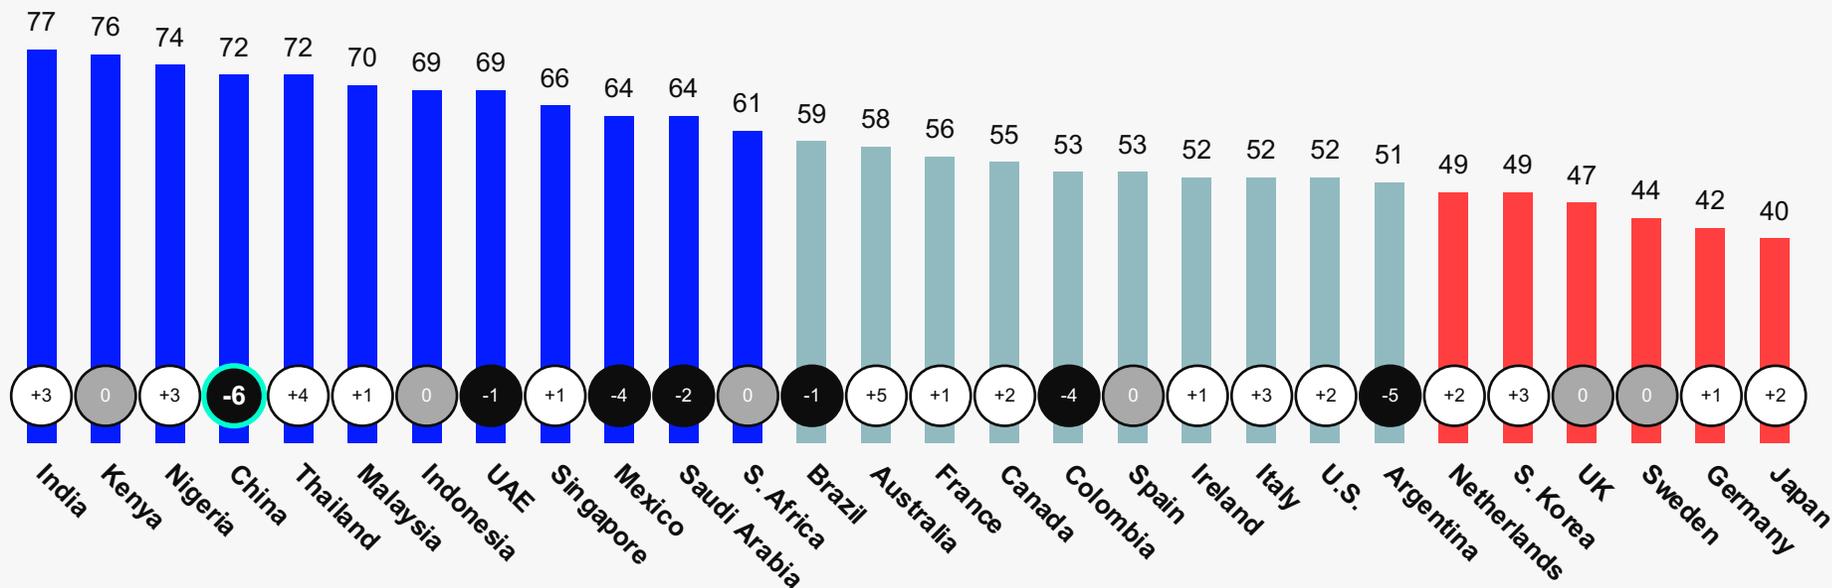

GLOBAL 28

59

+1 pt

Change, 2023 to 2024

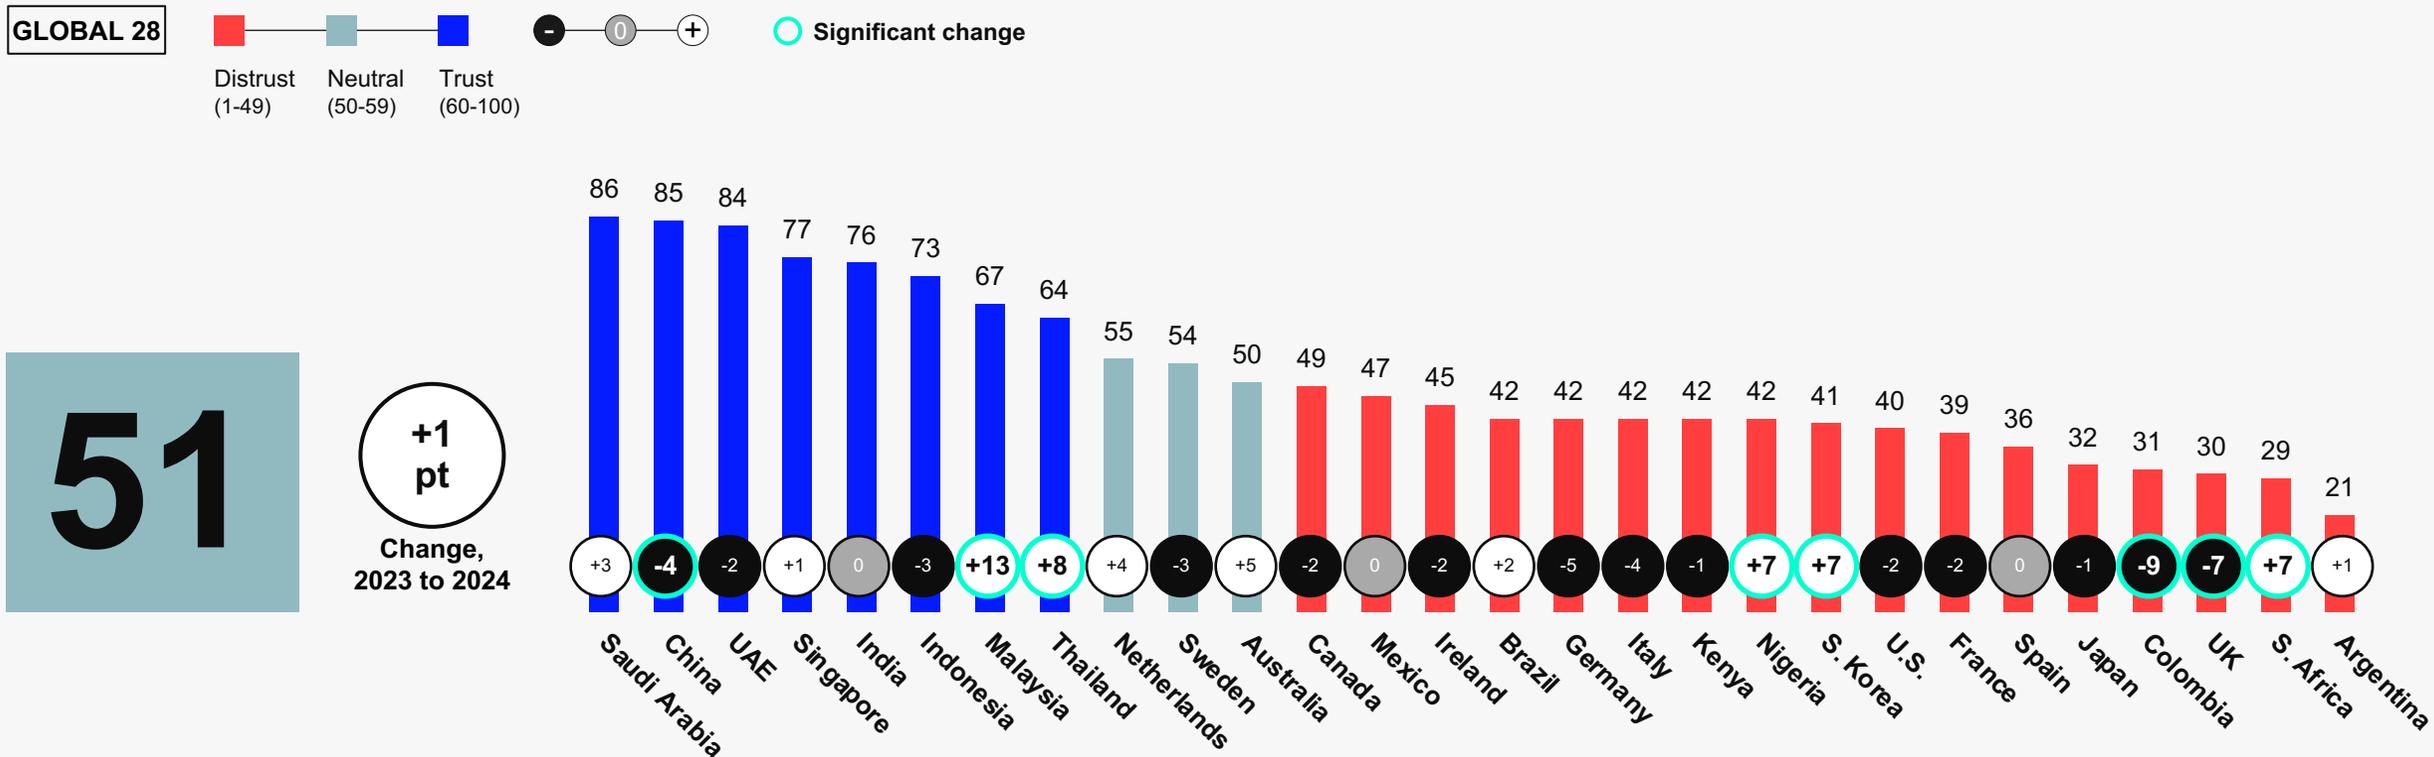

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Government Distrusted in 17 of 28 Countries

Percent trust in government

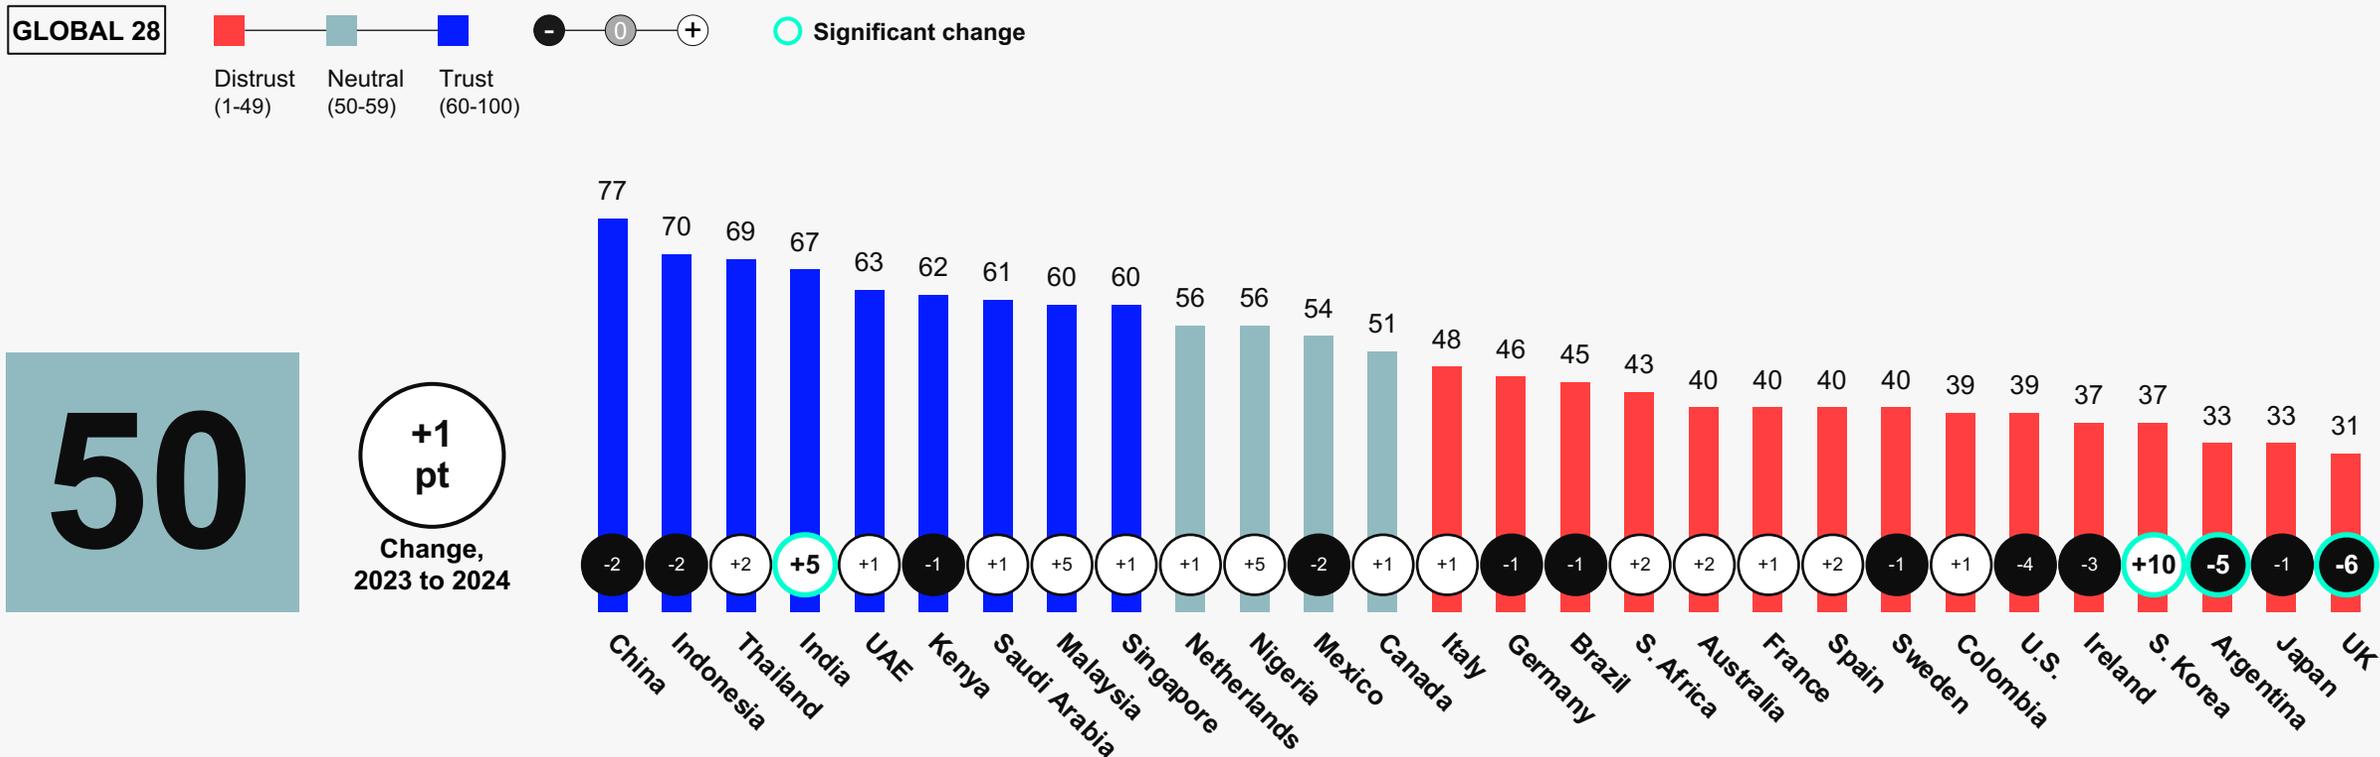

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Due to a translation inconsistency in France, the 2023 government in general data has been imputed using a model. For more details, please see the Technical Appendix.

Media Distrusted in 15 of 28 Countries

Percent trust in media

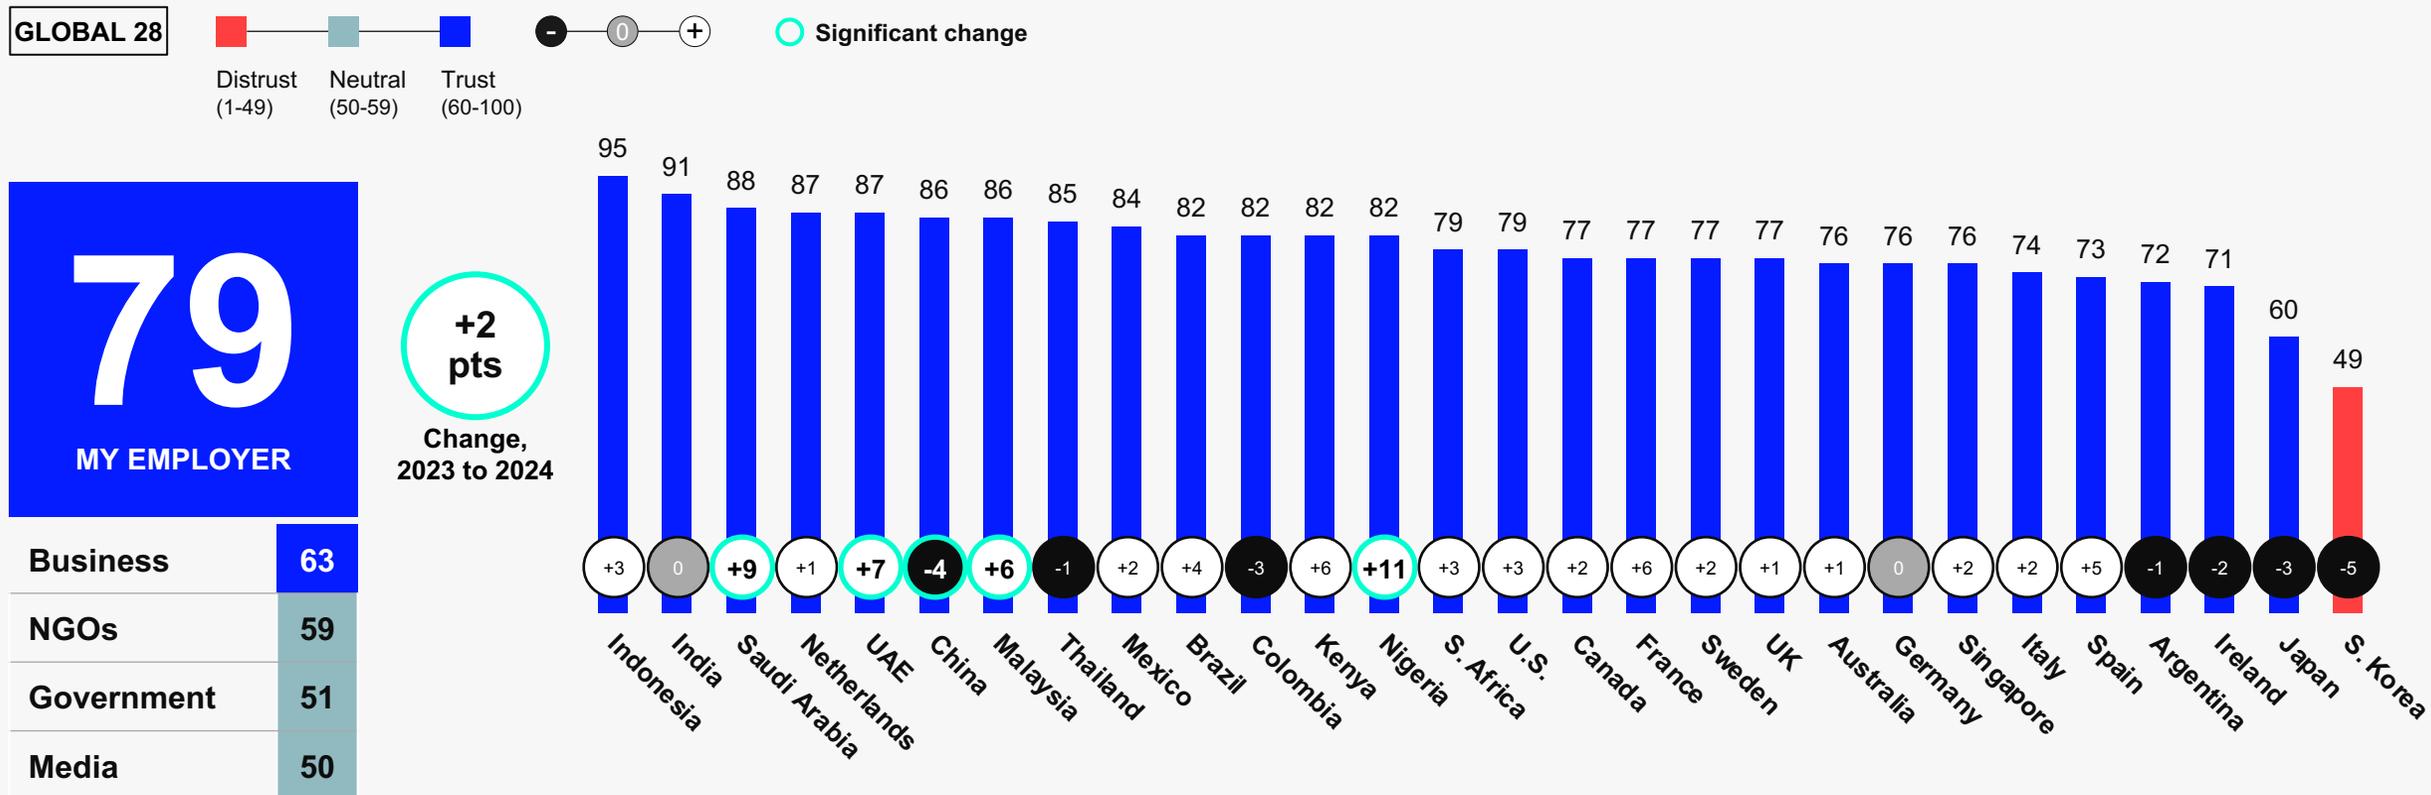

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

For S. Korea, the language used in 2023 for “media” translated to “press.” In 2024 it was adjusted to translate as “media.”

My Employer Trusted in 27 of 28 Countries

Percent trust

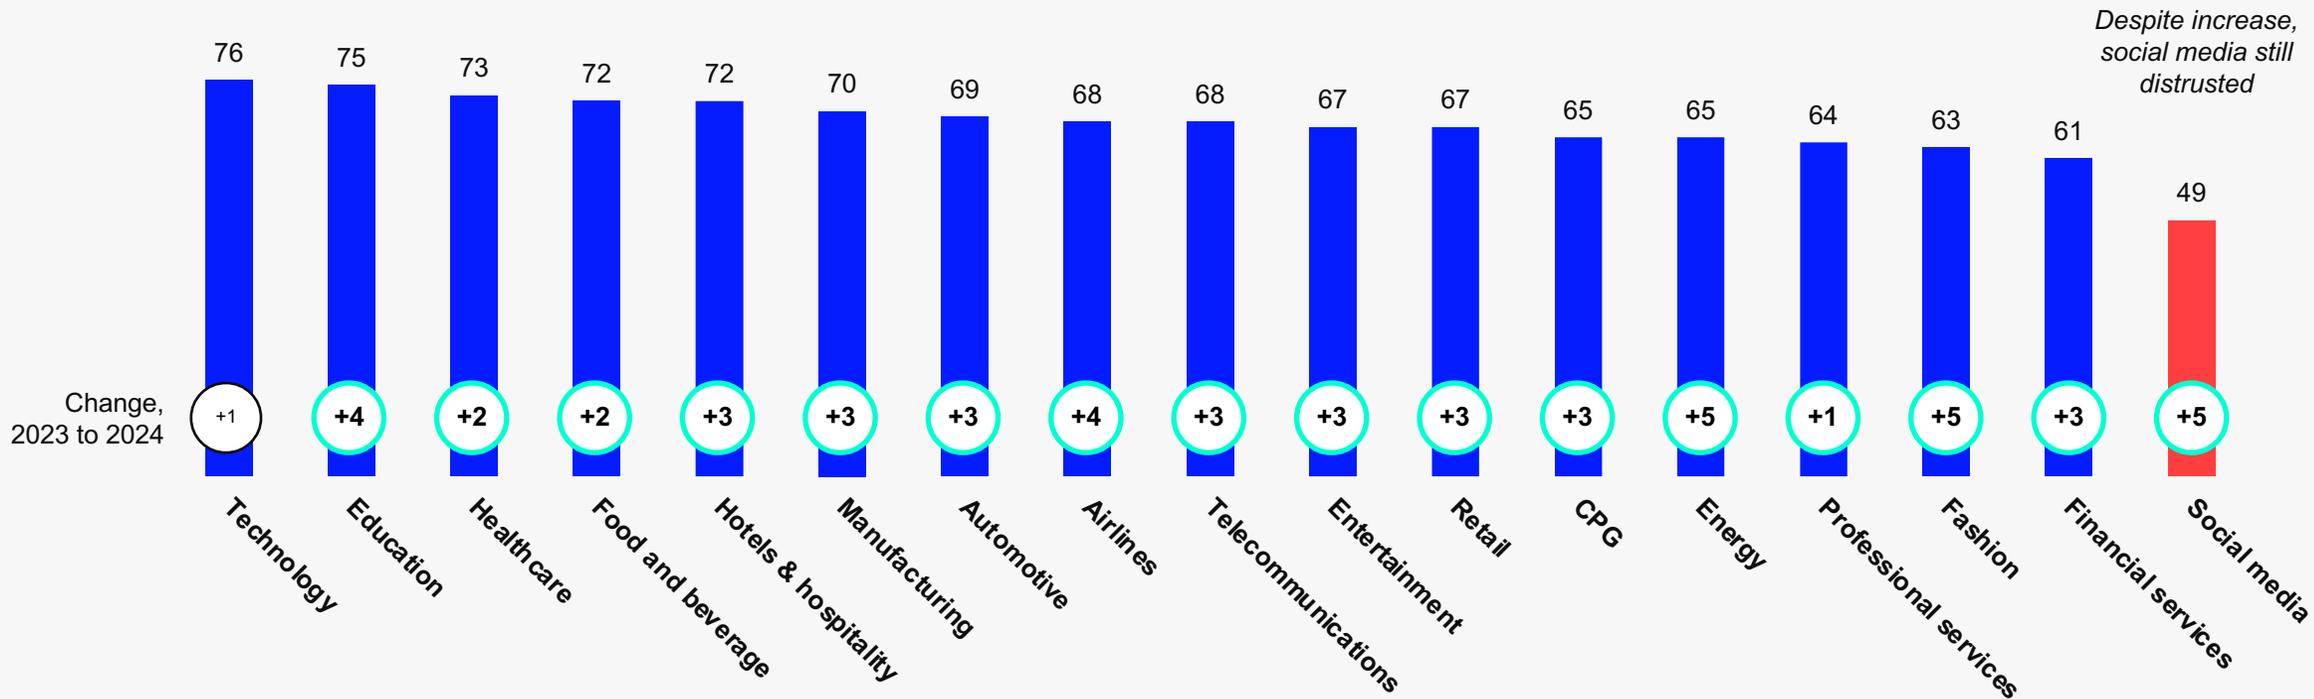

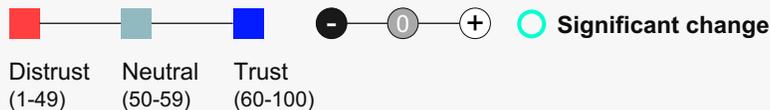

2024 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. "Your employer" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Significant Trust Increases Across Most Industry Sectors

Percent trust in businesses in the following industries to do what is right

GLOBAL 25 Excludes Mexico, S. Africa, U.S.

2024 Edelman Trust Barometer. TRU_IND. Please indicate how much you trust businesses in each of the following industries to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 25-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

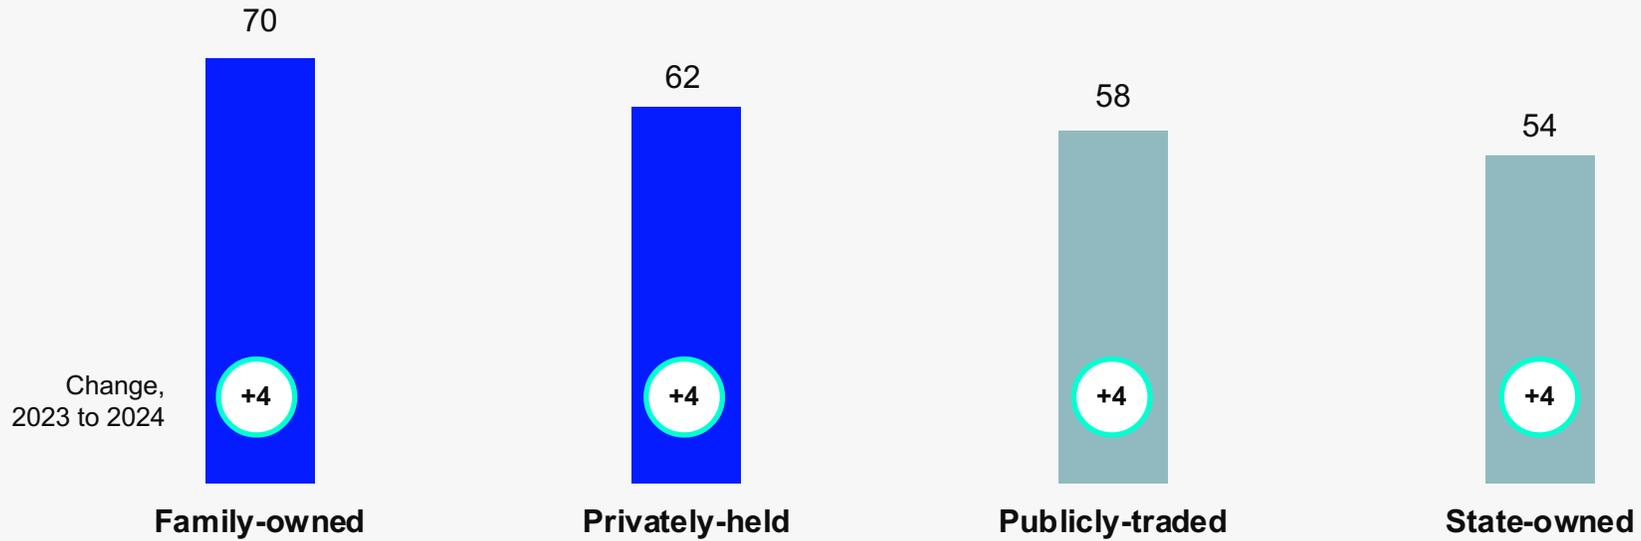

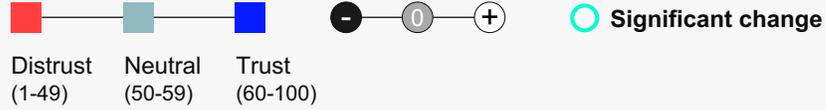

In S. Africa, the Afrikaans translation for "Food and beverage" was updated in 2024. In Mexico and the U.S., the Spanish translation for "Automotive" was updated in 2024. These language changes mean the 2024 data cannot be compared to data from previous years and have been removed from this analysis for all sectors to ensure a consistent global average is shown for each.

Family-Owned Businesses Most Trusted

Percent trust in each type of business to do what is right

GLOBAL 28

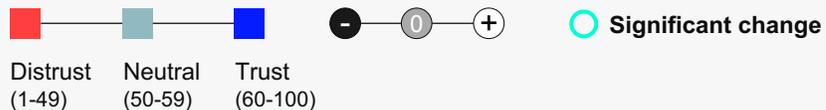

2024 Edelman Trust Barometer. TRU_ORG. Thinking about different types of businesses, please indicate how much you trust each type of business to do what is right. 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

European Union Distrusted in 12 of 28 Countries

Percent trust in the European Union

Trust in People

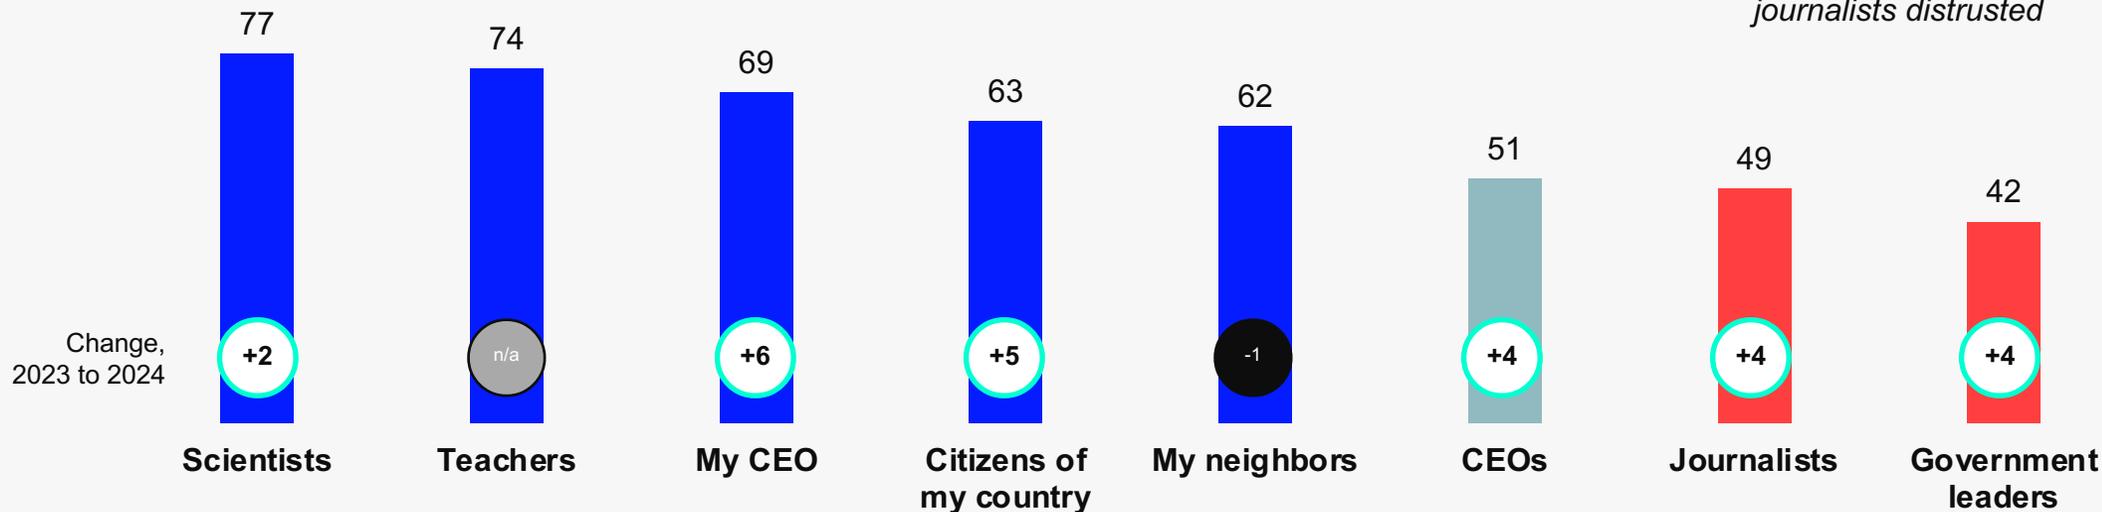

Percent trust to do what is right

GLOBAL 25 excl China, Singapore, Sweden

Greatest trust increase for employer CEOs

Government leaders and journalists distrusted

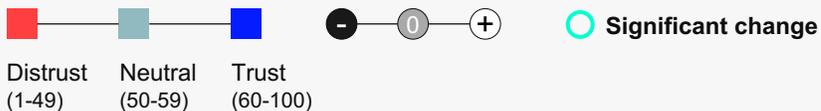

2024 Edelman Trust Barometer. TRU_PEP. Below is a list of groups of people. For each one, please indicate how much you trust that group of people to do what is right. 9-point scale; top 4 box, trust. Attributes asked of half the sample. General population, 25-mkt avg. "My CEO" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Sweden, the Swedish translation for "Government leaders" was updated in 2024. In China and Singapore, the Chinese translation for "Journalists" was updated in 2024. These language changes mean the 2024 data cannot be compared to data from previous years and have been removed from this analysis for all items to ensure a consistent global average is shown for each.

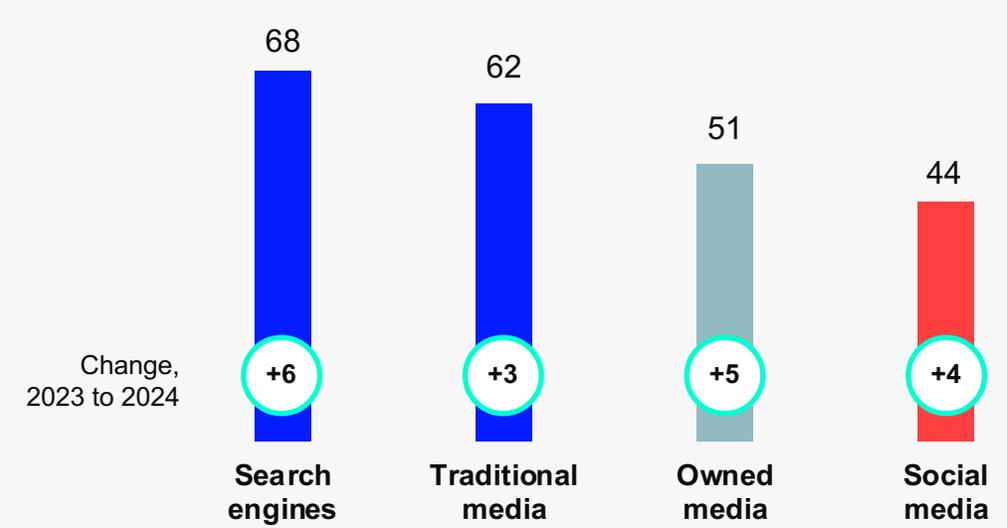

Trust in Media Sources

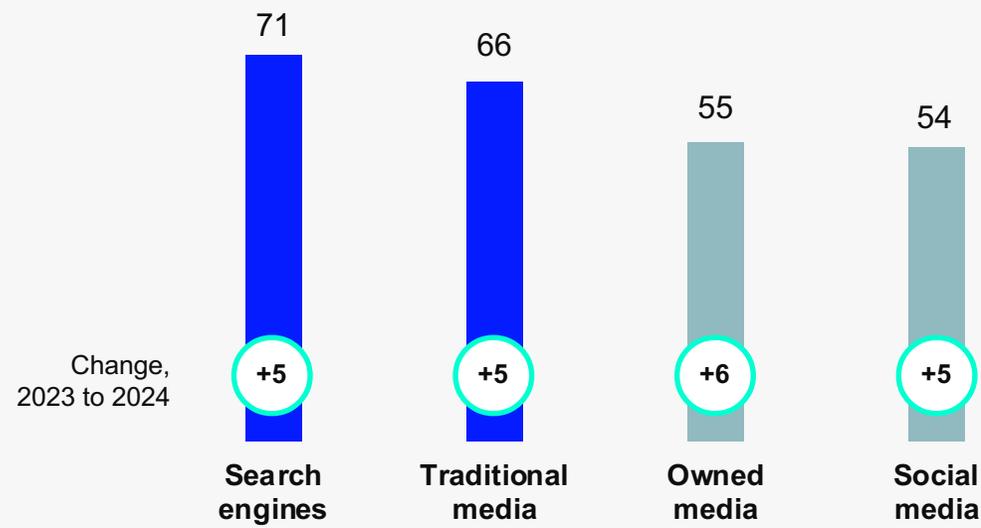

Percent trust in each media source for general news and information

GLOBAL 27 Excludes Brazil

APAC

2024 Edelman Trust Barometer. COM_MCL. When looking for general news and information, how much would you trust each type of source for general news and information? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 27-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Brazil, the translation for "Search engines" was updated in 2024. This language change means the Brazil 2024 data cannot be compared to data from previous years and has been removed from this analysis for all items to ensure a consistent global average is shown for each.

10-Year Trend: Trust in Media Sources

Percent trust in each media source for general news and information

2024 Edelman Trust Barometer. COM_MCL. When looking for general news and information, how much would you trust each type of source for general news and information? 9-point scale; top 4 box, trust. Question asked of half the sample. General population, 21-mkt avg. Ten-year changes were tested for significance using a t-test set at the 99%+ confidence level.

In Brazil, the translation for "Search engines" was updated in 2024. This language change mean the 2024 data cannot be compared to data from previous years and has been removed from this analysis for all items to ensure a consistent global average is shown for each.

Fear of Innovation Becomes Political, by Innovation

1. Data reported on slides is weighted to the same total base size to ensure each country has an equal effect on the global average. Some questions were asked of only half of the sample. Please refer to the footnotes on each slide for details.

2. The “global average” indicates the average result of all the countries where data was collected. As mentioned above, there has been no adjustment made to the population size relative to each country and the global average is not intended to suggest a total result of the entire global population.

3. Margin of error is calculated on the unweighted sample sizes collected, utilizing a 99% confidence interval.

4. There were additional quotas on ethnicity in the UK and U.S., and on nationality in Saudi Arabia and the UAE.

5. All data collected in China is from the mainland. Regions of Greater China were not surveyed.

1. Because some of the content we ask is deemed politically sensitive there are several countries where we take special precautions in order to avoid putting our respondents, or ourselves, in a position to break any local laws. We work closely with our sample partner and its legal team to identify which questions, and in what countries, we should refrain from asking. The three countries where we removed questions and/or answer options were China, Saudi Arabia, and Thailand.

2. Due to a translation inconsistency regarding the measure of competence in the four main institutions in S. Korea, the data was removed from the global average on the affected slide.

*Data source: <https://www.internetworldstats.com/stats.htm> as of Jan 11, 2024

Due to disproportionate access to internet in countries with lower internet penetration, the online sample in those countries tends to skew younger, urban, and more affluent.

Data Analysis Explained:

French Data Model

In 2021, the translation of “government in general” in the French questionnaire was incorrectly changed to “authorities in general,” affecting data in all studies conducted in France from 2021 to 2023. When we discovered the inconsistency in early 2023, we suppressed all affected data while investigating the possibility of modeling and replacing the missing data.

Over the course of 2023, we built a data model that could reliably predict what the France data would have been if the translation were consistent. This involved identifying items (shown in the list on the right) that are predictive of trust in government in other Western democracies and testing whether they had similar predictive power in France.

To build a model with a sufficient level of accuracy, we iterated through 5,000 different randomly split samples, controlling for gender, income, age, and other demographics, of France data collected in the 2024 Edelman Trust Barometer and in the 2023 Special Report: Trust and Climate Change. In both surveys, we used the accurate translation for trust in “government in general,” along with the predictor variables. In both surveys, we also included the trust in “authorities in general” attribute for our French respondents. This allowed us to include the mistranslated variable in our model as one of the predictors for trust in government.

For each split sample, 75% of the sample was used to train the data, and the remaining 25% was used as a test group. Using a random forest classification model, we were able to accurately classify 89.41% of respondents as trusters or non-trusters, which gave us the confidence to repopulate the data in affected reports with data from our predictive model.

The modeled data was applied to the France data from each impacted year (2021, 2022, and 2023) to predict the overall level of trust in government in general. The Trust Index for those years has also been updated, given that trust in government is part of that calculation.

Predictors	Question text
Trust in institutions	TRU_INS: Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you “do not trust them at all” and nine means that you “trust them a great deal”.
	Media in general
	Business in general
	Non-governmental organizations (NGOs)
Economic optimism	CNG_FUT: Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years’ time?
	TRU_3D_GOV: To what extent do you agree with the following statement?
	Government in general is good at what it does
	POP_EMO: Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following?
Fears of gig-economy	Permanent jobs with benefits being replaced by freelance, gig-economy or short-term jobs that do not offer benefits
	GOV_PER_DIM: In thinking about why you do or do not trust government in general, please specify where you think it falls on the scale between the two opposing descriptions.
	Highly effective agent of positive change
	Honest and fair
Government ethics dimensions	Has a vision for the future that I believe in
	Serves the interests of everyone equally and fairly

Data Analysis Explained:

Innovation Management Scale

The Innovation Management scale was created by averaging respondents' answers to five attributes measured on 9-point scales, shown in the table to the right.

- Respondents who believe that innovation is well managed were those that scored between 1 – 4.49 on the Innovation Management Scale, meaning on average they disagreed with these statements.
- Respondents who scored between 4.5 – 5.49 on the scale were classified as neutral.
- Respondents who believe that innovation is poorly managed scored between 5.5 – 9 on the Innovation Management Scale, meaning on average they agreed with these statements.

The specific items in the scale were chosen for their ability to represent three dimensions of innovation management and development:

- **Trust in institutions** to manage the introduction of new technologies and innovations
- **Government's ability to regulate** emerging technologies effectively
- **Outside influence on science**, in terms of how it's conducted

Items	Question text
Trust in business and NGOs	TRU_INS_TCNG. Below is a list of institutions. For each one, please indicate how much you trust that institution <u>to do what is right</u> when it comes to ensuring that the introduction of new technologies and innovations into society is well-managed (e.g., they are <u>safe</u> , <u>understood</u> by the public, <u>beneficial</u> to society as a whole, and <u>accessible</u> to the people who need them). – reverse scored
	Business in general
	Non-governmental organizations (NGOs)
Government regulation	POP_MDC. Below is a list of statements. For each one, please rate how <u>true</u> you believe that statement is using a nine-point scale where one means it is “not at all true” and nine means it is “completely true”.
	The people in government in charge of regulating technology do not have an adequate understanding of emerging technologies to be able to regulate them effectively
Science influenced by politics and money	CHG_AGR. Please indicate how much you agree or disagree with the following statements.
	Science has become politicized in this country
	Government and other large organizations that fund research have too much influence on how science in this country is done

Data Analysis Explained:

Classifying Respondents as Generally Resistant to Innovations

Respondents were asked to characterize their feelings about each of the four innovations (shown below) using the scale to the right.

To classify respondents as resistant to innovations, we calculated an average score across the four innovations. If a respondent's average score was less than 2.5 (rounded to a 1 or 2), they were classified as rejecting of innovation.

Innovations

The growing use of **artificial intelligence** such as machine learning, natural language processing, and generative AI

The growing use of **green energy** such as biofuels and renewable natural gas, liquid hydrogen, and wind and solar power

The growing use of **genetically modified foods** (foods that are derived from genetically modified organisms, commonly referred to as GMOs) such as drought-, pest-, and disease-resistant crops, faster-growing fish, and produce that has a longer shelf life

The growing use of **gene-based medical technologies** such as mRNA vaccines, gene splicing, and gene therapy

Scale points

1. **Resistant:** I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.
2. **Hesitant:** I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.
3. **Comfortable:** I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.
4. **Enthusiastic:** I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.
5. **Passionate:** I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.

Data Analysis Explained:

Average Acceptance Rating

Respondents were asked to separately rate four technologies (green energy, artificial intelligence, gene-based medicine, and GMO foods, as shown on the previous Tech Appendix slide) on a 5-point scale, ranging from Resistant to Passionate (see full scale to the right). We calculated overall levels of acceptance across the population by taking the average scale point selected.

Segments of the population were classified as one of the five categories, based on the cut points in the table to the far right.

- If the average of an audience segment fell between 1-2.49, they were classified as “rejecting” the innovation.
- Audience segments with an average score of 3.5-5 were classified as “embracing” the innovation.

This method of calculating an average acceptance rating was applied to different audiences throughout the report.

Segment category	Range
Resistant: I am very worried about this. I boycott products and services that incorporate these technologies and urge others to do the same.	1-1.49
Hesitant: I am concerned about this. I personally try to avoid using products and services that incorporate these technologies.	1.5-2.49
Comfortable: I am okay with this. I will use products and services that incorporate these technologies but won't actively seek them out.	2.5-3.49
Enthusiastic: I am excited about this. I am looking to increase my use of products and services that incorporate these technologies.	3.5-4.49
Passionate: I am a big advocate for this. I am looking to increase my use of products and services that incorporate these technologies and actively encouraging others to do the same.	4.5-5
Don't know / not sure	

Data Analysis Explained:

How We Plotted the Institutional Competence and Ethics Scores

We define trust as the combination of competence and ethics. The report features a chart depicting how competent and ethical each of the institution are rated to be. Here's how we calculated each score.

The competence score (the x-axis of the plot): An institution's competence score is a net of the top 3 box (AGREE) minus the bottom 3 box (DISAGREE) responses to the question "To what extent do you agree with the following statement? *[INSTITUTION] in general is good at what it does*". The resulting net score was then subtracted by 50, which means that for an institution to qualify as competent, it would require a net difference of 51 points or more in its percentage of top 3-box ratings versus its bottom 3-box ratings. This ensures that an institution could not be considered competent unless there is a majority who rate it as such.

The net ethical score (the y-axis of the plot): The ethics dimension is defined by four separate items. For each item, a net score was calculated by taking the top 5 box percentage representing a positive ethical perception minus the bottom 5 box percentage representing a negative ethical perception. The y-axis value is an average across those 4 net scores. Scores higher than zero indicate an institution that is perceived as ethical.

Respondents were asked:

In thinking about why you do or do not trust *[INSTITUTION]*, please specify where you think they fall on the scale between the two opposing descriptions. *(Please use the slider to indicate where you think [INSTITUTION] falls between the two extreme end points of each scale.)*

Dimension	Ethical Perception	Unethical Perception
Purpose-Driven	Highly effective agents of positive change	Completely ineffective agents of positive change
Honest	Honest and fair	Corrupt and biased
Vision	Have a vision for the future that I believe in	Do not have a vision for the future that I believe in
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people
